

## Cleveland Clinic Arts & Medicine

Cleveland Clinic Arts & Medicine was created with the purpose of integrating the therapeutic, visual, & performing arts and research into the Cleveland Clinic to promote healing and enrich the lives of our patients, families, visitors, and employees.

### About Art & Music Therapy

Art and music therapy are clinical and evidence-based practices that utilize music and art-based interventions, conducted by credentialed professionals, to support physiological, psychological, and emotional growth and healing for patients and families.

With creativity and care, art and music therapists bring light to some of the most difficult days for our patients and families. Whether it is easing pain through a child's favorite song, painting a mural to inspire strength and hope, or creating fingerprint and heartbeat recording keepsakes to aid in the grieving process, our therapists use the arts to inspire healing, learning, and growth.

Due to infection prevention measures, only new items can be accepted.

### Art & Music Therapy Wish List
