Physiatrist

## About the Mellen Center Neurorehabilitation and Spasticity Clinic

Our multidisciplinary team focuses on treatments and rehabilitation to improve spasticity and optimize function in adults with conditions of the central nervous system (brain and spinal cord), including multiple sclerosis, stroke, cerebral palsy, motor neuron disease, brain injury and spinal cord injury.

Treatments offered include botulinum toxin therapy and intrathecal baclofen therapy (baclofen pump) for spasticity, rehabilitation for upper and lower limb dysfunction, gait and balance rehabilitation, training for ADL/self-care skills, neuro-developmental treatment (NDT) therapy for postural realignment and trunk control, cognitive rehabilitation, evaluation and training for assistive devices, and wheelchair evaluations.

## Location and Appointments

The Mellen Center for Multiple Sclerosis Treatment and Research is conveniently located on Cleveland Clinic's main campus, in a freestanding building separate from the hospital's busiest areas. The building is easily accessible and located on the corner of East 89th Street and Euclid Avenue. Parking is available in front of the building, which is wheelchair accessible.

To schedule an appointment, please call 216.444.8600. For general questions, call 216.444.9969.

## Physician Referrals

To refer a patient to the Mellen Center Neurorehabilitation and Spasticity Clinic, call 216.444.9969.
