# **EXECUTIVE SUMMARY**

# Introduction

This Community Health Needs Assessment (CHNA) was conducted by Cleveland Clinic South Pointe Hospital ("South Pointe" or "the hospital") to identify significant community health needs, to inform development of an Implementation Strategy to address current needs and to evaluate the impact of ongoing efforts to address previously identified community needs.

South Pointe, a Cleveland Clinic hospital, is a 175-bed acute care, community teaching hospital serving the healthcare needs of Cleveland's southeast suburbs since 1957. By combining the talents of highly qualified physicians, nurses and staff, South Pointe delivers a patient-centered model of care which promotes the healing of the mind, body and spirit. U.S. News & World Report recognized South Pointe as high-performing in the adult specialties of Neurology & Neurosurgery. Additional information on the hospital and its services is available at: https://my.clevelandclinic.org/locations\_directions/Regional-Locations/southpointe-hospital.

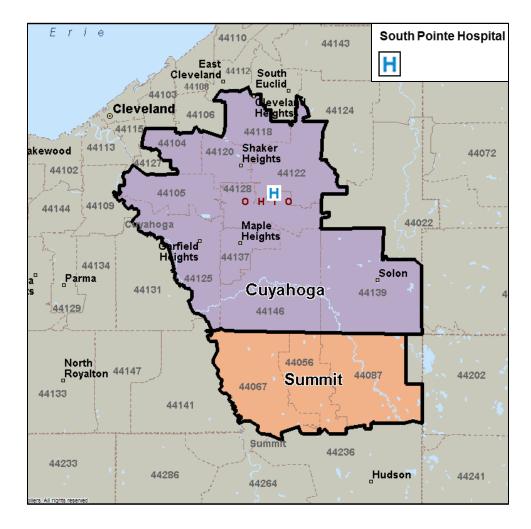

The hospital is part of the Cleveland Clinic health system, which includes an academic medical center, multiple regional hospitals, two children's hospitals, a rehabilitation hospital, a Florida hospital and a number of other facilities and services across Northeast Ohio and Florida. Additional information about Cleveland Clinic is available at: https://my.clevelandclinic.org/.

Each Cleveland Clinic hospital is dedicated to the communities it serves. Cleveland Clinic hospitals verify the health needs of communities by performing periodic health needs assessments. These formal assessments are analyzed using widely accepted criteria to determine and measure the health needs of a specific community.

# **Community Definition**

For purposes of this report, South Pointe's community is defined as 13 ZIP codes in Cuyahoga and Summit counties in Ohio comprising over 82 percent of the hospital's inpatient volumes. This area has comparatively unfavorable health status and socioeconomic indicators, particularly for minority residents. The total population of South Pointe's community in 2015 was 356,285.

### EXECUTIVE SUMMARY

The following map portrays the community served by South Pointe.

# **Significant Community Health Needs**

Six significant community health needs were identified through this assessment:

- 1. Access to Affordable Healthcare
- 2. Chronic Diseases and Other Health Conditions
- 3. Economic Development and Community Conditions
- 4. Health Professions Education and Research
- 5. Healthcare for the Elderly
- 6. Wellness

Based on an assessment of secondary data (a broad range of health status and access to care indicators) and of primary data (received through key stakeholder interviews), the following were identified as significant health needs in the community served by South Pointe. The needs are presented below in alphabetical order, along with certain highlights regarding why each issue was identified as "significant."

# EXECUTIVE SUMMARY

### Access to Affordable Health Care

• Access to basic health care is challenging for some segments of the South Pointe community who are unaware of how to access and use available services and who experience other access barriers including cost and inadequate transportation. The South Pointe community has comparatively unfavorable socioeconomic indicators, particularly in medically underserved areas. The recent election of the new president raises questions regarding whether access improvements associated with the Affordable Care Act will be sustained.

#### **Chronic Diseases and Other Health Conditions**

• Chronic diseases and other health conditions including, in alphabetical order: cancer, chemical dependency, communicable diseases (including sexually transmitted infections), diabetes, heart disease, hypertension, obesity, poor birth outcomes, poor mental health status, and respiratory diseases were identified as prevalent in the South Pointe community.

### **Economic Development and Community Conditions**

• Several areas within the South Pointe community lack adequate social services and experience high rates of poverty, unemployment, and crime.

#### **Health Professions Education and Research**

• There is a need for more trained health professionals in the community, particularly primary care physicians, mental health providers, and dentists. Research conducted by Cleveland Clinic, has improved health for community members through advancements in new clinical techniques, devices and treatment protocols in diseases and health conditions such as such as cancer, heart disease, diabetes, and others. There is a need for more research to address these and other community health needs.

### Healthcare for the Elderly

• The elderly population in the South Pointe community is expected to increase in the next five years and meeting the health and social service needs of the aging population is a significant issue.

### Wellness

• Programs and activities that target behavioral health change were identified as needed in the South Pointe community. Education and opportunities for residents regarding exercise, nutrition, and smoking cessation specifically were noted.

# **OBJECTIVES AND METHODOLOGY**

# **Regulatory Requirements**

Federal law requires that tax-exempt hospital facilities conduct a CHNA every three years and adopt an Implementation Strategy that addresses significant community health needs.<sup>1</sup> Each tax-exempt hospital facility must conduct a CHNA that identifies the most significant health needs in the hospital's community.

The regulations require that each hospital:

- Take into account input from persons representing the broad interests of the community, including those knowledgeable about public health issues, and
- Make the CHNA widely available to the public.

The CHNA report must include certain information including, but not limited to:

- A description of the community and how it was defined,
- A description of the methodology used to determine the health needs of the community, and
- A prioritized list of the community's health needs.

Tax-exempt hospital organizations also are required to report information about the CHNA process and about community benefits they provide on IRS Form 990, Schedule H. As described in the instructions to Schedule H, community benefits are programs or activities that provide treatment and/or promote health and healing as a response to identified community needs. Community benefit activities and programs also seek to achieve objectives, including:

- improving access to health services,
- enhancing public health,
- advancing increased general knowledge, and
- relief of a government burden to improve health.<sup>2</sup>

To be reported, community need for the activity or program must be established. Need can be established by conducting a Community Health Needs Assessment.

CHNAs seek to identify significant health needs for particular geographic areas and populations by focusing on the following questions:

- *Who* in the community is most vulnerable in terms of health status or access to care?
- What are the unique health status and/or access needs for these populations?

<sup>&</sup>lt;sup>1</sup> Internal Revenue Code, Section 501(r).

<sup>&</sup>lt;sup>2</sup> Instructions for IRS form 990 Schedule H, 2015.

## OBJECTIVES AND METHODOLOGY

- *Where* do these people live in the community?
- *Why* are these problems present?

The question of *how* each hospital can address significant community health needs is the subject of the separate Implementation Strategy.

# Methodology

Federal regulations that govern the CHNA process allow hospital facilities to define the community they serve based on "all of the relevant facts and circumstances," including the "geographic location" served by the hospital facility, "target populations served" (e.g., children, women, or the aged), and/or the hospital facility's principal functions (e.g., focus on a particular specialty area or targeted disease)."<sup>3</sup> The community defined by South Pointe accounts for over 82 percent of the hospital's 2014 inpatient discharges.

This assessment was conducted by Verité Healthcare Consulting, LLC. See Appendix A.

Secondary data from multiple sources were gathered and assessed. *See* Appendix B. Considering a wide array of information is important when assessing community health needs to ensure the assessment captures a wide range of facts and perspectives and to increase confidence that significant community health needs have been identified accurately and objectively

Input from the community was received through key informant interviews. These informants represented the broad interests of the community and included individuals with special knowledge of or expertise in public health. *See* Appendix C.

Certain community health needs were determined to be "significant" if they were identified as problematic in at least two of the following three data sources: (1) the most recently available secondary data regarding the community's health, (2) recent assessments developed by other organizations, and (3) input from the key informants who participated in the interview process.

In addition, data was gathered to evaluate the impact of various services and programs identified in the previous South Pointe CHNA process. *See* Appendix D.

# **Collaborating Organizations**

For this assessment, South Pointe collaborated with the following Cleveland Clinic hospitals: Main Campus, Cleveland Clinic Children's, Akron General, Euclid, Fairview, Hillcrest, Lodi, Lutheran, Marymount, Medina, Edwin Shaw Rehabilitation and Cleveland Clinic Florida. South Pointe also collaborated with Ashtabula County Medical Center and Glenbeigh.

<sup>&</sup>lt;sup>3</sup> 501(r) Final Rule, 2014.

### **OBJECTIVES AND METHODOLOGY**

#### **Data Sources**

Community health needs were identified by collecting and analyzing data from multiple sources. Statistics for numerous community health status, health care access, and related indicators were analyzed, including data provided by local, state, and federal government agencies, local community service organizations, and Cleveland Clinic. Comparisons to benchmarks were made where possible. Findings from recent assessments of the community's health needs conducted by other organizations (e.g., local health departments) were reviewed as well.

Input from 21 persons representing the broad interests of the community was taken into account through key informant interviews. Interviewees included: individuals with special knowledge of or expertise in public health; local public health departments; agencies with current data or information about the health and social needs of the community; representatives of social service organizations; and leaders, representatives, and members of medically underserved, low-income, and minority populations.

#### **Information Gaps**

This CHNA relies on multiple data sources and community input gathered between January 2016 and July 2016. A number of data limitations should be recognized when interpreting results. For example, some data (e.g., County Health Rankings, Community Health Status Indicators, Behavioral Risk Factors Surveillance System, and others) exist only at a county-wide level of detail. Those data sources do not allow assessing health needs at a more granular level of detail, such as by ZIP code or census tract.

Secondary data upon which this assessment relies measure community health in prior years. For example, the most recently available mortality data published by the Ohio Department of Health are from 2012. Others sources incorporate data from 2010. The impacts of recent public policy developments, changes in the economy, and other community developments are not yet reflected in those data sets.

The findings of this CHNA may differ from those of others conducted in the community. Differences in data sources, communities assessed (e.g., hospital service areas versus counties or cities), and prioritization processes can contribute to differences in findings.

# **Definition of Community Assessed**

This section identifies the community that was assessed by South Pointe. The community was defined by considering the geographic origins of the hospital's 2014 inpatient discharges.

On that basis, South Pointe's community is comprised of 13 ZIP codes in Cuyahoga and Summit counties (**Exhibit 1**) which in 2014 accounted for 82 percent of its inpatient discharges.

County	City	ZIP Code	Inpatient Cases (2014)	Percent of Total
Cuyahoga	Cleveland	44128	1,595	23.8%
Cuyahoga	Beachwood	44122	817	12.2%
Cuyahoga	Cleveland	44120	678	10.1%
Cuyahoga	Cleveland	44105	629	9.4%
Cuyahoga	Bedford	44146	468	7.0%
Cuyahoga	Maple Heights	44137	401	6.0%
Summit	Northfield	44067	254	3.8%
Summit	Twinsburg	44087	172	2.6%
Cuyahoga	Cleveland	44104	139	2.1%
Cuyahoga	Cleveland	44125	97	1.4%
Cuyahoga	Cleveland	44118	95	1.4%
Summit	Macedonia	44056	87	1.3%
Cuyahoga	Solon	44139	76	1.1%
Subtotal			5,508	82.0%
Other Areas			1,207	18.0%
Total Discharges			6,715	100.0%

Exhibit 1: South Pointe Inpatient Discharges by ZIP Code, 2014

Source: Analysis of OHA Discharge Data, 2014.

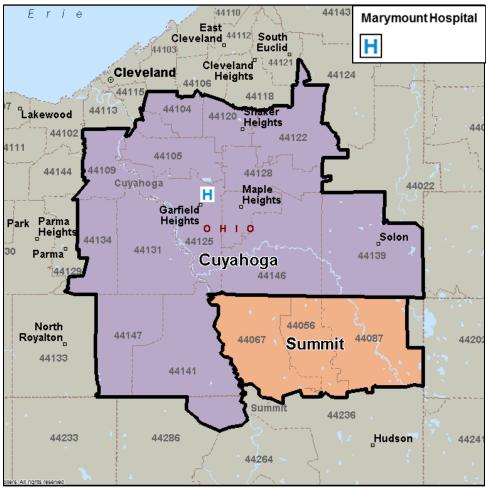

The total population of this community in 2015 was approximately 356,000 persons (Exhibit 2).

County	City	ZIP Code	Total Population 2015	Percent of Total Population 2015
Cuyahoga	Beachwood	44122	33,661	9.4%
Cuyahoga	Bedford	44146	29,602	8.3%
Cuyahoga	Cleveland	44104	22,327	6.3%
Cuyahoga	Cleveland	44105	37,633	10.6%
Cuyahoga	Cleveland	44118	39,612	11.1%
Cuyahoga	Cleveland	44120	35,932	10.1%
Cuyahoga	Cleveland	44125	27,551	7.7%
Cuyahoga	Cleveland	44128	28,303	7.9%
Cuyahoga	Maple Heights	44137	22,566	6.3%
Cuyahoga	Solon	44139	24,770	7.0%
Summit	Macedonia	44056	11,970	3.4%
Summit	Northfield	44067	20,775	5.8%
Summit	Twinsburg	44087	21,583	6.1%
Community To	tal		356,285	100.0%

**Exhibit 2: Community Population, 2015** 

Source: Truven Market Expert, 2015.

The hospital is located in Warrensville Heights, Ohio (ZIP code 44122). The map in **Exhibit 3** portrays the ZIP codes that comprise the South Pointe community.

### **Exhibit 3: South Pointe Community**

# **Secondary Data Summary**

The following section summarizes principal findings from the secondary data analysis. Appendix B provides more detailed information.

### Demographics

Population characteristics and changes directly influence community health needs. The total population in the South Pointe community is expected to decrease 1.1 percent from 2015 to 2020. Between 2015 and 2020, nine of the 13 ZIP codes in the South Pointe community are projected to lose population. The populations in two Cleveland ZIP codes (44105 and 44120) are expected to decrease by approximately four percent or more.

While the total population is expected to decrease, the number of persons aged 65 years and older is projected to increase by 11.7 percent between 2015 and 2020. The growth of older populations is likely to lead to a growing need for health services, since on an overall per-capita basis, older individuals typically need and use more services than younger persons.

In 2015, over 70 percent of the population in five ZIP codes on the northern side of the community (44104, 44128, 44105, 44120, and 44137) was Black. In one southwestern ZIP code, this percentage was under 10 percent.

Cuyahoga County had a higher percentage of residents aged 25 years and older without a high school diploma than the Ohio average. Compared to Ohio, Cuyahoga County had a higher proportion of the population that is linguistically isolated.<sup>4</sup>

#### **Economic Indicators**

Many health needs have been associated with poverty. According to the U.S. Census, in 2014 approximately 15.9 percent of people in Ohio were living in poverty. At 18.5 percent, Cuyahoga County's poverty rate was higher than Ohio's poverty rate during that year. In Cuyahoga County, poverty rates have been comparatively high for Black and Hispanic (or Latino) residents and in Summit County, poverty rates have been comparatively high for Asian residents. Low income census tracts are prevalent in the northern portion of South Pointe's community.

2013 crime rates in Cuyahoga and Summit counties were well above Ohio averages.

The percentage of people uninsured has declined in recent years, due to two primary factors. First, between 2010 and 2015, unemployment rates at the local (Cuyahoga and Summit counties), state, and national level decreased significantly. Many receive health insurance coverage through their (or a family member's) employer. Second, in 2010 the Patient Protection and Affordable Care Act (ACA, 2010) was enacted, and Ohio was among the states that

<sup>&</sup>lt;sup>4</sup> Linguistic isolation is defined as residents who speak a language other than English and speak English less than "very well."

expanded Medicaid eligibility. In 2015, ten out of the 13 ZIP codes in the South Pointe community had uninsured rates below ten percent. By 2020, it is projected that this will increase to twelve of the 13 ZIP codes in the community.

## Local Health Status and Access Indicators

In the 2016 *County Health Rankings*, Cuyahoga County ranked in the bottom one-half of Ohio counties for 17 of the 27 indicators assessed. For five issue areas, the county ranked in the bottom quartile including: Quality of Life, Sexually Transmitted Infections, Social and Economic Factors, Inadequate Social Support, and Severe Housing Problems. The county's ranking fell between 2013 and 2016, particularly for various social and economic factors, social determinants of health, Excessive Drinking, and Physical Environment.

Summit County ranked in the bottom 50<sup>th</sup> percentile among Ohio counties for 11 of the 27 indicators assessed. Of those 11 indicators ranking in the bottom 50<sup>th</sup> percentile, five of them ranked in the bottom quartile, including Sexually Transmitted Infections, Diabetic Screening, Physical Environment, Air Pollution, and Severe Housing Problems. Between 2013 and 2016, rankings for 17 indicators fell in Summit County. The following indicators underlying the rankings are comparatively unfavorable:

- Air pollution
- Average number of physically unhealthy days
- Binge and heavy drinking
- Chlamydia rate
- Diabetic screening
- Food environment index
- High school graduation rate
- Hospitalization rate for ambulatory care sensitive conditions
- Income inequality rate
- Mammography screening
- Percent of adults reporting fair or poor health
- Percent of adults that report smoking
- Percent of children in poverty
- Percent of children living in a household headed by a single parent
- Percent of driving deaths with alcohol involvement
- Percent of households with severe housing problems
- Percent of live births with low birth weight
- Percent of the population unemployed
- Percent of the population without health insurance
- Percent of the workforce that drives to work alone
- Percent of workers with a long commute who drive alone
- Ratio of population to dentists
- Social associations rate
- Teen birth rate
- Violent crime rate

• Years of potential life lost

In the 2015 *Community Health Status Indicators*, which compares community health indicators for each county with those for peers across the United States, the following indicators appear to be most significant:

- Annual average particulate matter concentration and the number of individuals living near highways
- Morbidity associated with Alzheimer's disease, gonorrhea, adult asthma, adult depression, and preterm births
- Mortality rates for cancer and coronary heart disease
- Rates of preventable hospitalizations for older adults
- The number of adults who report binge drinking
- The number of children living in single-parent households

According to the Ohio Department of Health, age-adjusted mortality rates for heart disease, homicide, aortic aneurysm, HIV, and pedestrians killed in traffic collisions were all significantly higher in Cuyahoga County than the Ohio averages. In Summit County, age-adjusted mortality rates for influenza and pneumonia, homicide, aortic aneurysm, and pedestrians killed in traffic collisions were also higher than the Ohio averages. Overall age-adjusted mortality and incidence rates for cancer in the community have been slightly above average.

Ohio Department of Health data also indicate that:

- The incidence of several communicable diseases has been particularly high in Cuyahoga County, including chlamydia, HIV, gonorrhea, and viral meningitis. Rates of chlamydia, gonorrhea, viral meningitis, and hepatitis A, B, and C were also high in Summit County.
- Virtually all maternal and child health indicators (infant mortality rates, low birth weights, preterm births, and teen pregnancies) are comparatively problematic in Cuyahoga County. Neonatal mortality rates, low birth weights, and preterm births are also comparatively problematic in Summit County.

Data from the Centers for Disease Control's Behavioral Risk Factor Surveillance System (BRFSS) indicate comparatively high rates of smoking, obesity, and high blood pressure in several ZIP codes across the community.

### Ambulatory Care Sensitive Conditions

Ambulatory Care Sensitive Conditions (ACSCs) include fourteen health conditions we analyzed "for which good outpatient care can potentially prevent the need for hospitalization or for which early intervention can prevent complications or more severe disease."<sup>5</sup> Among these conditions are: angina without procedure, diabetes, perforated appendixes, chronic obstructive pulmonary

<sup>&</sup>lt;sup>5</sup>Agency for Healthcare Research and Quality (AHRQ) Prevention Quality Indicators.

disease (COPD), hypertension, congestive heart failure, dehydration, bacterial pneumonia, urinary tract infection, and asthma.

We reviewed ACSC rates in the South Pointe community for conditions and South Pointe community rates have exceeded the Ohio averages for all but two conditions (perforated appendix and bacterial pneumonia). Rates for hypertension, diabetes, chronic obstructive pulmonary disease, adult asthma, congestive heart failure, low birth weight, and dehydration were particularly problematic.

### **Community Need Index**

Dignity Health, a California-based hospital system, developed and has made widely available for public use a *Community Need Index*<sup>TM</sup> (CNI) that measures barriers to health care access by county/city and ZIP code. The index is based on five social and economic indicators:

- The percentage of elders, children, and single parents living in poverty
- The percentage of adults over the age of 25 with limited English proficiency, and the percentage of the population that is non-White
- The percentage of the population without a high school diploma
- The percentage of uninsured and unemployed residents
- The percentage of the population renting houses

The CNI calculates a score for each ZIP code based on these indicators. Scores range from "Lowest Need" (1.0-1.7) to "Highest Need" (4.2-5.0).

The CNI indicates that four of the 13 ZIP codes in the South Pointe community scored in the "highest need category." Cleveland ZIP codes 44104 and 44105 each received a score of 5.0 - the highest score possible.

### **Food Deserts**

The U.S. Department of Agriculture's Economic Research Service estimates the number of people in each census tract that live in a "food desert," defined as low-income areas more than one mile from a supermarket or large grocery store in urban areas and more than 10 miles from a supermarket or large grocery store in rural areas. Several locations within the South Pointe community have been designated as food deserts.

### Medically Underserved Areas and Populations

Medically Underserved Areas and Populations (MUA/Ps) are designated by the Health Resources and Services Administration (HRSA) based on an "Index of Medical Underservice." The index includes the following variables: ratio of primary medical care physicians per 1,000 population, infant mortality rate, percentage of the population with incomes below the poverty level, and percentage of the population age 65 or over. Areas with a score of 62 or less are considered "medically underserved." There are approximately 31 census tracts in the hospital's community that have been designated as medically underserved.

### Health Professional Shortage Areas

A geographic area can receive a federal Health Professional Shortage Area (HPSA) designation if a shortage of primary medical care, dental care, or mental health care professionals is found to be present. A number of census tracts have been designated to be HPSAs in the hospital's community – for primary care and for dental care.

### **Relevant Findings of Other CHNAs**

The following community health needs were most frequently found to be significant in other, recently conducted community health needs assessments:

- Obesity
- Mental/Behavioral health
- Access to basic/primary health care
- Diabetes
- Cardiovascular/heart disease
- Tobacco use/smoking
- Drug/substance abuse
- Alcohol abuse and excessive drinking
- Elderly care/aging population
- Cancer
- Infant mortality (disparities)
- Access to dental care
- Access/lack of health insurance coverage
- Cost of care
- Poverty
- Transportation

The assessment prepared by the Cuyahoga County Health Improvement Partnership (2015) also highlighted issues with violence and health disparities/equity.

# **Primary Data Summary**

The following community health issues were identified by interviewees as significant. The issues are presented based on the frequency with which they were mentioned.

Access to Healthcare. Interviewees identified different health care services that were particularly difficult to access in the South Pointe community. Interviewees also expressed a need for more providers throughout the community, including mobile health units, free clinics, and outpatient cancer centers. The specific services identified as priority needs were:

• **Primary Care.** Basic primary care was identified as a priority in the community. Interviewees stated that long waitlists for many services was normal and that many

residents in the community were using emergency care services as primary providers due to the waitlists, costs of primary care, or lack of insurance.

- **Dental Care.** Oral health was seen as an important health need throughout the community. Interviewees believed that proper oral health was a key component of good health. However, interviewees stated that finding proper dental care could be difficult in the community. This was especially true for low income or uninsured populations.
- **Specialty Care.** Interviewees believed that specialty care was an issue in the community, particularly for individuals with cancer. The general perception among interviewees was that residents in need of special care had to travel long distances, often outside of the community.

**Conditions and Care of the Elderly.** Aging well in the community was a top concern of many interviewees. With an aging population, many chronic conditions associated with elderly populations arose as areas of need. Interviewees expressed particular concern for the rates of dementia and Alzheimer's disease in the community. The growth of this population means more resources will be needed, and interviewees noted that there are not enough senior living facilities (especially for low-income seniors), a lack of providers accepting Medicare, challenges with transportation for seniors, and isolation among this population. Interviewees were especially concerned with the health of low-income seniors, stating that many were forced to choose between purchasing food and medication each month. The lack of printed health information available in the community was also identified as a concern, as many seniors struggled to operate computers to access the information online.

**Obesity, Physical Inactivity, and Related Conditions.** Interviewees cited the high rates of obesity and physical inactivity among residents of the South Pointe community as significant health concerns. Long-term obesity and physical inactivity were associated with high rates of chronic diseases including heart disease, hypertension, and diabetes. Many interviewees indicated that several locations in the community contained food deserts, limiting residents' access to healthy foods. It was also perceived that many individuals lacked awareness of the importance of nutrition and exercise, and that preventive services and educational opportunities were needed to help remediate the issue.

**Mental Health Conditions and Care.** A large majority of those interviewed believed that either mental health conditions or accessing mental health services were a primary concern in the community. Adolescent populations were viewed as particularly susceptible to poor mental health, largely as a product of the high stress and expectations put on them for academic achievement. Mental health services were also seen as disproportionately inaccessible in the community. While all mental health services were considered for improvement, interviewees indicated that adolescent services, long-term institutional care, and diverting at-risk populations from incarceration to treatment were most important

**Infant Mortality.** A majority of interviewees cited the high rate of infant mortality as a serious concern within the community. A lack of access to prenatal health care services and education, especially among low-income and minority populations, contribute to the high mortality rates.

Unhealthy lifestyles and poor management of chronic conditions such as diabetes and hypertension among pregnant women were also believed to influence these rates.

**Substance Abuse.** Interviewees indicated that the rapidly increasing abuse of heroin by residents of the community was a top health concern. Abuse was cited as a widespread issue, affecting individuals in every age and socioeconomic class.

**Transportation.** Several interviewees identified a lack of transportation as a serious concern within the county, stating that the issue prevented individuals from accessing important community health resources. Interviewees noted that the transportation issues within the community were particularly problematic for seniors, low-income individuals, and residents with disabilities.

**Social and Economic Issues.** Within the South Pointe community, interviewees noted that several issues disproportionately affected Black residents, including high rates of poverty and unemployment and decreasing property values. Financial challenges were believed to exacerbate mental health issues and severely limit the community's access to quality healthcare services and healthy foods. Interviewees further noted that low-income Black residents had significantly higher rates of heart disease, diabetes, and hypertension.

**Cancer.** Several interviewees identified cancer as a significant health concern within the South Pointe community. High rates of cancer were attributed to the unhealthy lifestyles and eating habits of many residents. Interviewees expressed additional concern for the senior population, as transportation issues increased the difficulty of obtaining care.

**Environmental Issues.** Several interviewees cited environmental issues including lead contamination and air pollution as significant issues in the community. A lack of affordable housing was said to have the greatest impact on low-income minority residents. A number of respondents stated that Cleveland's Housing Inspection Authority was currently not robust enough to address the issue of substandard living conditions.

### SIGNIFICANT COMMUNITY HEALTH NEEDS

# SIGNIFICANT COMMUNITY HEALTH NEEDS

# **Prioritization Process**

The following section highlights why certain community health needs were determined to be "significant." Needs were determined to be significant if they were identified as problematic by at least two of the following three data sources: (1) the most recently available secondary data regarding the community's health, (2) recent assessments developed by other organizations (e.g., local Health Departments), and (3) the key informants who participated in the interview process.

### Access to Affordable Health Care

Access to basic health care is challenging for some segments of the South Pointe community who are unaware of how to access and use available services and who experience other access barriers including cost and inadequate transportation. The South Pointe community has comparatively unfavorable socioeconomic indicators, particularly in medically underserved areas. The recent election of the new president raises questions regarding whether access improvements associated with the Affordable Care Act will be sustained.

- Federally-designated Medically Underserved Areas (MUAs) and Primary Care Health Professional Shortage Areas (HPSAs) are present in the community served by South Pointe (Exhibits 33 and 34).
- Rates for ambulatory care sensitive conditions within the South Pointe community were significantly higher than the Ohio averages (**Exhibits 28 and 29**). Disproportionately high rates indicate potential problems with the availability or accessibility of ambulatory care and preventive services and can suggest areas for improvement in the health care system and ways to improve outcomes.
- In Community Health Status Indicators (CHSI), Cuyahoga and Summit counties rank poorly compared to peer counties for Older Adult Preventable Hospitalizations (Exhibit 21).
- Access to basic medical care was identified by nearly all interviewees as problematic. It was often cited that segments of the population rely excessively on emergency departments for primary care.

### **Chronic Diseases and Other Health Conditions**

Chronic diseases and health conditions including, in alphabetical order, cancer, chemical dependency, communicable diseases (including sexually transmitted infections), diabetes, heart disease, hypertension, obesity, poor birth outcomes, poor mental health status, and respiratory diseases were identified as prevalent in the South Pointe community.

# • Cancer

- Ohio Department of Health data indicate that the age-adjusted incidence and mortality rates for several types of cancer are higher in Cuyahoga and Summit counties than the Ohio averages (Exhibits 23 and 24).
- Many interviewees identified high cancer rates within the South Pointe community as a significant health concern. Cancer was also identified as a significant concern in many other, recent health assessments.

# • Chemical Dependency

- In County Health Rankings, Cuyahoga County ranked 52<sup>nd</sup> out of 88 Ohio counties for Drug Overdose Deaths and 64<sup>th</sup> for Excessive Drinking (Exhibit 19). Both Cuyahoga and Summit counties compared unfavorably to Ohio for the percent of driving deaths with alcohol involvement (Exhibit 20).
- According to the 2014 Ohio Department of Health Drug Overdose Report, fentanyl drug seizures in the United States increased by 300 percent between 2013 and 2014. In 2014, fentanyl-related overdoses accounted for 19.9 percent of accidental overdoses, a significant rise from 4.0 percent in 2013. Additionally, the rate of heroin poisoning in Cuyahoga County was significantly higher than the Ohio average.

Abuse of opiates was cited as a significant health concern by many interviewees. More than half of the recent health assessments analyzed in this report identified chemical dependency as a significant health need.

# • Communicable Diseases

- In County Health Rankings, Cuyahoga County ranked 87<sup>th</sup> out of the 88 counties in Ohio for Sexually Transmitted Infections and Summit County ranked 80<sup>th</sup> (Exhibit 19).
- According to the Ohio Department of Health, the age-adjusted mortality rate for HIV in Cuyahoga County was more than twice as high as the state average. Incidence rates for chlamydia, gonorrhea and viral meningitis in Cuyahoga and Summit counties were also significantly higher than the state average (Exhibits 22 and 25).

# • Diabetes, Heart Disease, and Hypertension

- The age-adjusted mortality rate for Heart Disease in Cuyahoga County was significantly higher than the Ohio average (**Exhibit 22**).
- ACSC rates for Congestive Heart Failure, Hypertension, Angina without Procedure, and Uncontrolled Diabetes were all significantly higher than the average ACSC rates in Ohio (Exhibit 29).
- In other, recent assessments, diabetes was the second most frequently identified significant need.
- Obesity
  - Federally-designated Food Deserts are present in the community served by South Pointe (Exhibit 32). Lack of access to affordable healthy food options and high concentrations of fast food restaurants, may lead individuals (particularly those in lower socio-economic classes) to consume calorie dense, nutrient poor foods that lead to obesity. Chronic conditions such as hypertension and diabetes are much more prevalent among individuals who are obese.

• Behavioral Risk Factor Surveillance System data show that many of the ZIP codes in the South Pointe community have comparatively high rates for obesity compared to the average of the 21 counties in Northeast Ohio (Exhibit 27).

# Poor Birth Outcomes

- In Community Health Status Indicators, both Cuyahoga and Summit counties benchmarked unfavorably to peer counties for Preterm Births (Exhibit 21).
- Data from the Ohio Department of Health indicate that rates of infant mortality, low birth weights, and preterm births in Cuyahoga County have been significantly higher than the Ohio averages. Low birth weights, preterm births and neonatal mortality rates have also been problematic in Summit County (Exhibit 26).
- ACSC rates for Low Birth Weight were significantly higher than the Ohio average in the South Pointe community (Exhibit 28).

# • Poor Mental Health Status

- Cuyahoga County ranked 54<sup>th</sup> out of the 88 counties in Ohio for Frequent Mental Distress in County Health Rankings (Exhibit 19) and Summit County compared unfavorably to peer counties for Older Adult Depression in Community Health Status Indicators (Exhibit 21).
- Many interviewees identified mental illness and a lack of mental health services as a significant concern for all age groups within the area served by South Pointe. Several interviewees cited the connection between poor mental health and negative outcomes for physical health.

# • Respiratory Diseases

- ACSC rates for Adult Asthma and Chronic Obstructive Pulmonary Disease were significantly higher than the average ACSC rates in Ohio (Exhibit 29).
- In Community Health Status Indicators, Cuyahoga and Summit counties compared unfavorably to peer counties for Adult Asthma (Exhibit 21).
- Other, recent health assessments identified respiratory diseases as a significant concern in Cuyahoga and Summit counties.

# Economic Development and Community Conditions

Several areas within the South Pointe community lack adequate social services and experience high rates of poverty, unemployment, crime and adverse environmental conditions.

- Cuyahoga County has a higher poverty rate than both the Ohio and national averages (Exhibit 12).
  - Poverty rates among Black and Hispanic (or Latino) populations in Cuyahoga County are more than twice as high as the poverty rate of White residents. The poverty rate among Asian populations in Summit County is also comparatively high (**Exhibit 13**).
  - Federally-designated Low Income Areas are present in the community served by South Pointe (Exhibit 14).
  - In County Health Rankings, Cuyahoga County ranked 79<sup>th</sup> out of the 88 counties in Ohio for Social and Economic Factors, 59<sup>th</sup> for Unemployment, and 78<sup>th</sup> for Inadequate Social Support. Summit County also ranked in the bottom half of

## SIGNIFICANT COMMUNITY HEALTH NEEDS

Ohio counties for Social and Economic Factors and Inadequate Social Support (Exhibit 19).

- According to the Community Need Index, four out of the 13 ZIP codes in South Pointe's community scored in the "highest need category" (Exhibit 30).
- A majority of interviewees identified economic and healthcare disparities among minority residents as significant community health issues.
- Crime rates in Cuyahoga and Summit counties have been well above Ohio averages (Exhibit 18) and recent homicide rates in Cuyahoga County have been nearly fifty percent higher than the Ohio average (Exhibit 22).
- In County Health Rankings, Summit County ranked 84<sup>th</sup> out of 88 counties in Physical Environment, 75<sup>th</sup> in Air Pollution, and 71<sup>st</sup> in Severe Housing Problems. Cuyahoga County ranked 61<sup>st</sup> in Physical Environment, 63<sup>rd</sup> in Air Pollution, and 87<sup>th</sup> in Severe Housing Problems (**Exhibit 19**).
- Other health assessments also identified transportation and environmental concerns as priorities.
- Interviewees identified a lack of transportation options as a significant barrier to good health in the community. This was especially true for low-income, elderly, and disabled residents.

## Health Professions Education and Research

There is a need for more research to address these and other community health needs. More trained health professionals are needed locally, regionally and nationally. Research conducted by Cleveland Clinic has improved health for community members through advancements in new clinical techniques, devices and treatment protocols in diseases and health conditions such as cancer, heart disease and diabetes.

- Federally-designated Medically Underserved Areas and Primary Care and Dental Health Professional Shortage Areas are present in the community served by South Pointe (Exhibits 33 and 34).
- A report conducted by the Robert Graham Center indicates that Ohio will need an additional 681 primary care physicians by 2030 (an eight percent increase) to maintain current levels of primary care access. Physicians nearing retirement age and increases in demand associated with increases in insurance coverage are expected to exacerbate this need.<sup>6</sup>
- Through research, Cleveland Clinic has advanced knowledge and improved community health for all its communities, from local to national, and across the world. Cleveland Clinic is involved in both basic research and clinical studies and seeks to translate discoveries into advanced treatments and cures for a variety of diseases and conditions. Cleveland Clinic's tripartite mission of patient care, research and education facilitates bringing new therapies and treatments to patients and their providers, because Cleveland Clinic physicians provide quality clinical care closely integrated with the latest research

<sup>&</sup>lt;sup>6</sup> Petterson, Stephen M; Cai, Angela; Moore, Miranda; Bazemore, Andrew. State-level projections of primary care workforce, 2010-2030. September 2013, Robert Graham Center, Washington, D.C.

### SIGNIFICANT COMMUNITY HEALTH NEEDS

and educational developments. Research is conducted at and in collaboration with all Cleveland Clinic hospitals. This allows patients to access the latest techniques and to enroll in research trials no matter where they access care in the health system.

### **Healthcare for the Elderly**

The elderly population in the South Pointe community is expected to increase in the next five years and meeting the health and social service needs of the aging population is a significant issue.

- While the population in South Pointe's community is projected to decrease by 1.1 percent between 2015 and 2020; the number of persons 65 years of age and older in the community is projected to increase by 11.7 percent over this period (**Exhibit 7**).
- In Community Health Status Indicators (CHSI), Cuyahoga and Summit counties rank poorly compared to peer counties for Older Adult Preventable Hospitalizations (Exhibit 21).
- Interviewees identified care of the elderly as a challenge in the community, including the need for additional in-home health care, services, and day care services. Concerns were also raised about the lack of providers accepting Medicare and the number of seniors who live alone.

### Wellness

Programs and activities that target behavioral health change were identified as needed in the South Pointe community. Education and opportunities for residents regarding exercise, nutrition, and smoking cessation specifically were noted.

- Behavioral Risk Factor Surveillance System data show that 8 of the 13 ZIP codes in the South Pointe community have significant percentages of residents who smoke compared to the average percent of the 21 counties in Northeast Ohio (Exhibit 27).
- Federally-designated Food Deserts are present in the community served by South Pointe (Exhibit 32). Lack of access to affordable healthy food options and high concentrations of fast food restaurants may lead individuals (particularly those in lower socio-economic classes) to consume nutrient poor foods.
- The lack of access to healthy food and a lack of nutrition-based education were perceived to be two of the main reasons individuals in the community had poor diets.

### OTHER FACILITIES AND RESOURCES IN THE COMMUNITY

# **OTHER FACILITIES AND RESOURCES IN THE COMMUNITY**

This section identifies other facilities and resources available in the community served by South Pointe that are available to address community health needs.

### **Federally Qualified Health Centers**

Federally Qualified Health Centers (FQHCs) are established to promote access to ambulatory care in areas designated as "medically underserved." These clinics provide primary care, mental health, and dental services for lower-income members of the community. FQHCs receive enhanced reimbursement for Medicaid and Medicare services and most also receive federal grant funds under Section 330 of the Public Health Service Act. There currently are three FQHC sites operating in the South Pointe community (**Exhibit 4**).

### **Exhibit 4: Federally Qualified Health Centers**

Health Center	County	ZIP Code
Carl B. Stokes Social Services Mall	Cuyahoga	44104
Miles Broadway Health Center	Cuyahoga	44105
SouthEast Health Center	Cuyahoga	44105

Source: Health Resources and Services Administration, 2016.

#### **Hospitals**

Exhibit 5 presents information on hospital facilities that operate in the community.

Hospital Name	Туре	Beds	ZIP Code	County
Cleveland Clinic Children's Hospital for Rehabilitation	Children's Rehabilitation	52	44104	Cuyahoga
Highland Springs Hospital	Psychiatric	72	44122	Cuyahoga
Kindred Hospital- Cleveland	Long-Term Acute Care	68	44120	Cuyahoga
Marymount Hospital	General Hospital	315	44125	Cuyahoga
Regency North Central Ohio- Cleveland East	Long-Term Acute Care	44	44128	Cuyahoga
South Pointe Hospital	General Hospital	173	44122	Cuyahoga
University Hospitals Ahuja Medical Center	General Hospital	144	44122	Cuyahoga
University Hospitals Bedford Medical Center Campus	General Hospital	110	44146	Cuyahoga
University Hospitals Rehabilitation Hospital	Rehabilitation	50	44122	Cuyahoga

#### **Exhibit 5: Hospitals**

Source: Ohio Hospital Association, 2016.

#### **Other Community Resources**

A wide range of agencies, coalitions, and organizations that provide health and social services is available in the region served by South Pointe. United Way 2-1-1 Ohio maintains a large, online database to help refer individuals in need to health and human services in Ohio. This is a service of the Ohio Department of Social Services and is provided in partnership with the Council of

## OTHER FACILITIES AND RESOURCES IN THE COMMUNITY

Community Services, The Planning Council, and United Way chapters in Cleveland. United Way 2-1-1 Ohio contains information on organizations and resources in the following categories:

- Donations and Volunteering
- Education, Recreation, and the Arts
- Employment and Income Support
- Family Support and Parenting
- Food, Clothing, and Household Items
- Health Care
- Housing and Utilities
- Legal Services and Financial Management
- Mental Health and Counseling
- Municipal and Community Services
- Substance Abuse and Other Addictions

Additional information about these resources is available at: http://www.211oh.org/.

## APPENDIX A – CONSULTANT QUALIFICATIONS

# **APPENDIX A – CONSULTANT QUALIFICATIONS**

Verité Healthcare Consulting, LLC (Verité) was founded in May 2006 and is located in Alexandria, Virginia. The firm serves clients throughout the United States as a resource that helps health care providers conduct Community Health Needs Assessments and develop Implementation Strategies to address significant health needs. Verité has conducted more than 50 needs assessments for hospitals, health systems, and community partnerships nationally since 2010.

The firm also helps hospitals, hospital associations, and policy makers with community benefit reporting, program infrastructure, compliance, and community benefit-related policy and guidelines development. Verité is a recognized national thought leader in community benefit and Community Health Needs Assessments.

# **APPENDIX B – SECONDARY DATA ASSESSMENT**

This section presents an assessment of secondary data regarding health needs in the South Pointe community.

# **Community Assessed**

As mentioned previously and shown in **Exhibit 1**, South Pointe's community is comprised of 13 ZIP codes in Cuyahoga and Summit counties in Ohio.

## **Demographics**

Population characteristics and changes directly influence community health needs. The total population in the South Pointe community is expected to decrease 1.1 percent from 2015 to 2020 (**Exhibit 6**).

County	City	ZIP Code	Estimated Population 2015	Projected Population 2020	Percent Change 2015- 2020
Cuyahoga	Beachwood	44122	33,661	33,514	-0.4%
Cuyahoga	Bedford	44146	29,602	29,483	-0.4%
Cuyahoga	Cleveland	44104	22,327	22,180	-0.7%
Cuyahoga	Cleveland	44105	37,633	35,694	-5.2%
Cuyahoga	Cleveland	44118	39,612	38,891	-1.8%
Cuyahoga	Cleveland	44120	35,932	34,539	-3.9%
Cuyahoga	Cleveland	44125	27,551	26,881	-2.4%
Cuyahoga	Cleveland	44128	28,303	27,539	-2.7%
Cuyahoga	Maple Heights	44137	22,566	22,236	-1.5%
Cuyahoga	Solon	44139	24,770	25,234	1.9%
Summit	Macedonia	44056	11,970	12,403	3.6%
Summit	Northfield	44067	20,775	21,266	2.4%
Summit	Twinsburg	44087	21,583	22,405	3.8%
Community To	tal		356,285	352,265	-1.1%

## Exhibit 6: Percent Change in Community Population by ZIP Code

Source: Truven Market Expert, 2015.

Between 2015 and 2020, 9 of the 13 ZIP codes in the community are projected to decrease in population size. The populations in Cleveland ZIP codes 44105 and 44120 are expected to decrease the most.

**Exhibit 7** shows the community's population for certain age and sex cohorts in 2015, with projections to 2020.

### APPENDIX B – SECONDARY DATA ASSESSMENT

Age/Sex Cohort	Estimated Population 2015	Projected Population 2020	Percent Change 2015-2020
0-17	82,527	78,021	-5.5%
Female 18-44	60,175	59,015	-1.9%
Male 18-44	54,212	55,067	1.6%
45-64	99,059	92,772	-6.3%
65+	60,312	67,390	11.7%
Community Total	356,285	352,265	-1.1%

#### Exhibit 7: Percent Change in Population by Age/Sex Cohort, 2015-2020

Source: Truven Market Expert, 2015.

The number of persons aged 65 years and older is projected to increase by 11.7 percent between 2015 and 2020. The 0-17, female 18-44, and 45-64 age groups are expected to decrease in population. The growth of older populations is likely to lead to growing need for health services, since on an overall per-capita basis, older individuals typically need and use more services than younger persons.

**Exhibit 8** illustrates the percent of the population 65 years of age and older in the community by ZIP code.

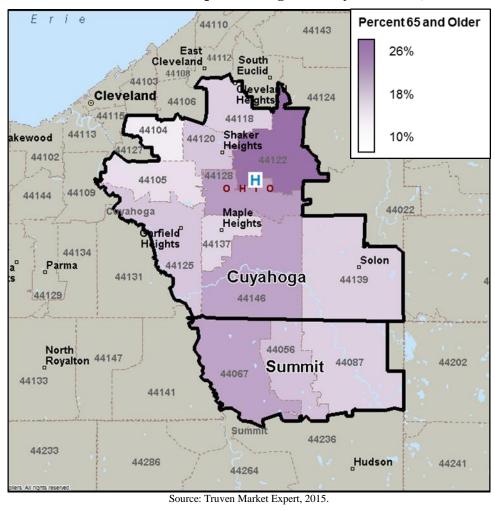

Exhibit 8: Percent of Population Aged 65+ by ZIP Code, 2015

In the community, ZIP codes 44122, 44128, 44146, and 44067 had the highest proportions of residents 65 years of age and older.

**Exhibits 9 and 10** show locations in the community where the percentages of the population that are Black and Hispanic (or Latino) were highest in 2015.

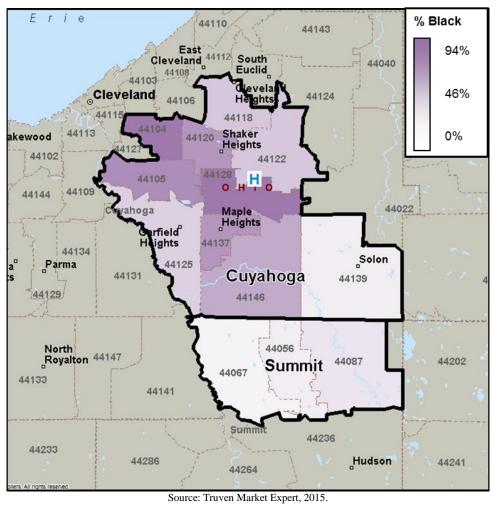

Exhibit 9: Percent of Population - Black, 2015

Over seventy percent of residents of ZIP codes 44104, 44128, 44105, 44120, and 44137 were Black. Fewer than ten percent of residents were Black in ZIP code 44067.

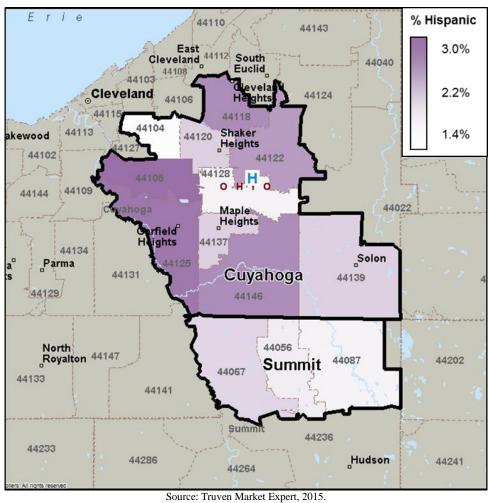

Exhibit 10: Percent of Population – Hispanic (or Latino), 2015

The percentage of residents that are Hispanic (or Latino) was highest in ZIP codes 44105 and 44125.

### APPENDIX B - SECONDARY DATA ASSESSMENT

Data regarding residents without a high school diploma, with a disability, and who are linguistically isolated are presented in **Exhibit 11** for Cuyahoga and Summit counties, Ohio, and the United States.

Measure	Cuyahoga County	Summit County	Ohio	United States
Population 25+ without High School Diploma	12.1%	9.3%	11.2%	13.6%
Population with a Disability	14.3%	12.5%	13.5%	12.3%
Population Linguistically Isolated	4.1%	2.1%	2.4%	8.6%

## Exhibit 11: Other Socioeconomic Indicators, 2014

Source: U.S. Census, ACS 5-Year Estimates, 2010-2014.

### Exhibit 11 indicates that:

- Cuyahoga County had a higher percentage of residents aged 25 years and older without a high school diploma than the Ohio average.
- Cuyahoga County had a higher percentage of the population with a disability compared to Ohio and United States averages.
- Compared to Ohio, Cuyahoga County had a higher proportion of the population that is linguistically isolated. Linguistic isolation is defined as residents who speak a language other than English and speak English less than "very well."

# **Economic indicators**

The following categories of economic indicators with implications for health were assessed: (1) people in poverty; (2) unemployment rate; (3) insurance status; and (4) crime.

#### **People in Poverty**

Many health needs have been associated with poverty. According to the U.S. Census, in 2014 approximately 15.9 percent of people in Ohio were living in poverty. Cuyahoga County's poverty rate was higher than Ohio's poverty rate during that year (**Exhibit 12**).

#### APPENDIX B - SECONDARY DATA ASSESSMENT

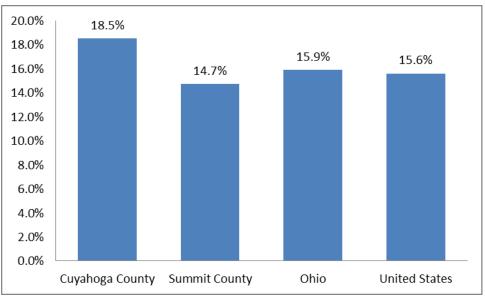

Exhibit 12: Percent of People in Poverty, 2014

Source: U.S. Census, ACS 5-Year Estimates, 2010-2014.

Considerable variation in poverty rates is present across racial and ethnic categories, in Cuyahoga County, Summit County and Ohio (**Exhibit 13**).

#### APPENDIX B – SECONDARY DATA ASSESSMENT

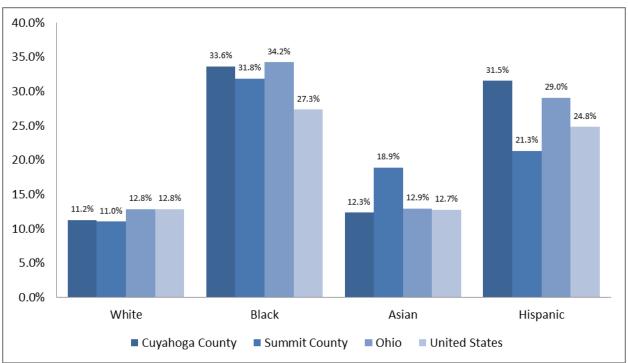

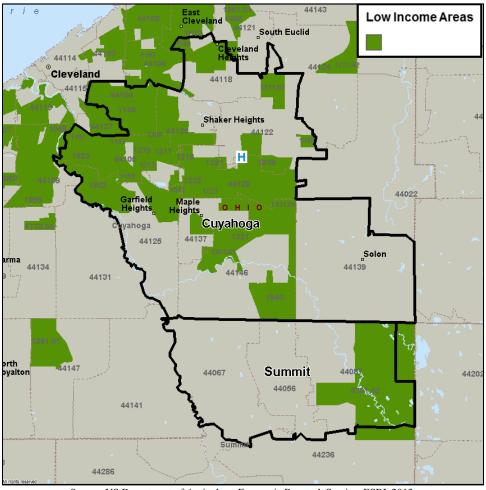

Exhibit 13: Poverty Rates by Race and Ethnicity, 2014

Poverty rates in Cuyahoga and Summit counties and Ohio have been comparatively high for Black residents. The poverty rates for Hispanic (or Latino) residents of Cuyahoga County and Asian residents of Summit County have exceeded the Ohio average.

**Exhibit 14** portrays (in green shading) the locations of low income census tracts in the community. The U.S. Department of Agriculture defines "low income census tracts" as areas where poverty rates are 20 percent or higher or where median family incomes are 80 percent or lower than within the metropolitan area.

Source: U.S. Census, ACS 5-Year Estimates, 2010-2014.

## **Exhibit 14: Low Income Census Tracts**

Source: US Department of Agriculture Economic Research Service, ESRI, 2013.

Low income census tracts have been prevalent in South Pointe's community, particularly in Cuyahoga County.

#### **Eligibility for the National School Lunch Program**

Schools participating in the National School Lunch Program are eligible to receive financial assistance from the United States Department of Agriculture (USDA) to provide free or reduced-price meals to low-income students. Schools with 40 percent or more of their student body receiving this assistance are eligible for school-wide Title I funding, designed to ensure that students meet grade-level proficiency standards.

**Exhibit 15** illustrates the locations of the schools with at least 40 percent of the students eligible for free or reduced price lunch.

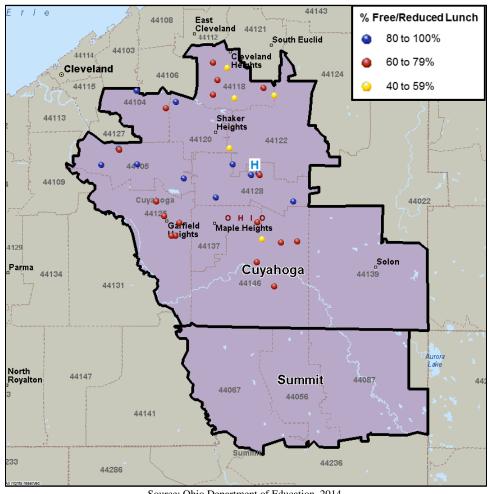

Exhibit 15: Public Schools with over 40 Percent of Students Eligible for Free or Reduced-Price Lunches, School Year 2014-2015

Source: Ohio Department of Education, 2014.

There are 34 schools within the South Pointe community where at least 40 percent of students are eligible for free or reduced price lunches.

#### Unemployment

Unemployment is problematic because many residents receive health insurance coverage through their (or a family member's) employer. If unemployment rises, access to employer based health insurance can decrease. Exhibit 16 shows unemployment rates for 2010 through 2015 for Cuyahoga and Summit counties, with Ohio and national rates for comparison.

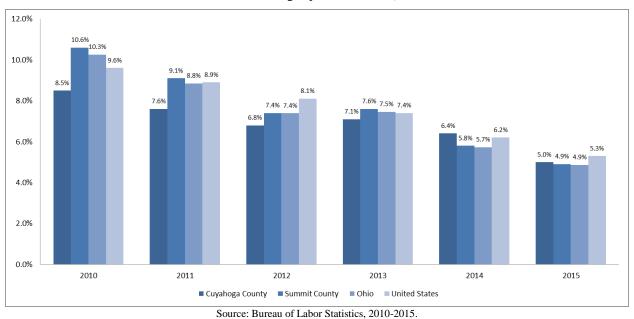

Exhibit 16: Unemployment Rates, 2010-2015

Between 2010 and 2015, unemployment rates at the local (Cuyahoga and Summit counties), state, and national level decreased significantly. In 2015, the unemployment rate in Cuyahoga County was higher than the state rate.

#### **Insurance Status**

**Exhibit 17** presents the estimated percent of populations in the Cuyahoga and Summit counties without health insurance (uninsured), by ZIP code.

County	City	ZIP Code	Households	Total Population 2015	% Uninsured 2015	Total Population 2020	% Uninsured 2020
Cuyahoga	Beachwood	44122	14,238	33,661	5.0%	33,514	3.5%
Cuyahoga	Bedford	44146	13,930	29,602	6.4%	29,483	4.3%
Cuyahoga	Cleveland	44104	9,047	22,327	14.6%	22,180	10.1%
Cuyahoga	Cleveland	44105	15,248	37,633	10.9%	35,694	7.4%
Cuyahoga	Cleveland	44118	16,085	39,612	6.6%	38,891	4.5%
Cuyahoga	Cleveland	44120	16,405	35,932	10.3%	34,539	7.0%
Cuyahoga	Cleveland	44125	11,231	27,551	6.6%	26,881	4.5%
Cuyahoga	Cleveland	44128	12,517	28,303	8.3%	27,539	5.7%
Cuyahoga	Maple Heights	44137	9,502	22,566	7.1%	22,236	4.9%
Cuyahoga	Solon	44139	8,934	24,770	2.5%	25,234	1.9%
Summit	Macedonia	44056	4,566	11,970	2.6%	12,403	1.9%
Summit	Northfield	44067	8,657	20,775	3.2%	21,266	2.2%
Summit	Twinsburg	44087	8,338	21,583	2.8%	22,405	2.0%

Exhibit 17: Percent of the Population without Health Insurance, 2015-2020

Source: Truven Market Expert, 2015.

In 2015, three out of the 13 ZIP codes in the South Pointe community had uninsured rates above ten percent. By 2020, it is projected that only one of the 13 ZIP codes in the community will have uninsured rates above ten percent, ZIP code 44104.

# **Ohio Medicaid Expansion**

Subsequent to the ACA's passage, a June 2012 Supreme Court ruling provided states with discretion regarding whether or not to expand Medicaid eligibility. Ohio was one of the states that expanded Medicaid. Medicaid expansion accounted for over 76 percent of Ohio's ACA enrollment and plans purchased through the federal healthcare.gov exchange accounted for about 24 percent.<sup>7</sup>

In Ohio, Medicaid primarily is available for low-income individuals, pregnant women, children, low-income elderly persons, and individuals with disabilities.<sup>8</sup> With a network of more than 83,000 providers, the Ohio Department of Medicaid covers over 2.9 million Ohio residents. Across the United States, uninsured rates have fallen most in states that decided to expand Medicaid.<sup>9</sup>

The recent election of the new president raises questions regarding whether access improvements associated with the Affordable Care Act will be sustained.

<sup>&</sup>lt;sup>7</sup> http://watchdog.org/237980/75percent-ohio-obamacare/

<sup>&</sup>lt;sup>8</sup> http://medicaid.ohio.gov/FOROHIOANS/WhoQualifies.aspx

<sup>&</sup>lt;sup>9</sup> See: http://hrms.urban.org/briefs/Increase-in-Medicaid-under-the-ACA-reduces-uninsurance.html

#### Crime

Exhibit 18 provides certain crime statistics for Cuyahoga and Summit counties and Ohio.

#### Exhibit 18: Crime Rates by Type and County, Per 100,000, 2013 (Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

			0
Crime	Cuyahoga County	Summit County	Ohio
Violent Crime	613.3	377.7	278.4
Property Crime	3,141.8	3,246.1	2 <i>,</i> 880.8
Murder	6.4	6.6	4.4
Rape	48.8	47.8	36.2
Robbery	362.1	124.0	129.2
Aggravated Assault	196.1	199.3	126.1
Burglary	966.2	845.2	786.5
Larceny	1,720.5	2,239.1	1,921.8
Motor Vehicle Theft	455.1	161.7	172.5
Arson	32.5	24.1	21.1
	Source: EDL	012	

Source: FBI, 2013.

2013 crime rates in Cuyahoga County were well above the Ohio average for all crimes except larceny. Crime rates in Summit County were also above the Ohio average for all crimes except robbery and motor vehicle theft.

# Local Health Status and Access Indicators

This section assesses health status and access indicators for the South Pointe community. Data sources include: (1) County Health Rankings, (2) the Centers for Disease Control's (CDC) Community Health Status Indicators, (3) the Ohio Department of Health, and (4) the CDC's Behavioral Risk Factor Surveillance System.

Throughout this section, data and cells are highlighted if indicators are unfavorable – because they exceed benchmarks (typically, Ohio averages). Where confidence interval data are available, cells are highlighted only if variances are unfavorable and statistically significant.

# **County Health Rankings**

*County Health Rankings*, a University of Wisconsin Population Health Institute initiative funded by the Robert Wood Johnson Foundation, incorporates a variety of health status indicators into a system that ranks each county/city within each state in terms of "health factors" and "health outcomes." These health factors and outcomes are composite measures based on several

variables grouped into the following categories: health behaviors, clinical care,<sup>10</sup> social and economic factors, and physical environment.<sup>11</sup> *County Health Rankings* is updated annually. *County Health Rankings 2016* relies on data from 2006 to 2015, with most data from 2010 to 2013.

**Exhibit 19** presents 2013 and 2016 rankings for each available indicator category. Rankings indicate how the county ranked in relation to all 88 counties in the Ohio, with 1 indicating the most favorable rankings and 88 the least favorable. The table also indicates if rankings fell between 2013 and 2016.

<sup>&</sup>lt;sup>10</sup> A composite measure of Access to Care, which examines the percent of the population without health insurance and ratio of population to primary care physicians, and Quality of Care, which examines the hospitalization rate for ambulatory care sensitive conditions, whether diabetic Medicare patients are receiving HbA1C screening, and percent of chronically ill Medicare enrollees in hospice care in the last 8 months of life.

<sup>&</sup>lt;sup>11</sup> A composite measure that examines Environmental Quality, which measures the number of air pollutionparticulate matter days and air pollution-ozone days, and Built Environment, which measures access to healthy foods and recreational facilities and the percent of restaurants that are fast food.

#### Exhibit 19: County Health Rankings, 2013 and 2016 (Light grey shading indicates indicator in bottom half of Ohio counties; Dark grey shading indicates in bottom quartile of Ohio counties)

Source: County Health Rankings, 2016.

In 2016, Cuyahoga County ranked in the bottom 50<sup>th</sup> percentile among Ohio counties for 17 of the 27 indicators assessed. Of those 17 indicators ranking in the bottom 50<sup>th</sup> percentile, five of them ranked in the bottom quartile, including Quality of Life, Sexually Transmitted Infections, Social and Economic Factors, Inadequate Social Support, and Severe Housing Problems. Between 2013 and 2016, rankings for 10 indictors fell in Cuyahoga County. Summit County ranked in the bottom 50<sup>th</sup> percentile among Ohio counties for 11 of the 27 indicators assessed. Of those 11 indicators ranking in the bottom 50<sup>th</sup> percentile, five of them ranked in the bottom quartile, including Sexually Transmitted Infections, Diabetic Screening, Physical Environment, Air Pollution, and Severe Housing Problems. Between 2013 and 2016, rankings for 17 indicators fell in Summit County.

**Exhibit 20** provides data for each underlying indicator of the composite categories in the County Health Rankings.<sup>12</sup> The exhibit also includes national averages.

# Exhibit 20: County Health Rankings Data Compared to Ohio and U.S. Averages, 2016

# (Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

Indicator Category	Data	Cuyahoga County	Summit County	Ohio	U.S.
	Health Outcomes				
Length of Life	Years of potential life lost before age 75 per 100,000 population	7,907.7	7,252.8	7 <i>,</i> 533.6	7,700.0
	Percent of adults reporting fair or poor health	16.5	16.5	16.0	16.0
Quality of Life	Average number of physically unhealthy days reported in past 30 days	3.9	3.8	3.8	3.7
Quality of Life	Average number of mentally unhealthy days reported in past 30 days	4.0	4.0	4.0	3.7
	Percent of live births with low birthweight (<2500 grams)	10.5	9.0	8.6	8.0
	Health Factors				
Health Behaviors					
Adult Smoking	Percent of adults that report smoking >= 100 cigarettes and currently smoking	18.3	20.1	19.2	18.0
Adult Obesity	Percent of adults that report a BMI >= 30	28.6	29.2	30.5	31.0
Food Environment Index	Index of factors that contribute to a healthy food environment, 0 (worst) to 10 (best)	6.6	6.6	6.9	7.2
Physical Inactivity	Percent of adults aged 20 and over reporting no leisure-time physical activity	25.6	24.0	26.3	28.0
Access to Exercise Opportunities	Percent of population with adequate access to locations for physical activity	95.6	95.7	83.2	62.0
Alcohol Impaired Driving Deaths	Percent of driving deaths with alcohol involvement	45.3	53.5	35.3	30.0
Excessive Drinking	Binge plus heavy drinking	18.2	16.3	17.9	17.0
STDs	Chlamydia rate per 100,000 population	792.4	441.2	460.2	287.7
Teen Births	Teen birth rate per 1,000 female population, ages 15-19	37.7	31.3	34.4	40.0
Clinical Care					
Uninsured	Percent of population under age 65 without health insurance	13.3	12.6	13.0	17.0
Primary Care Physicians	Ratio of population to primary care physicians	879:1	1002:1	1296:1	1990:1
Dentists	Ratio of population to dentists	1028:1	1715:1	1713:1	2590:1
Mental Health Providers	Ratio of population to mental health providers	402:1	529:1	642:1	1060:1
Preventable Hospital Stays	Hospitalization rate for ambulatory-care sensitive conditions per 1,000 Medicare enrollees 64		67.1	64.9	60.0
Diabetic Screening	Percent of diabetic Medicare enrollees that receive HbA1c monitoring	83.9	83.3	84.9	85.0
Mammography Screening	Percent of female Medicare enrollees, ages 67-69, that receive mammography screening	65.0	59.0	60.0	61.0

# Exhibit 20: County Health Rankings Data Compared to Ohio and U.S. Averages, 2016 (continued)

# (Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

Indicator Category	Data	Cuyahoga County	Summit County	Ohio	U.S.
	Health Factors				
Social & Economic Factors					
High School Graduation	Percent of ninth-grade cohort that graduates in four years	75.8	83.9	82.7	86.0
Some College	Percent of adults aged 25-44 years with some post-secondary education	68.4	67.1	63.4	56.0
Unemployment	Percent of population age 16+ unemployed but seeking work	6.4	5.8	5.7	6.0
Children in poverty	Percent of children under age 18 in poverty	30.0	20.3	22.7	23.0
Income Inequality	Ratio of household income at the 80th percentile to income at the 20th percentile	5.6	4.8	4.8	4.4
Children in single-parent households	Percent of children that live in a household headed by single parent	a household headed by single parent 44.9 36.2		35.4	32.0
Social Associations	Number of associations per 10,000 population	9.2	11.4	11.4	13.0
Violent Crime	Number of reported violent crime offenses per 100,000 population	559.8	405.5	307.2	199.0
Injury Deaths	Injury mortality per 100,000	59.1	58.5	62.7	74.0
Physical Environment					
Air Pollution	The average daily measure of fine particulate matter in micrograms per cubic meter (PM2.5) in a county	13.6	13.8	13.5	11.9
Severe Housing Problems	Percentage of households with at least 1 of 4 housing problems: overcrowding, high housing costs, or lack of kitchen or plumbing facilities	18.9	15.5	15.2	14.0
Drive Alone to Work	Percent of the workforce that drives alone to work	80.1	87.1	83.5	80.0
Long Commute- Drive Alone	Among workers who commute in their car alone, the percent that commute more than 30 minutes	31.9	27.2	29.4	29.0

Source: County Health Rankings, 2016

.

Exhibit 20 highlights the following comparatively unfavorable indicators:

- Years of potential life lost
- Percent of adults reporting fair or poor health
- Average number of physically unhealthy days
- Percent of live births with low birth weight
- Percent of adults that report smoking
- Food environment index
- Percent of driving deaths with alcohol involvement
- Binge and heavy drinking
- Chlamydia rate
- Teen birth rate
- Percent of the population without health insurance
- Ratio of population to dentists
- Hospitalization rate for ambulatory care sensitive conditions
- Diabetic screening
- Mammography screening
- High school graduation rate
- Percent of the population unemployed
- Percent of children in poverty
- Income inequality rate
- Percent of children living in a household headed by a single parent
- Social associations rate
- Violent crime rate
- Air pollution
- Percent of households with severe housing problems
- Percent of the workforce that drives to work alone
- Percent of workers with a long commute who drive alone

# **Community Health Status Indicators**

The Centers for Disease Control and Prevention's *Community Health Status Indicators* provide health profiles for all 3,143 counties in the United States. Counties are assessed using 44 metrics associated with health outcomes including health care access and quality, health behaviors, social factors, and the physical environment.

The *Community Health Status Indicators* allows for a comparison of a given county to other "peer counties." Peer counties are assigned based on 19 variables including population size, population growth, population density, household income, unemployment, percent children, percent elderly, and poverty rates.

**Exhibit 21** compares Cuyahoga and Summit counties to their respective peer counties and cities and highlights community health issues found to rank in the bottom quartile of the counties included in the analysis.

Category	Indicator	Cuyahoga County	Summit County
	Alzheimer's Disease Deaths		
	Cancer Deaths		
	Chronic Kidney Disease Deaths		
	Chronic Lower Respiratory Disease (CLRD) Deaths		
	Coronary Heart Disease Deaths		
Mortality	Diabetes Deaths		
	Female Life Expectancy		
	Male Life Expectancy		
	Motor Vehicle Deaths		
	Stroke Deaths		
	Unintentional Injury (including motor vehicle)		
	Adult Diabetes		
	Adult Obesity		
	Adult Overall Health Status		
	Alzheimer's Disease/Dementia		
	Cancer		
Morbidity	Gonorrhea		
Morbidity	HIV		
	Older Adult Asthma		
	Older Adult Depression		
	Preterm Births		
	Syphilis		
	Cost Barrier to Care		
Health Care Access	Older Adult Preventable Hospitalizations		
and Quality	Primary Care Provider Access		
	Uninsured		
	Adult Binge Drinking		
	Adult Female Routine Pap Tests		
Health Behaviors	Adult Physical Inactivity		
	Adult Smoking		
	Teen Births		
	Children in Single-Parent Households		
	High Housing Costs		
	Inadequate Social Support	_	
Social Factors	On Time High School Graduation		
	Poverty		
	Unemployment		
	Violent Crime		
	Access to Parks

Physical	Drinking Water Violations		
Environment	Housing Stress		
	Limited Access to Healthy Food		
	Living Near Highways		

# **Exhibit 21: Community Health Status Indicators, 2015** (Shading indicates indicator in bottom quartile compared to peer counties)

Source: Community Health Status Indicators, 2015.

The CHSI data indicate that cancer and coronary heart disease mortality and morbidity rates associated with Alzheimer's disease, gonorrhea, adult asthma, older adult depression, and preterm births are comparatively high, as are older adult preventable hospitalizations. Indicators for adult binge drinking, children in single-parent households, annual average particulate matter concentration, and living near highways also benchmark unfavorably.

#### **Ohio Department of Health**

The Ohio Department of Health maintains a data warehouse that includes county-level indicators regarding mortality rates (**Exhibits 22 and 23**), cancer incidence (**Exhibit 24**), communicable disease incidence (**Exhibit 25**), and maternal and child health indicators (**Exhibit 26**).

Exhibit 22 provides age-adjusted mortality rates for selected causes of death in 2012.

Exhibit 22: Selected Causes of Death, Age-Adjusted Rates per 100,000 Population, 2012 (Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

Measure	Cuyahoga County	Summit County	Ohio	Healthy People 2020
Heart Disease	213.9	178.4	191.4	-
Diabetes	23.3	24.5	26.1	-
Influenza and Pneumonia	12.0	19.0	15.4	-
Suicide	9.9	11.6	12.0	10.2
Motor Vehicle Collisions	3.4	5.2	9.0	12.4
Homicide	9.2	5.7	5.4	-
Motor Vehicle Collisions (Alcohol)	1.4	2.2	3.8	-
Aortic Aneurysm	3.8	3.8	3.7	-
HIV	2.7	1.3	1.3	-
Pedestrians Killed in Traffic Collisions	0.6	0.9	0.5	1.4

Source: Ohio Department of Health, 2012.

In Cuyahoga County, age-adjusted mortality rates for heart disease, homicide, aortic aneurysm, HIV, and pedestrians killed in traffic collisions were all higher than the Ohio averages. In Summit County, age-adjusted mortality rates for influenza and pneumonia, homicide, aortic aneurysm, and pedestrians killed in traffic collisions were also higher than the Ohio averages.

#### Exhibit 23: Age-Adjusted Cancer Mortality Rates per 100,000 Population, 2013 (Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

Cancer Site/Type	Cuyahoga County	Summit County	Ohio Rate	U.S. Rate
All Sites/Types	189.9	182.0	186.6	171.2
Lung and Bronchus	52.3	54.5	55.3	47.2
Breast (Female)	24.9	24.3	23.6	21.9
Prostate	27.4	23.4	22.0	21.4
Colon and Rectum	15.6	16.6	17.0	15.5
Pancreas	12.8	11.1	11.5	10.9
Ovary	7.4	7.0	7.9	7.7
Leukemia	7.0	7.1	7.3	7.0
Non-Hodgkin Lymphoma	6.4	6.7	6.9	6.2
Liver and Intrahepatic Bile Duct	6.4	4.9	5.3	6.0
Bladder	5.0	4.8	5.0	4.4
Esophagus	4.9	4.6	5.0	4.2
Uterus	6.5	4.4	4.9	4.4
Brain and Other CNS	4.0	5.0	4.5	4.3
Kidney and Renal Pelvis	4.1	3.2	4.3	3.9
Multiple Myeloma	3.7	3.5	3.5	3.3
Melanoma of Skin	2.1	3.0	3.0	2.7
Stomach	4.4	3.5	2.9	3.4
Cervix	3.0	1.9	2.6	2.3
Oral Cavity and Pharynx	3.1	2.8	2.5	2.5
Larynx	1.5	1.2	1.3	1.1
Thyroid	0.5	0.5	0.5	0.5
Hodgkin Lymphoma	0.4	0.3	0.4	0.4
Testis	0.4	-	0.3	0.3

Source: Ohio Department of Health, 2013.

Age-adjusted cancer mortality rates in Cuyahoga County were significantly higher than the Ohio averages for stomach cancer. Cancer mortality rates for breast, prostate, pancreas, uterus, liver and intrahepatic bile duct, multiple myeloma, oral cavity and pharynx, cervix, larynx, and testis cancers were also higher than the state averages. In Summit County, age-adjusted cancer mortality rates were higher than the Ohio averages for breast, prostate, brain and other CNS, stomach, and oral cavity and pharynx cancer.

Exhibit 24 presents age-adjusted cancer incidence rates in the community.

#### Exhibit 24: Age-Adjusted Cancer Incidence Rates per 100,000 Population, 2008-2012 (Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

Site/Type	Cuyahoga County	Summit County	Ohio
Total	477.9	440.8	452.5
Prostate	116.3	96.2	101.7
Breast	71.4	64.5	67.6
Lung and Bronchus	64.3	61.9	67.4
Colon and Rectum	41.0	33.6	40.6
Other Sites/Types	37.9	39.2	35.8
Uterus	35.4	28.6	28.8
Bladder	19.9	20.5	22.1
Melanoma of Skin	17.0	22.5	19.5
Non-Hodgkins Lymphoma	21.0	21.1	18.6
Kidney and Renal Pelvis	19.0	14.9	16.9
Thyroid	15.9	14.1	15.2
Pancreas	12.9	13.6	12.3
Leukemia	14.4	11.6	11.9
Oral Cavity and Pharynx	11.2	11.0	11.7
Ovary	14.5	10.3	11.3
Brain and Other CNS	7.7	7.5	7.4
Cervix	7.4	10.5	7.4
Stomach	8.4	6.6	6.8
Liver and Intrahepatic Bile Duct	8.3	6.2	6.6
Multiple Myeloma	8.3	6.2	5.9
Testis	6.3	7.0	5.2
Esophagus	5.8	5.1	5.0
Larynx	4.8	4.7	4.3
Hodgkins Lymphoma	3.1	2.3	2.6

Source: Ohio Department of Health, 2012.

The incidence rates for prostate, breast, colon and rectum, other sites/types, uterus, Non-Hodgkin's Lymphoma, kidney and renal pelvis, thyroid, pancreas, leukemia, ovary, brain and other CNS, stomach, liver and intrahepatic bile duct, multiple myeloma, testis, esophagus, larynx, and Hodgkin's Lymphoma in Cuyahoga County were higher than the Ohio averages. In Summit County, age-adjusted cancer incidence rates for other sites/types, melanoma of the skin, non-Hodgkin's lymphoma, pancreas, brain and other CNS, cervix, multiple myeloma, testis, esophagus, and larynx cancer were higher than the Ohio averages.

#### Exhibit 25: Communicable Disease Incidence Rates per 100,000 Population, 2012 (Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

Measure	Cuyahoga County	Summit County	Ohio
Chlamydia	801.1	488.4	462.0
HIV	295.8	130.2	154.3
Gonorrhea	290.3	173.3	143.5
Syphilis	9.8	4.8	9.9
Varicella	4.3	2.4	7.0
Viral Meningitis	7.2	10.5	6.1
Hepatitis A, B, and C	0.8	2.0	1.9

Source: Ohio Department of Health, 2012.

Cuyahoga County has had comparatively high incidence rates of chlamydia, HIV, gonorrhea, and viral meningitis. Summit County also had comparatively high incidence rates of chlamydia, gonorrhea, viral meningitis, and hepatitis A, B, and C.

# Exhibit 26: Maternal and Child Health Indicators, 2012

(Light grey shading indicates indicator worse than Ohio average; Dark grey shading indicates more than 50 percent worse than Ohio average)

Measure	Cuyahoga County	Summit County	Ohio	Healthy People 2020
Mortality Rate per 1,000 Live Births				
Infant	9.4	7.7	7.7	N/A
Neonatal	6.5	5.4	5.2	N/A
Post-Neonatal	2.9	2.3	2.5	N/A
% Deliveries				
Low Birth Weight	10.5	9.0	8.6	7.8
Very Low Birth Weight	2.3	1.8	1.6	1.4
% Preterm Births				
< 32 weeks of gestation	3.1	2.4	2.3	1.8
32-33 weeks of gestation	2.0	1.9	1.6	1.4
34-36 weeks of gestation	9.3	9.3	8.6	8.1
< 37 weeks of gestation	14.4	13.6	12.6	11.4
% Births to				
Unmarried Women 18-54 Years Old	49.1	40.9	41.3	N/A
Women 40-54 Years Old	2.7	2.4	2.1	N/A
Women <18 Years Old	3.7	2.9	3.0	N/A
Teenage Pregnancies per 1,000 Births				
Births to Females 15-19 Years Old	39.3	32.9	36.0	N/A

Source: Ohio Department of Health, 2012.

Exhibit 26 indicates that infant mortality rates, low birth weights, and preterm births are comparatively problematic in Cuyahoga and Summit counties.

#### Behavioral Risk Factor Surveillance System

The Centers for Disease Control and Prevention's (CDC) Behavioral Risk Factor Surveillance System (BRFSS) gathers data through a telephone survey regarding health risk behaviors, healthcare access, and preventive health measures. Data are collected for the entire United States Analysis of BRFSS data can identify localized health issues, trends, and health disparities, and can enable county, state, or nation-wide comparisons.

BRFSS data were assessed for each ZIP code in the South Pointe community and compared to the averages for the 21 counties in Northeast Ohio.<sup>13</sup>

<sup>&</sup>lt;sup>13</sup> The 21 counties include Ashland, Ashtabula, Carroll, Columbiana, Crawford, Cuyahoga, Erie, Geauga, Holmes, Huron, Lake, Lorain, Mahoning, Medina, Portage, Richland, Stark, Summit, Trumbull, Tuscarawas, and Wayne counties.

#### Exhibit 27: Behavioral Risk Factor Surveillance System, Chronic Conditions, 2015 (Light grey shading indicates indicator worse than the 21-County average; Dark grey shading indicates more than 50 percent worse than the 21-County average)

Source: Truven Market Expert/Behavioral Risk Factor Surveillance System, 2015.

Compared to the 21-County averages, the South Pointe community compared unfavorably for high blood pressure and smoking. Within the South Pointe community, 8 ZIP codes had higher rates of smoking, 7 ZIP codes had higher rates of high blood pressure, and 6 ZIP codes had higher rates of obesity.

# **Ambulatory Care Sensitive Conditions**

This section examines the frequency of discharges for Ambulatory Care Sensitive Conditions (ACSCs, frequently referred to as Prevention Quality Indicators or PQIs) throughout the community.

ACSCs are health "conditions for which good outpatient care can potentially prevent the need for hospitalization or for which early intervention can prevent complications or more severe disease."<sup>14</sup> As such, rates of hospitalization for these conditions can "provide insight into the quality of the health care system outside of the hospital," including the accessibility and utilization of primary care, preventive care and health education. Among these conditions are: diabetes, perforated appendixes, chronic obstructive pulmonary disease (COPD), hypertension, congestive heart failure, dehydration, bacterial pneumonia, urinary tract infection, and asthma.

Disproportionately high rates of discharges for ACSC indicate potential problems with the availability or accessibility of ambulatory care and preventive services and can suggest areas for improvement in the health care system and ways to improve outcomes.

**Exhibit 28** provides 2014 PQI rates (per 100,000 persons) for ZIP codes in the South Pointe community – with comparisons to Ohio averages.

<sup>&</sup>lt;sup>14</sup>Agency for Healthcare Research and Quality (AHRQ) Prevention Quality Indicators.

Note: Rates are not age-sex adjusted.

The rates of admissions for ACSC in the South Pointe community exceeded Ohio averages for all conditions except perforated appendix and bacterial pneumonia. Within the community, Cleveland ZIP code 44128 had higher PQI rates for every condition and ZIP codes 44104 and 44105 had higher PQI rates for every condition except perforated appendix, compared to the Ohio averages.

**Exhibit 29** provides the ratio of PQI rates in the South Pointe community compared to the Ohio averages. Conditions where the ratios are highest (meaning that the PQI rates in the community are the most above average) are presented first.

	South Pointe Hospital	Ohio	Ratio: South Pointe/ Ohio
Hypertension	85.8	52.6	1.6
Diabetes Long-Term Complications	187.0	118.8	1.6
Chronic Obstructive Pulmonary Disease	945.5	608.8	1.6
Adult Asthma	54.8	36.0	1.5
Diabetes Short-Term Complications	143.6	94.7	1.5
Congestive Heart Failure	617.3	423.8	1.5
Uncontrolled Diabetes	18.6	13.2	1.4
Low Birth Weight	82.7	61.4	1.3

# Exhibit 29: Ratio of PQI Rates for South Pointe and Ohio, 2014

Source: Cleveland Clinic, 2014.

Note: Rates are not age-sex adjusted.

In the South Pointe community, ACSC rates for hypertension, diabetes long-term complications, and chronic obstructive pulmonary disease were sixty percent higher than the Ohio averages.

# **Community Need Index<sup>™</sup> and Food Deserts**

# Dignity Health Community Need Index

Dignity Health, a California-based hospital system, developed and has made widely available for public use a *Community Need Index*<sup>TM</sup> that measures barriers to health care access by county/city and ZIP code. The index is based on five social and economic indicators:

- The percentage of elders, children, and single parents living in poverty;
- The percentage of adults over the age of 25 with limited English proficiency, and the percentage of the population that is non-White;
- The percentage of the population without a high school diploma;

- The percentage of uninsured and unemployed residents; and
- The percentage of the population renting houses.

The *Community Need Index*<sup>TM</sup> calculates a score for each ZIP code based on these indicators. Scores range from "Lowest Need" (1.0-1.7) to "Highest Need" (4.2-5.0).

**Exhibit 30** presents the *Community Need Index*<sup>TM</sup> (CNI) score of each ZIP code in the South Pointe community.

County	City	ZIP Code	CNI Score
Cuyahoga	Cleveland	44104	5.0
Cuyahoga	Cleveland	44105	5.0
Cuyahoga	Cleveland	44128	4.4
Cuyahoga	Cleveland	44120	4.2
Cuyahoga	Maple Heights	44137	4.0
Cuyahoga	Bedford	44146	3.6
Cuyahoga	Cleveland	44118	3.4
Cuyahoga	Cleveland	44125	3.4
Cuyahoga	Beachwood	44122	3.2
Summit	Twinsburg	44087	2.0
Summit	Northfield	44067	1.8
Cuyahoga	Solon	44139	1.8
Summit	1.6		
South Pointe C	3.5		
Cuyahoga Cour	3.4		
Summit Count	2.9		

Exhibit 30: Community Need Index<sup>TM</sup> Score by ZIP Code, 2015

Source: Dignity Health, 2015.

Exhibit 31 presents these data in a community map format.

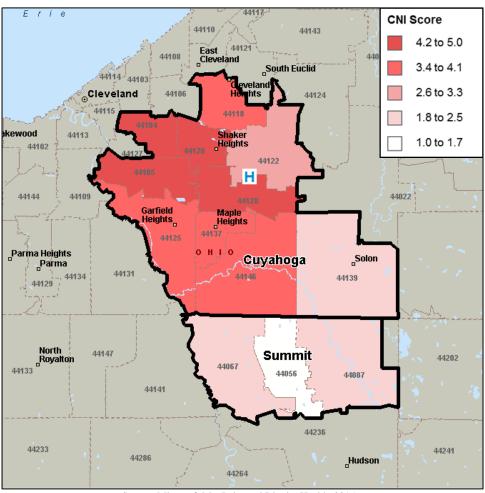

Exhibit 31: Community Need Index, 2015

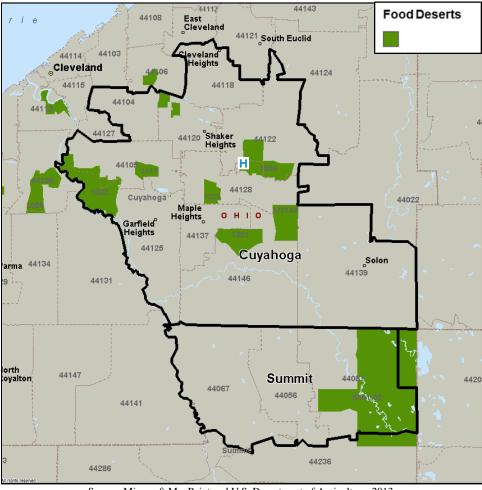

Source: Microsoft MapPoint and Dignity Health, 2015.

The CNI indicates that four of the 13 ZIP codes in the South Pointe community scored in the "highest need category." Cleveland ZIP codes 44104 and 44105 each received a score of 5.0 - the highest score possible.

# **Food Deserts**

The U.S. Department of Agriculture's Economic Research Service estimates the number of people in each census tract that live in a "food desert," defined as low-income areas more than one mile from a supermarket or large grocery store in urban areas and more than 10 miles from a supermarket or large grocery store in rural areas. Many government-led initiatives aim to increase the availability of nutritious and affordable foods to people living in these food deserts.

Exhibit 32 illustrates the location of food deserts in the community.

# **Exhibit 32: Food Deserts**

Source: Microsoft MapPoint and U.S. Department of Agriculture, 2013.

Several locations within the South Pointe community have been designated as food deserts.

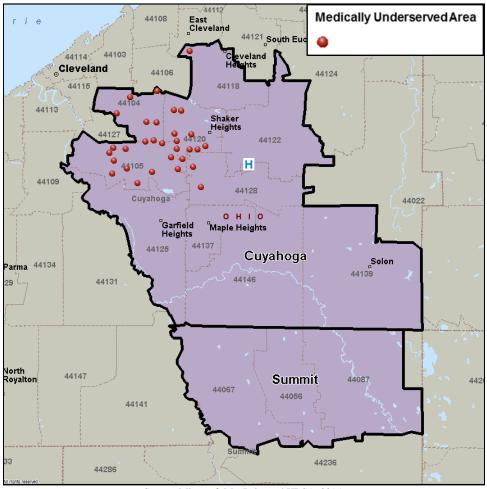

# **Medically Underserved Areas and Populations**

Medically Underserved Areas and Populations (MUA/Ps) are designated by the Health Resources and Services Administration (HRSA) based on an "Index of Medical Underservice." The index includes the following variables: ratio of primary medical care physicians per 1,000 population, infant mortality rate, percentage of the population with incomes below the poverty level, and percentage of the population age 65 or over.<sup>15</sup> Areas with a score of 62 or less are considered "medically underserved."

Populations receiving MUP designation include groups within a geographic area with economic barriers or cultural and/or linguistic access barriers to receiving primary care. If a population group does not qualify for MUP status based on the IMU score, Public Law 99-280 allows MUP designation if "unusual local conditions which are a barrier to access to or the availability of personal health services exist and are documented, and if such a designation is recommended by the chief executive officer and local officials of the state where the requested population resides."<sup>16</sup>

There are approximately 31 census tracts within the hospital's community that have been designated as areas where Medically Underserved Areas are present (**Exhibit 33**).

<sup>&</sup>lt;sup>15</sup> Heath Resources and Services Administration. See http://www.hrsa.gov/shortage/mua/index.html <sup>16</sup>Ibid.

**Exhibit 33: Medically Underserved Areas** 

Source: Microsoft MapPoint and HRSA, 2015.

# **Health Professional Shortage Areas**

A geographic area can receive a federal Health Professional Shortage Area (HPSA) designation if a shortage of primary medical care, dental care, or mental health care professionals is found to be present. In addition to areas and populations that can be designated as HPSAs, a health care facility can receive federal HPSA designation and an additional Medicare payment if it provides primary medical care services to an area or population group identified as having inadequate access to primary care, dental, or mental health services.

HPSAs can be: "(1) An urban or rural area (which need not conform to the geographic boundaries of a political subdivision and which is a rational area for the delivery of health services); (2) a population group; or (3) a public or nonprofit private medical facility."<sup>17</sup>

<sup>&</sup>lt;sup>17</sup> U.S. Health Resources and Services Administration, Bureau of Health Professionals. (n.d.). *Health Professional Shortage Area Designation Criteria*. Retrieved 2012, from http://bhpr.hrsa.gov/shortage/hpsas/designationcriteria/index.html

Exhibit 34 illustrates the locations of the federally-designated HPSAs.

------------------	---------------	---------------	---------	-------

Source: Analysis of Other CHNA Reports by Verité, 2016.

A State Health Assessment also recently was published by the Ohio Department of Health.<sup>18</sup> The State Health Assessment (SHA) is a comprehensive report directed by a steering committee comprised of directors of Ohio's health-related state agencies. The Ohio Department of Health contracted with the Health Policy Institute of Ohio to facilitate preparation of the assessment. The purpose of the SHA is both to provide a template for state agencies and local partners for analysis as well as inform the identification and prioritization of community health needs for the State Health Improvement Plan (SHIP).

**State-wide needs.** The assessment found that Ohio performed worse than the U.S. overall on most measures of population health with many opportunities to improve both physical and mental health outcomes. For example:

- The average number of days Ohio residents experienced limited activity due to mental or physical difficulties increased 17 percent between 2013 and 2014.
- Over the same period, adult asthma, child asthma, and diabetes also increased by 10 percent.
- Drug overdose deaths increased 18 percent and were significantly higher in Ohio than the United States (24.7 per 100,000 compared to 14.6).
- Infant mortality also is a significant issue in Ohio, and is particularly problematic for black and Hispanic (or Latino) infants.
- Ohio ranks particularly poorly for the number mothers who smoke during pregnancy. Only 59 percent of black mothers in Ohio receive prenatal care in the first trimester, compared to70.8 percent in the U.S. overall.
- Per-capita health spending has been higher in Ohio than in other states.
- The percentage of hospital inpatients with opiate-related diagnoses increased substantially from 2012 to 2014 (from 25.2 percent to 37.0).
- Ohio has experienced rates of avoidable emergency department visits for Medicare beneficiaries, admissions for pediatric asthma, and admissions for diabetes long-term complications that exceed United States averages.
- Access to mental health services and drug treatment services is particularly problematic, and a comparatively high percentage of Ohio residents live in areas underserved for dental care.
- Ohio has 9.9 public health agency staff per 100,000, a number substantially below the national average of 30.6.
- Infection rates for a number of communicable diseases exceed national averages, including chlamydia. The state's child immunization and HPV vaccination rates have been below average.
- Based on national comparisons, other concerns with children are also present in Ohio, including: childhood poverty rates, number of children in single-parent households, percent of children with adverse childhood experiences, and children exposed to secondhand smoke.
- There are also significant needs related to the physical environment in Ohio. The average amount of particulate matter and cases of lead poisoning are both higher in Ohio than the

<sup>&</sup>lt;sup>18</sup> Available at: http://www.healthpolicyohio.org/sha-ship/

United States. Food insecurity is higher in the state as well, and Ohio residents have less access to exercise opportunities than the country on average.

The SHA reviewed 211 local health department and hospital community health assessments that covered 94 percent of counties to evaluate what the most significant needs were. That review found ten most commonly identified significant community health needs: obesity, mental health, access to health care, drug and alcohol abuse, maternal and infant health, cancer, cardiovascular disease, diabetes, tobacco, and chronic diseases.

More than 400 stakeholders provided input into the SHA. Ten priority areas were identified based on this input: obesity, access to behavioral health care, drug and alcohol abuse, mental health, employment/poverty/income, equity and disparities, access to dental care, cardiovascular disease, and nutrition.

**Northeast Ohio.** The northeast Ohio region also had particularly significant needs identified in the SHA. Concerns about the physical environment (air pollution and lead poisoning) are particularly prevalent in northeast Ohio. Other health assessments reviewed as part of the SHA process most frequently identified the following community health needs:

- Access to health and medical care (76 percent)
- Obesity (63 percent)
- Mental health (57 percent)
- Drug and alcohol abuse (47 percent)
- Maternal and infant health (41 percent)
- Diabetes (40 percent)
- Coverage and affordability (32 percent)
- Cardiovascular disease (29 percent)
- Cancer (29 percent)
- Tobacco use (29 percent)

Stakeholders from northeast Ohio most frequently identified the following as significant community health needs: obesity, drug and alcohol abuse, mental health, access to behavioral health care, employment/ poverty /income, equity and disparities, maternal and infant health, nutrition, coverage and affordability, and diabetes.

# **APPENDIX C – COMMUNITY INPUT PARTICIPANTS**

Individuals from a wide variety of organizations and communities participated in the interview process (shown in **Exhibit 36**). Organizations listed in italics indicate that the interviewee has public health expertise.

Organization	Description	Populations Represented	
ADAMHSCC	Alcohol, drug addiction, and mental health services	Mentally ill, substance abuse	
American Heart and Stroke Association	National voluntary health agency	General population	
Bedford Heights Fire Department	Fire department	General population	
Care Alliance Health Center	Non-profit community health center	Homelessness, low-income	
City of Warrensville Heights	City government representative	General population	
Cuyahoga County Board of Health	County board of health	General population	
Cuyahoga County Office of Health and Human Services	County health office	General population	
Cuyahoga County Office of Reentry	County re-entry services program	Formally incarcerated persons	
Esperanza	Ohio's only nonprofit organization dedicated to the promotion and advancement of Hispanic educational achievement	Minority populations, youth	
Greater Cleveland NAMI	Mental health agency	Mentally ill	
Harvard Community Services Center	Social services organization	General population, youth, seniors, low- income	
Maple Heights Senior Center	Senior center	Aging population	
Montefiore	Non-profit nursing home	Aging population, disabled	
Northeast Ohio Black Health Coalition	Non-profit addressing the health needs of the black community	Minority populations	
Ohio Legislature	State government	General population	
State of Ohio	State government	General population	
Tri-C College	Community college	General population, students	
Twinsburg Public Library	Public library	General population	
Warrensville Heights Area Chamber of Commerce	Chamber of commerce	General population	
Warrensville Heights Civic and Senior Center	Senior services	Aging population	

# **Exhibit 36: Interview Participants**

\*Two individuals from Greater Cleveland NAMI participated in the interview process.

# APPENDIX D – ACTIONS TAKEN SINCE THE PREVIOUS CHNA

# **APPENDIX D – ACTIONS TAKEN SINCE THE PREVIOUS CHNA**

South Pointe Hospital uses evidence-based approaches in the delivery of healthcare services and educational outreach with the aim of achieving healthy outcomes for the community it serves. It undertakes periodic monitoring of its programs to measure and determine their effectiveness and ensure that best practices continue to be applied.

Given that the process for evaluating the impact of various services and programs on population health is longitudinal by nature, significant changes in health outcomes may not manifest for several community health needs assessment cycles. We continue to evaluate the cumulative impact.

Each identified health need and action items in our 2013 CHNA Implementation Strategy are described below with representative impacts.

1. Identified Need: Chronic Diseases and Health Conditions, Heart Related Diseases Action: South Pointe Hospital continues to offer patient care and outreach services relating to heart diseases, including hypertension, congestive heart failure and strokes. The hospital continues to provide inpatient and outpatient care through its Congestive Heart Failure Clinic and is designated by the Joint Commission as a Primary Stroke Center. In addition to its clinical activities, South Pointe Hospital continues to conduct health screenings, nutrition services, and outreach activities geared toward cardiovascular health and promotion of disease management.

#### **Highlighted Impact:**

- The Cleveland Clinic health system reduced heart failure 30 day readmission rates from 2013 through 2015.
- South Pointe Hospital provided blood pressure screenings and heart health education at community events and senior centers, reaching over 3,000 community members.
- South Pointe Hospital provided stroke awareness classes to 225 sixth and seventh graders at Warrensville Heights Middle School.

#### 2. Identified Need: Chronic Disease and Health Conditions, Adult Asthma

Action: South Pointe Hospital continues to provide acute inpatient care, outpatient care, and pulmonary rehabilitation services to patients suffering from Adult Asthma.

#### **Highlighted Impact:**

• Community Outreach program managers took American Heart and Lung Association training and hosted tobacco classes.

#### 3. Identified Need: Chronic Disease and Health Conditions, Diabetes

Action: South Pointe Hospital continues to provide patient care and outreach activities for patients suffering from diabetes and its long-term complications. In addition, the hospital continues to provide acute inpatient and outpatient clinical services, nutrition

# APPENDIX D - ACTIONS TAKEN SINCE THE PREVIOUS CHNA

services, and hosts education activates and other community events on disease management. The hospital has a Diabetes Education Center with an accredited selfmanagement program through which patients learn about meal planning, weight control, and diet modification over a three-month period.

# **Highlighted Impact:**

- South Pointe Hospital supported a Diabetes Health Fair in collaboration with YMCA in Warrensville Heights and Diabetes Partnership of Cleveland to offer education, cooking demonstrations, exercise, and screenings for over 400 community members per year.
- South Pointe Hospital sponsored community health education talks to provide glucose screenings, information, and education to 2,230 community residents from 2013 through 2015.

# 4. Identified Need: Chronic Disease and Health Conditions, Kidney Disease

**Action:** South Pointe Hospital continues to provide acute inpatient and outpatient care services, including dialysis services and nutrition services to patients suffering from kidney disease. In 2013, the hospital opened a kidney transplant evaluation clinic in conjunction with the Cleveland Clinic main campus.

# **Highlighted Impact:**

• South Pointe Hospital provided education classes and for patients and families transitioning from stage 5 chronic kidney disease treatment to dialysis.

# 5. Identified Need: Low Birth Weight

Action: South Pointe Hospital continues to provide basic family medicine and nutrition services to patients and their children. The hospital works with Hillcrest Hospital to treat pediatric patients in need of more specialized care, including care affiliated with low birth weight babies.

#### **Highlighted Impact:**

• Health education materials for community members were developed, focusing on care for the entire family, from birth to geriatrics.

#### 6. Identified Need: Access to Health Services

Action: South Pointe Hospital continues to provide medically necessary services to all patients regardless of race, color, creed, gender, country of national origin or ability to pay. South Pointe Hospital has a financial assistance policy that is among the most generous in the region and covers both hospital services and physician services provided by physicians employed by Cleveland Clinic

# **Highlighted Impact:**

• In 2015, Cleveland Clinic health system provided \$69.3 million in financial assistance to the communities served by its main campus, family health centers, and NEO Regional Hospitals.

# APPENDIX D - ACTIONS TAKEN SINCE THE PREVIOUS CHNA

South Pointe Hospital continues to work to improve its scheduling and support service model to provide consistent experience, improve metrics, and increase efficiency including providing Internet scheduling, accelerating technology implementation and scheduling training.

The hospital continues to offer transportation services to its patients residing within a five mile radius of the hospital for their outpatient appointments.

# 7. Identified Need: Research

Cleveland Clinic health system conducts clinical research activities throughout the system, including regional hospitals. In 2015, Cleveland Clinic scientists conducted more than 2,000 clinical trials and generated 54 invention disclosures, 14 new licenses, and 76 patents.

Action: Clinical trials and other clinical research activities continue to occur throughout the Cleveland Clinic health system including at the community hospitals.

# **Highlighted Impact:**

• South Pointe Hospital participated in a prostate cancer clinical trial in 2015 with 96 patients.

# 8. Identified Need: Education

Cleveland Clinic and all regional hospitals provide education of medical professions. In 2015, Cleveland Clinic trained over 1,700 residents and fellows, and provided over 1,800 student rotations in 65 allied health education programs.

Action: South Pointe Hospital continues its affiliation with the Ohio University College of Osteopathic Medicine, one of the largest osteopathic teaching hospitals in Ohio. Medical students, interns and residents from across the country are trained at South Pointe. Cleveland Clinic and Ohio University opened a medical school extension on the South Pointe Hospital campus. The goal of the extension campus is to address the growing shortage of primary care physicians in Ohio.

#### **Highlighted Impact:**

• The Ohio University Heritage College of Osteopathic Medicine on the South Pointe Campus was completed in May 2015. The college welcomed its first class of 51 students in July 2015.

## 2016 SOUTH POINTE HOSPITAL IMPLEMENTATION STRATEGY

#### I. Introduction and Purpose

This written plan is intended to satisfy the requirements set forth in Internal Revenue Code Section 501(r)(3) regarding community health needs assessments and implementation strategies. The overall purpose of the implementation strategy process is to align the hospital's limited resources, program services and activities with the findings of the community health needs assessment ("CHNA").

#### A. Description of Hospital

South Pointe Hospital, a Cleveland Clinic hospital, is a 173-bed acute care, community teaching hospital serving the healthcare needs of Cleveland's southeast suburbs since 1957. By combining the talents of highly qualified physicians, nurses and staff, South Pointe delivers a patient-centered model of care which promotes the healing of the mind, body and spirit. U.S. News & World Report recognized South Pointe as high-performing in the adult specialties of Neurology & Neurosurgery. Additional information on the hospital and its services is available at:

https://my.clevelandclinic.org/locations\_directions/Regional-Locations/southpointe-hospital.

The hospital is part of the Cleveland Clinic health system, which includes an academic medical center, multiple regional hospitals, two children's hospitals, a rehabilitation hospital, a Florida hospital and a number of other facilities and services across Northeast Ohio and Florida. Additional information about Cleveland Clinic is available at: https://my.clevelandclinic.org/.

#### B. Hospital Mission

South Pointe Hospital was formed in 1994 as a result of a merger between two hospitals, Brentwood Hospital and Meridia Suburban Hospital, to conduct health care, research and education activities, and provide health care services to people in its community. South Pointe Hospital's mission is:

# To provide better care for the sick, investigation of their problems and education of those who serve

#### **II.** Community Definition

For purposes of this report, South Pointe's community is defined as 13 ZIP codes in Cuyahoga and Summit counties in Ohio comprising over 82 percent of the hospital's inpatient volumes. This area has comparatively unfavorable health status and socioeconomic indicators, particularly for minority residents. The total population of South Pointe's community in 2015 was 356,285.

South Pointe Hospital is located within 10 miles of two other Cleveland Clinic hospitals, Hillcrest and Marymount Hospitals. Because of this proximity, a portion of South Pointe Hospital's community overlaps with those of each of the other hospitals. These three hospitals work together as a part of the Cleveland Clinic health system to serve residents in Cleveland's southeastern communities and suburbs.

#### III. How Implementation Strategy was Developed

This Implementation Strategy was developed by a team of members of senior leadership at South Pointe Hospital and Cleveland Clinic representing several departments of the organizations, including clinical administration, medical operations, nursing, finance and community relations.

Each year, senior leadership at South Pointe Hospital and Cleveland Clinic will review this Implementation Strategy to determine whether changes should be made to better address the health needs of its communities.

#### IV. Summary of the Community Health Needs Identified

Secondary data and key stakeholder interviews were reviewed to identify and analyze the needs identified by each source. The top health needs of the South Pointe Hospital community are those that are supported both by secondary data and raised by key stakeholders.

Needs are listed by category, in alphabetical order, below. See the 2016 South Pointe Hospital CHNA for more information: http://my.clevelandclinic.org/locations/south-pointe-hospital/about/community

- A. Access to Affordable Healthcare
- B. Chronic Diseases and Other Health Conditions
  - 1. Cancer
  - 2. Chemical Dependency
  - 3. Communicable Diseases
  - 4. Diabetes
  - 5. Heart Disease
  - 6. Obesity
  - 7. Poor Birth Outcomes
  - 8. Poor Mental Health Status
  - 9. Respiratory Diseases
- C. <u>Health Professions Education</u>
- D. <u>Health Professions Research</u>
- E. <u>Healthcare for the Elderly</u>
- F. <u>Wellness</u>

Economic Development and Community Conditions was also identified as a significant health need. It is further discussed below in Section VI, *Needs Hospital Will Not Address*.

#### V. Needs Hospital Will Address

#### A. Access to Affordable Healthcare

#### a. Financial Assistance

All Northeast Ohio Cleveland Clinic hospitals provide medically necessary services to all patients regardless of race, color, creed, gender, country of national origin, or ability to pay. Cleveland Clinic has a financial assistance policy that is among the most generous in the region that covers both hospital services and physician services provided by physicians employed by the Cleveland Clinic. In 2015, Cleveland Clinic and its affiliated hospitals provided \$69.3 million of free or discounted care to patients in their communities. The financial assistance policy can be found here:

http://my.clevelandclinic.org/patients/billing-insurance/financial-assistance#application-policy-other-documents-tab

Patient Financial Advocates are available at all Cleveland Clinic hospitals to meet with any patient who may be uninsured or have difficulty paying for medical care. Financial Advocates assist patients in evaluating whether they may qualify for our financial programs or other assistance, including Medicaid. Cleveland Clinic is proud to offer the services of a Medicaid eligibility representative to any patient who is potentially eligible so that the patient (and their family) can obtain portable health insurance that they can use for their medical needs. Assistance with enrollment in Medicaid is also important to help patients who do not currently have a medical home to develop a relationship with a primary care physician and better access to appropriate health care services.

#### b. Improved Access to Emergency Services

South Pointe Hospital, like all Cleveland Clinic hospitals, has implemented a split-flow model for its Emergency Department. This model shortens the time to providers, resulting in shorter overall length of stay, and places patients in areas devoted to their unique needs to improve patient satisfaction and outcomes.

#### c. Access to Care and Appointments

Cleveland Clinic provides telephone and internet access to patients seeking to make appointments for primary, specialty and diagnostic services. Representatives are available 24/7 and can assist patients in identifying the next available or closest location for an appointment at all facilities within the Cleveland Clinic health system. Cleveland Clinic also has 24 locations in Northeast Ohio for "walk in" care where no appointment is necessary. Express Care Clinics have evening and weekend hours and are located in many of our family health centers and outpatient facilities.

In an effort to improve outcomes and increase access, Cleveland Clinic and its affiliated hospitals are providing certain services in the form of "shared medical appointments" (SMAs). SMAs offer an innovative, interactive approach to healthcare that brings

patients with common needs together with one or more healthcare providers. SMAs are now offered at several Cleveland Clinic hospitals and family health centers. SMAs are particularly valuable to people dealing with chronic conditions like asthma, diabetes and hypertension. South Pointe Hospital currently provides SMAs for tobacco cessation.

#### d. Outreach on How to Access Care

Cleveland Clinic provides outreach programs to key underserved communities at our regional hospitals. Outreach personnel end educational sessions on various medical topics with a presentation designed to inform community members how to access different levels of health care and provide resources for programs to assist them. Outreach programs include information on how to connect to a medical home (i.e. a regular primary care physician) and on how to contact a Cleveland Clinic Patient Financial Advocate who can provide information on financial assistance, including Medicaid.

#### e. Transportation Assistance

Based on financial and medical need, Cleveland Clinic provides transportation on a space available basis to existing patients who are within 5 miles of the following facilities: Stephanie Tubbs Jones Health Center and Marymount, Euclid, Lutheran and South Pointe Hospitals. Space available transportation is also offered for radiation oncology treatment up to 25 miles of the Cleveland Clinic Main Campus, Hillcrest and Fairview Hospitals. On campuses where parking fees are assessed, patients who come to the emergency department receive vouchers to cover parking. Cleveland Clinic continues to evaluate methods to improve patient access to care.

#### f. Other Access Initiatives

South Pointe Hospital has instituted a process in its emergency department to ask patients whether they have a primary care provider and assist in helping those that do not establish a medical home. South Pointe also operates an Express Care Clinic in Sagamore Hills which provides care for patients 6 years and up without an appointment including evening and weekend hours.

In addition, as part of South Pointe Hospital's internal medicine and family medicine residency programs, resident physicians provide care to patients in certain high- need areas of the South Pointe community. South Pointe Hospital operates its Primary Care Clinic in Warrensville Heights, which offers well child check-ups, women's health services and routine adult general internal medicine care.

#### B. Chronic Diseases and Other Health Conditions

South Pointe Hospital provides acute inpatient care, outpatient care and preventive education to its patients, and has a specialty focus in neurology, cardiology and wound care.

In addition, South Pointe, along with all the regional Cleveland Clinic hospitals, offers Chronic Care Clinics to assist patients who have chronic conditions like heart disease and diabetes. These Chronic Care Clinics offer management and support to individuals with medical issues such as Anticoagulation management, Chronic Kidney Disease, Heart Failure, and Anemia management.

#### 1. Cancer

South Pointe Hospital's Cancer Center has been awarded accreditation with silver status by the Commission on Cancer for the American College of Surgeons. It provides medical oncology and urologic oncology services. South Pointe Hospital coordinates with other Cleveland Clinic Cancer Centers for referrals to radiation oncology services.

In collaboration with the Cleveland Clinic Taussig Cancer Institute, South Pointe Hospital provides mammograms to uninsured women in a program called Victory in Pink. Victory in Pink is a collaboration between The Word Church and Cleveland Clinic that provides women with resources and information to increase awareness about breast health. Educational programs are provided in local schools to teens on lung, breast, testicular and skin cancers, and to the community on cancers of the breast, colon, prostate and lungs.

#### 2. Chemical Dependency

Cleveland Clinic has been actively addressing rising drug abuse in our communities since 2012 when we held a day-long summit on prescription drug abuse. In 2013, we joined with the U.S. Attorney's Office and other local partners in a summit to focus on the problem of heroin addiction in our communities. A task force developed out of this summit, called the Northeast Ohio Heroin and Opioid Task Force, of which Cleveland Clinic is a founding member. This Task Force meets regularly and recently received the U.S. Attorney General's Award for Outstanding Contributions to Community Partnerships for Public Safety.

Cleveland Clinic recently formed its own internal Opiate Task Force, which is an enterprise-wide, comprehensive model focused on prevention and treatment of opioid addiction in each of the communities we serve in Northeast Ohio. The Cleveland Clinic Opiate Task Force's work is divided into four subcommittees: Education & Prevention, Health Policy & Treatment, Clinical Prescribing and Chronic Pain Treatment. Cleveland Clinic Clinic will continue to address community needs in the heroin and opioid epidemic by developing internal programs, educational modules, and treatment plans, and we will also continue to collaborate with external partners on strategies and policies that will positively impact this drug epidemic.

Cleveland Clinic's Alcohol and Drug Recovery Center (ADRC) based at Lutheran Hospital, offers high quality evaluation and treatment for people with alcohol and/or drug dependency problems. Since 2012, the ADRC has offered inpatient care, outpatient services and supportive step-down care to Lutheran Hospital and other Cleveland Clinic hospital communities.

South Pointe Hospital plans to develop a map of available community resources for patients within 10 miles of its primary service area, and intends to further collaborate

with organizations having positive measurable outcomes in mental health and chemical dependency.

South Pointe Hospital outreach staff provides an educational program to local community members on the heroin/opiate crisis entitled *Triple Threat: Heroin, Fentanyl and Carfentanil.* 

#### 3. Communicable Diseases

Cleveland Clinic health system patients, including those in the South Pointe community, have access to primary care or women's health physicians to assist in prevention and treatment of communicable diseases, including sexually transmitted diseases. South Pointe Hospital provides space on its campus to the Cuyahoga County Board of Health to operate its east side Family Planning Services clinic. This clinic provides information on prevention and offers treatment services for sexually transmitted infections and diseases.

South Pointe Hospital plans to collaborate with Cleveland Clinic Children's Hospital's Pediatric Institute to improve childhood vaccination rates and community awareness of the importance of vaccines for childhood illnesses.

#### 4. Diabetes

Cleveland Clinic's Endocrinology & Metabolism Institute is committed to providing the highest quality healthcare for patients with diabetes, endocrine and metabolic disorders, and obesity. South Pointe Hospital treats acute diabetic conditions on an inpatient basis. South Pointe has a Wound Care Clinic that offers chronic wound care management in an outpatient setting, including care to those suffering from diabetic ulcers and other diabetic complications. The South Pointe Diabetes Education Center is staffed by registered dietitians, who are certified diabetes educators, and provides one-on-one teaching of meal planning, diet modification and weight control. The Diabetes Center also offers diabetes support groups on a quarterly basis and hosts an annual Diabetes Fair for the community in the fall. Education is provided to community members and to local schools through an outreach program called *Diabetes 101*.

#### 5. Heart Disease

South Pointe Hospital's Cardiovascular Program features physicians who work closely with nurses and allied health professionals who are trained in critical care and advanced cardiac life support. Educational programs are offered to the community on a variety of heart related topics, including forums on heart disease, a *Block Watch for Wellness* program and seminar on *Hypertension 101*. Local schools have access to Cleveland Clinic's program on how to respond to a potential stroke, called *Stroke 101*.

#### 6. Obesity

South Pointe Hospital provides Healthy Community Initiatives and fitness challenges in local neighborhoods, including Bedford and the Harvard/Lee neighborhood of Cleveland.

#### 7. Poor Birth Outcomes

Cleveland Clinic has created an Infant Mortality Task Force with the goal of impacting the rate of infant mortality in our communities. Cleveland Clinic will expand its educational programming and will work to strengthen and foster collaborative opportunities with other organizations in an effort to improve birth outcomes.

Cleveland Clinic providers (at both its affiliated hospitals and family health centers) will focus on prenatal screening efforts with their patients and on the management of patients at risk for preterm birth, substance abuse, and post-partum depression. In addition, Cleveland Clinic will continue to develop our Centering Pregnancy program offerings (SMAs). Cleveland Clinic's hospital birthing centers will implement safe sleep screening.

Our community educational efforts will be focused on school-based sexuality and reproductive health for teens, and on the importance of breastfeeding for the first 6 months and safe sleep for new parents. The Cleveland Clinic's outreach teams also will host Community Baby Showers in high need neighborhoods to introduce resources and programs available to high-risk patients and families.

South Pointe Hospital works collaboratively with Hillcrest Hospital, the closest Cleveland Clinic health system hospital that provides the full spectrum of birthing services.

#### 8. Poor Mental Health Status

South Pointe Hospital collaborates with other Cleveland Clinic hospitals to provide its patients with comprehensive behavioral health services and programs. Euclid Hospital operates the Center for Behavioral Health which operates a geriatric inpatient behavioral health unit and offers psychiatric evaluation and management. Marymount Hospital and Lutheran Hospital are area leaders in adult behavioral health. Marymount Hospital provides a wide range of services to meet patient needs, including inpatient and limited outpatient adult psychiatry, inpatient consult service and Intensive Outpatient Programs for individual and group counseling. Lutheran operates an Adult Behavioral Medicine Center including a Mood Disorder clinic, a special geriatric psychiatry unit, and offers acute behavioral health services. Treatment is provided to adult patients ages 18 or older 24/7. Fairview Hospital serves pediatric patients and their families with behavioral medicine needs through the Fairview Hospital Child and Adolescent psychiatry unit offering an intensive outpatient program for adolescent patients.

South Pointe Hospital plans to develop a map of other available community mental health resources for patients within 10 miles of its primary service area and further collaborate with those organizations having positive measurable outcomes in mental health.

#### 9. Respiratory Diseases

South Pointe Hospital provides acute inpatient care, outpatient care and preventive education to patients with COPD and Adult Asthma. Community health education programs are offered to the community on COPD, asthma and tobacco cessation.

#### C. Health Professions Education

Cleveland Clinic operates one of the largest graduate medical education programs in the Midwest and one of the largest programs in the country. Cleveland Clinic sponsors a wide range of high quality medical education training through its Education Institute including accredited training programs for nurses and allied health professionals. Cleveland Clinic Education Institute oversees 247 residency and fellowship programs across the Cleveland Clinic health system.

South Pointe Hospital is a teaching hospital affiliated with Ohio University Heritage College of Osteopathic Medicine (OUHCOM) and the Center for Osteopathic Research and Education. South Pointe Hospital Graduate Medical Education residency programs are all approved by the American Osteopathic Association. Our sponsoring institution is the Cleveland Clinic. We conduct several residency-training programs including family medicine, internal medicine, emergency medicine, general surgery and orthopedic surgery.

South Pointe Hospital supports increasing the diversity of health care professionals in training by supporting the OUHCOM Aspiring Doctors Program and providing mentors for students in the Physician Diversity Program.

South Pointe Hospital provides nursing clinical rotations to students in collaboration with several area nursing colleges. In addition, it provides allied health internships including those for physician assistants, anesthesiology assistants, and physical therapists.

#### D. Health Professions Research

Clinical trials and other clinical research activities occur throughout the Cleveland Clinic health system including the regional hospitals. For example, South Pointe Hospital participates in clinical trials in heart disease, breast cancer and prostate cancer. South Pointe Hospital is also involved in research that impacts public health including on appropriate cancer screening education techniques.

#### E. <u>Healthcare for the Elderly</u>

Cleveland Clinic joined the Medicare Shared Savings Program in 2015 to form an Accountable Care Organization (ACO) which serves a population of over 70,000 Medicare fee-for-service beneficiaries in Northeast Ohio. The Cleveland Clinic Medicare ACO includes all Cleveland Clinic hospitals and employed physicians, as well as independent physicians in our Quality Alliance network. In an ACO model, physicians, hospitals, and other health care providers come together to give coordinated high quality, cost-effective care to the Medicare patients they serve. Coordinated care helps ensure that patients, especially the chronically ill, get the right care at the right time, with the goal of avoiding unnecessary duplication of services and preventing medical errors. Cleveland Clinic's Center for Geriatric Medicine assists elderly patients and their primary care physicians in the unique medical needs of aging patients. Geriatric services are designed to help preserve independence, maintain quality of life, and coordinate care among a multidisciplinary team of doctors, nurses, therapists, technicians, social workers and other medical professionals to improve outcomes for older patients. Geriatric evaluations and consults are available at various locations in the Cleveland Clinic health system.

Cleveland Clinic's Center for Connected Care provides clinical programs designed to help patients with their post-hospital needs, including home care, hospice, mobile primary care physician services, home infusion pharmacy, and home respiratory therapy. These services are often particularly important for elderly patients. The Center for Connected Care provides a unique program called Medical Care at Home in which primary care doctors are available to provide visits at home. Such services are particularly helpful to elderly patients, those with mobility issues, those with complex health conditions, and those recently discharged from a hospital, skilled nursing facility or rehabilitation facility.

South Pointe Hospital is a Nurse Improving Care for Health system Elders (NICHE) certified Geriatric behavioral health center. NICHE hospitals follow nursing care models that recognize the specialized needs for older adult patients, emphasizing patient and family-centered care.

F. Wellness

South Pointe Hospital offers outreach programs and community health talks focused on educating the community on healthy behavior choices including exercise, healthcare navigation, stress management, nutrition, and smoking cessation to promote health and wellness, increase access to healthcare resources, and reduce disease burden.

In addition, South Pointe Hospital collaborates with community partners to provide the annual Best Foot Forward 5k Wellness Walk in Warrensville Heights. South Pointe Hospital community outreach staff offers *Come Learn With Us* programs on a variety of health topics to community members.

#### VI. Needs Hospital Will Not Address

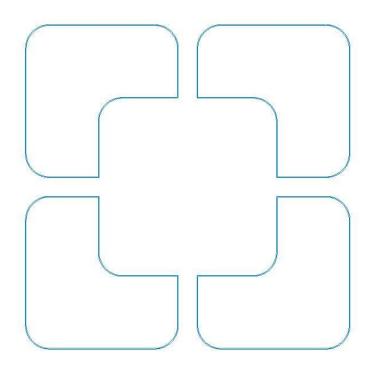

South Pointe Hospital cannot directly address those community health needs that do not relate directly to the Hospital's mission to deliver health care. These are needs that other governmental and/or nonprofit organizations have the more appropriate expertise and resources to address. Although South Pointe Hospital cannot address these needs directly, it does support governmental and other agencies in their efforts to help with these needs.

South Pointe Hospital cannot directly address the following community health need identified in the Community Health Needs Assessment:

#### Economic Development and Community Conditions

The need for economic development and improved community conditions, including better employment opportunities and lower crime rates, was identified as a need in the CHNA. Several areas within the South Pointe community lack adequate social services and experience high rates of poverty, unemployment, crime, and adverse environmental conditions.

South Pointe Hospital cannot focus on or otherwise address the need for community services unrelated to the delivery of health care. Although South Pointe Hospital is not directly involved with developing community infrastructure and improving the economy because its mission relates to delivery of quality healthcare, it does and will continue to support local chambers of commerce and community development organizations, collaborate with leaders of regional economic improvement and provide in-kind donation of time, skill and /or sponsorships to support efforts in these areas.
