Report of Independent Auditors

The Board of Directors
The Cleveland Clinic Foundation

Opinion

We have audited the consolidated financial statements of The Cleveland Clinic Foundation and controlled affiliates, d.b.a. Cleveland Clinic Health System (the System), which comprise the consolidated balance sheets as of December 31, 2021 and 2020, and the related consolidated statements of operations and changes in net assets, and cash flows for the years then ended, and the related notes (collectively referred to as the financial statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the System at December 31, 2021 and 2020, and the results of its operations, changes in its net assets and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the System and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the System's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the System's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the System's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements

December 31, 2021 and 2020

1. Organization and Consolidation

The Cleveland Clinic Foundation (Clinic) is a nonprofit, tax-exempt, Ohio corporation organized and operated to provide medical and hospital care, medical research, and education. The accompanying consolidated financial statements include the accounts of the Clinic and its controlled affiliates, d.b.a. Cleveland Clinic Health System (System).

The System is the leading provider of healthcare services in northeast Ohio. As of December 31, 2021, the System operates 19 hospitals with approximately 5,100 staffed beds. Fourteen of the hospitals are operated in the northeast Ohio area, anchored by the Clinic. The System operates 21 outpatient Family Health Centers and 11 ambulatory surgery centers, as well as numerous physician offices, which are located throughout northeast Ohio, and specialized cancer centers in Sandusky and Mansfield, Ohio. In Florida, the System operates five hospitals and a clinic located throughout southeast Florida, outpatient family health centers in West Palm Beach and Port St. Lucie, an outpatient family health and ambulatory surgery center in Coral Springs, and numerous physician offices located throughout southeast Florida. In addition, the System operates a health and wellness center and a sports medicine clinic in Toronto, Canada, and a specialized neurological clinical center in Las Vegas, Nevada. Pursuant to agreements, the System also provides management services for Ashtabula County Medical Center, located in Ashtabula, Ohio, with approximately 120 staffed beds, and Cleveland Clinic Abu Dhabi, a multispecialty hospital offering critical and acute care services that is part of Mubadala Development Company's network of healthcare facilities located in Abu Dhabi, United Arab Emirates, with 364 staffed beds.

In February 2021, the Clinic became the sole member of Mercy Medical Center (Mercy) pursuant to the terms of a member substitution agreement with The Sisters of Charity of St. Augustine Health System, the prior sole member of Mercy. Mercy is a 337-staffed bed hospital serving Stark, Carroll, Wayne, Holmes and Tuscarawas counties and parts of southeastern Ohio.

All significant intercompany balances and transactions have been eliminated in consolidation.

Notes to Consolidated Financial Statements (continued)

2. Business Combinations

Effective February 1, 2021, the Clinic became the sole member of Mercy pursuant to the terms of a member substitution agreement with The Sisters of Charity of St. Augustine Health System, the prior sole member of Mercy. The business combination was recorded under the acquisition method of accounting. The System recorded the fair value of the assets acquired of \$189.6 million and liabilities assumed of \$92.4 million as of February 1, 2021. Total consideration provided to the Sisters of Charity of St. Augustine Health System was \$97.2 million, which included assumed indebtedness that was repaid in connection with the acquisition.

The fair value of Mercy's net assets as of February 1, 2021, by major type, is as follows (in thousands):

Net working capital	\$	45,057
Investments		3,056
Property and equipment, net		84,913
Other assets		9,013
Noncurrent liabilities assumed		(44,886)
Fair value of net assets		97,153

The results of operations for Mercy are included in the consolidated statement of operations and changes in net assets beginning on February 1, 2021. For the eleven months ended December 31, 2021, Mercy had total unrestricted revenues of \$357.6 million, an operating loss of \$1.6 million and a deficiency of revenues over expenses of \$1.1 million. Additionally, for the eleven months ended December 31, 2021, Mercy recognized a decrease in net assets without donor restrictions of \$1.4 million, including a deficiency of revenues over expenses of \$1.1 million, and an increase in net assets with donor restrictions of \$0.2 million.

Pro forma results of operations and changes in net assets of Mercy for the years ended December 31, 2021 and 2020, as though the business combination transaction had occurred on January 1, 2020, are not material and, accordingly, are not provided.

Recent Accounting Pronouncements

Adopted

In August 2018, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2018-14, *Compensation – Retirement Benefits – Defined Benefit Plans – General (Subtopic 715-20): Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans*. This ASU intends to improve the effectiveness of disclosures in the notes to financial statements by modifying disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. The System adopted ASU 2018-14 in 2021. The adoption of ASU 2018-14 did not materially impact the consolidated financial statements.

In August 2018, the FASB issued ASU 2018-15, *Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40): Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract*. This ASU aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. Amortization of capitalized implementation costs is required to be presented in the same line item in the statement of operations as the expense for fees associated with the hosting arrangement. The System adopted ASU 2018-15 on January 1, 2021, using a prospective transition method. See cloud computing accounting policies note.

Not Yet Adopted

In September 2020, the FASB issued ASU 2020-07, *Not-for-Profit Entities (Topic 958): Presentation and Disclosures by Not-for-Profit Entities for Contributed Nonfinancial Assets*. This ASU changes the presentation and disclosure requirements for not-for-profit entities to increase transparency about contributed nonfinancial assets. The ASU is effective for annual periods beginning after June 15, 2021, and interim periods within annual periods beginning after June 15, 2022, with early adoption permitted. The System is currently assessing the impact that ASU 2020-07 will have on its consolidated financial statements and will adopt the provisions upon the effective date.

3. Accounting Policies (continued)

Use of Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Estimates also affect the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Net Patient Service Revenue and Patient Receivables

Net patient service revenue is reported at the amount that reflects the consideration to which the System expects to be entitled for providing patient care. These amounts are due from patients, third-party payors, and others and include variable consideration for retroactive revenue adjustments due to settlement of reviews and audits. Generally, the System bills the patients and third-party payors several days after the services are performed or shortly after discharge. Revenue is recognized as performance obligations are satisfied.

Performance obligations are determined based on the nature of the services provided by the System. Revenue for performance obligations satisfied over time is recognized based on actual charges incurred in relation to total expected or actual charges. The System believes that this method provides a reasonable depiction of the transfer of services over the term of the performance obligation based on the inputs needed to satisfy the obligation. Generally, performance obligations satisfied over time relate to patients receiving inpatient acute care services. The System measures the performance obligation from admission into the hospital to the point when it is no longer required to provide services to that patient, which is generally at the time of discharge. These services are considered to be a single performance obligation. Revenue for performance obligations satisfied at a point in time is recognized when services are provided and the System does not believe it is required to provide additional services to the patient.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

3. Accounting Policies (continued)

Because all of its performance obligations relate to contracts with a duration of less than one year, the System has elected to apply the optional exemption provided in FASB Accounting Standards Codification (ASC) 606-10-50-14(a) and, therefore, is not required to disclose the aggregate amount of the transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied at the end of the reporting period. The unsatisfied or partially unsatisfied performance obligations referred to above are primarily related to inpatient acute care services at the end of the reporting period. The performance obligations for these contracts are generally completed when the patients are discharged, which generally occurs within days or weeks of the end of the reporting period.

The System is utilizing the portfolio approach practical expedient in ASC 606 for contracts related to net patient service revenue. The System accounts for the contracts within each portfolio as a collective group, rather than individual contracts, based on the payment pattern expected in each portfolio category and the similar nature and characteristics of the patients within each portfolio. The portfolios consist of major payor classes for inpatient revenue and outpatient revenue. Based on historical collection trends and other analyses, the System has concluded that revenue for a given portfolio would not be materially different from accounting for revenue on a contract-by-contract basis.

The System has agreements with third-party payors that generally provide for payments to the System at amounts different from its established rates. For uninsured patients who do not qualify for charity care, the System recognizes revenue based on established rates, subject to certain discounts and implicit price concessions as determined by the System. The System determines the transaction price based on standard charges for services provided, reduced by explicit price concessions provided to third-party payors, discounts provided to uninsured patients in accordance with the System's policy, and implicit price concessions provided to uninsured patients. Explicit price concessions are based on contractual agreements, discount policies and historical experience. Implicit price concessions represent differences between amounts billed and the estimated consideration the System expects to receive from patients, which are determined based on historical collection experience, current market conditions and other factors.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

3. Accounting Policies (continued)

Generally, patients who are covered by third-party payors are responsible for patient responsibility balances, including deductibles and coinsurance, which vary in amount. The System estimates the transaction price for patients with deductibles and coinsurance based on historical experience and current market conditions. The initial estimate of the transaction price is determined by reducing the standard charge by any explicit price concessions, discounts, and implicit price concessions. Subsequent changes to the estimate of the transaction price are generally recorded as adjustments to patient service revenue in the period of the change. Adjustments arising from a change in the transaction price increased net patient service revenue by \$92.9 million in 2021. Adjustments arising from a change in the transaction price were not significant in 2020.

The System is paid a prospectively determined rate for the majority of inpatient acute care and outpatient, skilled nursing, and rehabilitation services provided (principally Medicare, Medicaid, and certain insurers). These rates vary according to a patient classification system that is based on clinical, diagnostic, and other factors. Payments for capital are received on a prospective basis for Medicare and Medicaid. Payments are received on a prospective basis for the System's medical education costs, subject to certain limits. The System is paid for cost reimbursable items at a tentative rate, with final settlement determined after submission of annual cost reports by the System and audits thereof by the Medicare Administrative Contractor.

Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation as well as significant regulatory action, and, in the normal course of business, the System is subject to contractual reviews and audits, including audits initiated by the Medicare Recovery Audit Contractor program. As a result, there is at least a reasonable possibility that recorded estimates will change in the near term. The System believes it is in compliance with applicable laws and regulations governing the Medicare and Medicaid programs and that adequate provisions have been made for any adjustments that may result from final settlements.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

3. Accounting Policies (continued)

Settlements with third-party payors for retroactive adjustments due to reviews and audits are considered variable consideration and are included in the determination of the estimated transaction price for providing patient care in the period the related services are provided. These settlements are estimated based on the terms of the payment agreement with the payor, correspondence from the payor, and the System's historical settlement activity, including an assessment to ensure that it is probable that a significant reversal in the amount of cumulative revenue recognized will not occur when the uncertainty associated with the retroactive adjustment is subsequently resolved. Estimated settlements are adjusted in future periods as adjustments become known or as years are settled or are no longer subject to such reviews and audits. Adjustments arising from a change in estimated settlements were not significant in 2021 or 2020.

Charity Care

The System provides care to patients who do not have the ability to pay and who qualify for charity care pursuant to established policies of the System. Charity care is defined as services for which patients have the obligation to pay but do not have the ability to do so. The System does not report charity care as net patient service revenue. The cost of charity care provided in 2021 and 2020 approximated \$185 million and \$173 million, respectively. The System estimated these costs by calculating a ratio of cost to gross charges and then multiplying that ratio by the gross uncompensated charges associated with providing care to charity patients.

The System participates in the Hospital Care Assurance Program (HCAP). Ohio created HCAP to financially support those hospitals that serve a disproportionate share of low-income patients unable to pay for care. HCAP funds basic, medically necessary hospital services for patients whose family income is at or below the federal poverty level, which includes Medicaid patients and patients without health insurance. The System recorded HCAP expenses of \$14.8 million and revenues of \$13.8 million for the years ended December 31, 2021 and 2020, respectively, which are reported in net patient service revenue.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

3. Accounting Policies (continued)**Management Service Agreements**

The System has management service agreements with regional, national and international organizations to provide advisory services for various healthcare ventures. The scope of these services range from managing current healthcare operations that are designed to improve clinical quality, innovation, patient care, medical education and research at other healthcare organizations and educational institutions to managing the construction, training, organizational infrastructure, and operational management of healthcare entities. The System recognizes revenues related to management service agreements on a pro rata basis over the term of the agreements as services are provided. Payments received in advance are recorded as deferred revenue until the services have been provided. Revenue related to management service agreements for 2021 and 2020 was \$118.1 million and \$116.2 million, respectively, and is included in other unrestricted revenues.

Cash and Cash Equivalents

The System considers all highly liquid investments with original maturities of three months or less when purchased to be cash equivalents. Cash equivalents are recorded at fair value in the consolidated balance sheets and exclude amounts held for long-term investment purposes and amounts included in long-term investment portfolios as those amounts are commingled with long-term investments.

The reconciliation of cash, cash equivalents, and restricted cash within the consolidated balance sheets that comprise the amount reported on the consolidated statements of cash flows at December 31, 2021 and 2020 is as follows (in thousands):

	<u>2021</u>	<u>2020</u>
Cash and cash equivalents	\$ 667,500	\$ 1,045,393
Investments for current use	104,813	122,669
Restricted cash in investments	10,118	5,073
Total cash, cash equivalents, and restricted cash	<u>\$ 782,431</u>	<u>\$ 1,173,135</u>

Investments for current use include restricted cash deposits with the trustee to fund current principal and interest payments on debt. Restricted cash in investments includes amounts held by the System's captive insurance subsidiary and restricted cash for various programs.

3. Accounting Policies (continued)

Inventories

Inventories (primarily supplies and pharmaceuticals) are stated at an average cost or the lower of cost (first-in, first-out method) or market and are recorded in other current assets.

Property, Plant, and Equipment

Property, plant, and equipment purchased by the System are recorded at cost. Donated property, plant, and equipment are recorded at fair value at the date of donation. Expenditures that substantially increase the useful lives of existing assets are capitalized. Routine maintenance and repairs are expensed as incurred. Depreciation, including amortization of finance leased assets, is computed by the straight-line method using the estimated useful lives of individual assets. Buildings are assigned useful lives ranging from five years to forty years. Equipment is assigned a useful life ranging from three to twenty years. Interest cost incurred on borrowed funds during the period of construction of capital assets and interest income on unexpended project funds are capitalized as a component of the cost of acquiring those assets. The System records costs and legal obligations associated with long-lived asset retirements. Assets acquired through finance lease arrangements are excluded from the consolidated statements of cash flows.

Cloud Computing Arrangements

The System has entered into hosting arrangements that are service contracts for various cloud computing arrangements. The System capitalizes implementation costs associated with these arrangements and amortizes the asset on a straight-line basis over the term of the hosting arrangement, including expected renewal periods. As of December 31, 2021, the System has \$72.8 million of unamortized capitalized implementation costs, which are recorded in other noncurrent assets in the consolidated balance sheets. For the year ended December 31, 2021, the System recorded \$7.1 million of amortization expense in purchased services and other fees in the consolidated statements of operations and changes in net assets.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

3. Accounting Policies (continued)

Impairment of Long-Lived Assets

The System evaluates the recoverability of long-lived assets and the related estimated remaining lives when indicators of impairment are present. For purposes of impairment analysis, assets are grouped with other assets and liabilities at the lowest level for which identifiable cash flows are largely independent of the cash flows of other assets and liabilities. The System records an impairment charge or changes the useful life if events or changes in circumstances indicate that the carrying amount may not be recoverable or the useful life has changed.

Leases

The System determines if an arrangement is a lease at the inception of a contract. Leases with an initial term of twelve months or less are not recorded on the consolidated balance sheets. The System has lease agreements that require payments for lease and non-lease components and has elected to account for these as a single lease component.

Right-of-use assets represent the System's right to use an underlying asset during the lease term, and lease liabilities represent the System's obligation to make lease payments arising from the lease. Right-of-use assets and liabilities are recognized at the commencement date, based on the net present value of fixed lease payments over the lease term. The System's lease terms include options to extend or terminate the lease when it is reasonably certain that the options will be exercised.

The System determines the present value of future lease payments using the rate implicit in the lease or, if that rate cannot be readily determined, its incremental borrowing rate at the lease commencement date. As most of the System's operating leases do not provide an implicit rate, the System generally uses its incremental borrowing rate based on the information available at the commencement date in determining the present value of lease payments. The System considers recent debt issuances, as well as publicly available data for instruments with similar characteristics, when calculating its incremental borrowing rate.

Operating fixed lease expense and finance lease depreciation expense are recognized on a straight-line basis over the lease term. Variable lease costs consist primarily of common area maintenance and are not significant to total lease expense.

Investments and Investment Income

Investments in equity securities with readily determinable fair values and all investments in debt securities are recorded at fair value in the consolidated balance sheets. Investments, excluding alternative investments, are primarily classified as trading. Investment transactions are recorded on a settlement date basis. Realized gains and losses are determined using the average cost method.

Commingled investment funds are valued using, as a practical expedient, the net asset value as provided by the respective investment companies and partnerships. There are no significant redemption restrictions on the commingled investment funds.

Investments in alternative investments, which include hedge funds and private equity/venture funds, are primarily limited partnerships that invest in marketable securities, privately held securities, real estate, and derivative products and are reported based on the net asset value of the investment. Investments held by the partnerships consist of marketable securities, as well as securities that do not have readily determinable values. The values of the securities held by the limited partnerships that do not have readily determinable values are determined by the general partner and are based on historical cost, appraisals, or other valuation estimates that require varying degrees of judgment. There is inherent uncertainty in such valuations, and the estimated fair values may differ from the values that would have been used had a ready market for the securities existed. Generally, the investment balance of the System's holdings in alternative investments reflects net contributions to the partnerships and the System's share of realized and unrealized investment income and expenses. The investments may individually expose the System to securities lending, short sales, and trading in futures and forward contract options and other derivative products. The System's risk is limited to its carrying value. The financial statements of the limited partnerships are audited annually.

Alternative investments can be divested only at specified times in accordance with terms of the partnership agreements. Hedge fund redemptions typically contain restrictions that allow for a portion of the withdrawal proceeds to be held back from distribution, while the underlying investments are liquidated. These redemptions are subject to lock-up provisions that are generally imposed upon initial investment in the fund. Private equity/venture funds are generally closed-end funds and have significant redemption restrictions that prohibit redemptions during the fund's life.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

3. Accounting Policies (continued)

Investment return, including income on alternative investments, is reported as nonoperating gains and losses, except for interest and dividends earned on assets held for self-insurance, which are included in other unrestricted revenues. Donor-restricted investment return on restricted investments is included in net assets with donor restrictions.

Certain of the System's assets and liabilities are exposed to various risks, such as interest rate, market, and credit risks.

Fair Value Measurements

Fair value measurements are defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

Authoritative guidance provides an option to elect fair value as an alternative measurement for selected financial assets and liabilities not previously recorded at fair value. The System did not elect fair value accounting for any assets or liabilities that are not currently required to be measured at fair value.

The framework for measuring fair value is comprised of a three-level hierarchy based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

- Level 1 – Inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2 – Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.
- Level 3 – Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Goodwill and Other Intangibles

Goodwill has resulted from business combinations, primarily physician practice acquisitions, and is based on the purchase price in excess of the fair values of assets acquired and liabilities assumed at the acquisition date. Annually, or when indicators of impairment exist, the System evaluates goodwill for impairment to determine whether there are events or circumstances that indicate it is more likely than not that the fair value of a reporting unit is less than its carrying amount.

Intangible assets other than goodwill are recorded at fair value in the period of acquisition. Intangible assets with finite lives, which consist primarily of patient medical records and non-compete agreements, are amortized over their estimated useful lives, ranging from three to five years, with a weighted average amortization period of approximately three years.

Derivative Instruments

The System's derivative financial instruments consist of interest rate swaps and foreign currency forward contracts, which are recognized as assets or liabilities in the consolidated balance sheets at fair value.

The System accounts for changes in the fair value of derivative instruments depending on whether they are designated and qualified as part of a hedging relationship and, further, on the type of hedging relationship. The System has not designated any derivative instruments as hedges. Accordingly, the changes in fair value of derivative instruments and the related cash payments are recorded in derivative losses in the consolidated statements of operations and changes in net assets.

Foreign Currency Translation

The statements of operations of foreign subsidiaries whose functional currencies are other than the U.S. dollar are translated into U.S. dollars using average exchange rates for the period. The assets and liabilities of foreign subsidiaries whose functional currencies are other than the U.S. dollar are translated into U.S. dollars using exchange rates as of the consolidated balance sheet date. The U.S. dollar effects that arise from translating the net assets of these subsidiaries at changing rates are recorded as foreign currency translation gains and losses in the consolidated statements of operations and changes in net assets. Cumulative foreign currency translation losses included in net assets without donor restrictions were \$60.2 million and \$57.8 million at December 31, 2021 and 2020, respectively.

3. Accounting Policies (continued)

Debt Issuance Costs

Debt issuance costs are amortized over the period the obligation is outstanding using the straight-line method, which approximates the interest method.

Contributions

Unconditional donor pledges to give cash, marketable securities, and other assets are reported at fair value at the date the pledge is made to the extent estimated to be collectible by the System. Conditional donor promises to give and indications of intentions to give are not recognized until the condition is satisfied. Pledges received with donor restrictions that limit the use of the donated assets are reported as donor-restricted support. When a donor restriction expires, that is, when a stipulated time restriction ends or purpose restriction is accomplished, net assets with donor restrictions are transferred to net assets without donor restrictions and reported in the consolidated statements of operations and changes in net assets as other unrestricted revenues if the purpose relates to operations or reported as a change in net assets without donor restrictions if the purpose relates to capital.

No amounts have been reflected in the consolidated financial statements for donated services. The System pays for most services requiring specific expertise. However, many individuals volunteer their time and perform a variety of tasks that assist the System with various programs.

Grants

Grant revenue is recognized in the period it is earned based on when the applicable project expenses are incurred and project milestones are achieved. The System records research grants as exchange transactions or conditional contributions based on an evaluation of whether the resource provider is receiving commensurate value in return for the resources transferred to the System. Conditional contributions contain barriers that must be overcome by the System before research grant revenue is recorded. Grant payments received in advance of related project expenses and the achievement of project milestones are recorded as deferred revenue and included in other current liabilities. The System recorded research grant revenue, included in other unrestricted revenues, of \$232.7 million and \$203.7 million in 2021 and 2020, respectively.

3. Accounting Policies (continued)

Net Assets With Donor Restrictions

Net assets with donor restrictions are used to differentiate resources, the use of which is restricted by donors or grantors to a specific time period or purpose, from resources on which no restrictions have been placed or that arise from the general operations of the System. Donor-restricted gifts and bequests are recorded as an addition to net assets with donor restrictions in the period received. Donor-restricted gifts include amounts held in perpetuity or for terms designated by donors, including the fair value of several charitable and perpetual trusts for which the System is an income or remainder beneficiary. Earnings on donor-restricted gifts are recorded as investment income in net assets with donor restrictions and subsequently used in accordance with the donor's designation. Net assets with donor restrictions are primarily restricted for research, education, and strategic capital projects.

Excess of Revenues Over Expenses

The consolidated statements of operations and changes in net assets include excess of revenues over expenses. Changes in net assets without donor restrictions, which are excluded from excess of revenues over expenses, consistent with industry practice, include retirement benefits adjustments, foreign currency translation gains and losses and contributions of long-lived assets (including assets acquired using grants or contributions that by donor restriction were to be used for the purpose of acquiring such assets).

4. Net Patient Service Revenue and Patient Receivables

Net patient service revenue by major payor source, for the years ended December 31, 2021 and 2020 is as follows (in thousands):

	2021		2020	
Medicare	\$ 4,165,001	38%	\$ 3,459,418	38%
Medicaid	1,126,981	10	886,408	10
Managed care and commercial	5,482,319	50	4,709,980	51

Net patient service revenue	<u>\$ 10,968,531</u>	<u>100%</u>	<u>\$ 9,134,685</u>	<u>100%</u>

The System's concentration of credit risk relating to patient receivables is limited due to the diversity of patients and payors. Patient receivables consist of amounts due from government programs, commercial insurance companies, other group insurance programs, and private pay patients. Patient receivables due from Medicare, Medicaid, and one commercial payor account for approximately 26%, 7% and 14% of the System's total patient receivables, respectively, at December 31, 2021. Patient receivables due from Medicare, Medicaid, and one commercial payor account for approximately 30%, 9% and 22% of the System's total patient receivables, respectively, at December 31, 2020. Revenues from the Medicare and Medicaid programs and two different commercial payors account for approximately 38%, 10%, 19% and 12% of the System's net patient service revenue, respectively, for 2021. Revenues from the Medicare and Medicaid programs and one commercial payor account for approximately 38%, 10% and 12% of the System's net patient service revenue, respectively, for 2020. Excluding these payors, no one payor represents more than 10% of the System's patient receivables or net patient service revenue.

The management of the majority of the System's investments is conducted by numerous external investment management organizations that are monitored by the System. The alternative investments have separate administrators and custodian arrangements. Alternative investments also include four holdings, valued at \$8.5 million and \$7.1 million at December 31, 2021 and 2020, respectively, in which the System invests directly.

6. Liquidity and Availability

Financial assets available for general expenditure within one year of December 31, 2021 and 2020 include the following (in thousands):

	<u>2021</u>	<u>2020</u>
Cash and cash equivalents	\$ 667,500	\$ 1,045,393
Patient receivables	1,532,362	1,255,681
Long-term investments	7,079,664	6,029,764
	<u>\$ 9,279,526</u>	<u>\$ 8,330,838</u>

The System has assets limited to use held by trustees, set aside for the System's captive insurance subsidiary and held for donor-restricted purposes. These investments are not reflected in the amounts above.

The System invests in alternative investments to increase the investment portfolio's diversification. The asset allocation of the portfolio is broadly diversified across global equity and global fixed income asset classes and alternative investment strategies and is designed to maximize the probability of achieving the System's long-term investment objectives at an appropriate level of risk, while maintaining a level of liquidity to meet the needs of ongoing portfolio management. Hedge funds generally have lock-up periods imposed upon initial investment in the fund and have varying degrees of liquidity that may restrict portions of fund redemptions to be received within one year. Private equity/venture capital funds generally prohibit redemptions during the life of the fund. The nature of alternative investments generally restricts the liquidity and availability of these investments to be available for the general expenditures of the System within one year of the consolidated balance sheets. As such, these investments have been excluded from the amounts above.

As part of the System's liquidity management plan, cash in excess of daily requirements for general expenditures is invested in long-term investments. The System's investment portfolios contain money market funds and other liquid investments that can be drawn upon, if necessary, to meet the liquidity needs of the System.

The System maintains two lines of credit totaling \$300 million as discussed in Note 12. As of December 31, 2021, \$300 million was available under the credit facilities.

Interest rate swaps and forward currency forward contracts (Note 13) are reported in other current assets and other noncurrent liabilities in the consolidated balance sheets.

The following is a description of the System's valuation methodologies for assets and liabilities measured at fair value. Fair value for Level 1 is based upon quoted market prices. Fair value for Level 2 is determined as follows:

Investments classified as Level 2 are primarily determined using techniques that are consistent with the market approach. Valuations are based on quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market or can be corroborated by observable market data for substantially the full term of the assets. Inputs, which include broker/dealer quotes, reported/comparable trades, and benchmark yields, are obtained from various sources, including market participants, dealers, and brokers.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

9. Fair Value Measurements (continued)

The fair value of perpetual and charitable trusts in which the System receives periodic payments from the trust is determined based on the present value of expected cash flows to be received from the trust using discount rates ranging from 0.4% to 5.0%, which are based on Treasury yield curve interest rates or the assumed yield of the trust assets. The fair value of charitable trusts in which the System is a remainder beneficiary is based on the System's beneficial interest in the investments held in the trust, which are measured at fair value.

The fair value of interest rate swaps is determined based on the present value of expected future cash flows using discount rates appropriate with the risks involved. The valuations include a credit spread adjustment to market interest rate curves to appropriately reflect nonperformance risk. The credit spread adjustment is derived from other comparably rated healthcare entities' bonds. The System manages credit risk based on the net portfolio exposure with each counterparty.

The fair value of foreign currency forward contracts is based on the difference between the contracted exchange rate and current market foreign currency exchange rates adjusted for forward points, which are differences in prevailing deposit interest rates between each currency through the remaining term of the contract.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the System believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

12. Long-Term Debt (continued)

The majority of the System's outstanding bonds are limited obligations of various issuing authorities payable solely by the System pursuant to agreements between the borrowing entities and the issuing authorities. The Series 2021 Term Loan, Series 2020 Term Loan, Series 2018 Sterling Notes, Series 2018 Term Loan, Series 2016 Private Placement, Series 2016 Term Loan, Series 2014 Bonds, and Series 2013 Keep Memory Alive Bonds are issued directly by the Clinic or its subsidiaries. Under various financing agreements, the System must meet certain operating and financial performance covenants.

In January 2021, the System entered into a taxable term loan agreement with a financial institution for \$64.7 million. The loan matures in 2025 and bears interest at a fixed rate of 0.67%. The proceeds of the taxable term loan were used to refund all of the remaining outstanding Series 2011A Bonds. The System recorded a gain on extinguishment of debt of \$4.2 million related to this transaction, which is recorded in other nonoperating gains and losses in the consolidated statements of operations and changes in net assets.

In July 2021, pursuant to certain agreements between the System and the State of Ohio (State) acting by and through the Ohio Higher Educational Facility Commission, the State issued \$83.8 million of fixed-rate State of Ohio Hospital Revenue Bonds (Series 2021A Bonds) for the benefit of the System. At the same time, the State also entered into a Forward Delivery Contract of Purchase related to \$198.3 million of fixed-rate State of Ohio Hospital Revenue Refunding Bonds (Series 2021B Bonds) for the benefit of the System. The Series 2021B bonds were settled and delivered on October 5, 2021. Proceeds from the issuance of the Series 2021A Bonds were used for the purpose of financing a portion of the costs of the System's acquisition of the sole membership interest in Mercy and paying the cost of issuance. Proceeds from the issuance of the Series 2021B Bonds were used to refund a portion of the Series 2012A Bonds and pay the cost of issuance. The System recorded a gain on extinguishment of debt of \$15.1 million related to this transaction, which is recorded in other nonoperating gains and losses in the consolidated statements of operations and changes in net assets.

In November 2020, the System entered into a taxable term loan with a financial institution for \$12.7 million. The loan matures in 2025 and bears interest at a fixed rate of 0.84%. The proceeds of the term loan were used to refund the Series 2010 Bonds that were assumed in the member substitution of Martin Health System.

12. Long-Term Debt (continued)

The System maintains the Cleveland Clinic Health System Obligated Group Commercial Paper Program (CP Program), which provides for the issuance of the Series 2014A CP Notes. The CP Program was established in November 2014 and will terminate no later than January 2044. The Series 2014A CP Notes may be issued from time to time in a maximum outstanding face amount of \$100 million and are supported by the System's self-liquidity program. The System did not have any outstanding Series 2014A CP Notes at December 31, 2021 or 2020.

Certain of the System's current outstanding bonds bear interest at a variable rate. During 2021 and 2020, the rates for the System's variable rate long-term debt series ranged from 0.01% to 1.13% (average rate 0.13%) and 0.01% to 9.00% (average rate 0.60%), respectively.

Certain variable rate bonds are secured by irrevocable direct pay letters of credit and standby bond purchase agreements, totaling \$609.2 million at December 31, 2021. Long-term variable rate debt is classified as current in the consolidated balance sheets if it is supported by letters of credit or standby bond purchase agreements that expire within one year, require repayment of a remarketing draw within one year, or contain a subjective clause that, if declared by the lender, could cause immediate repayment of the bonds.

The System provides self-liquidity on the Series 2003C Bonds, certain subseries of the Series 2008B Bonds, the Series 2014A CP Notes and the Series 2019D Bonds. These bonds are classified as current liabilities in the consolidated balance sheets.

In 2020, the System obtained lines of credit totaling \$650 million with multiple financial institutions. Each of the lines matured in 2021 and bore interest at the London Interbank Offered Rate (LIBOR) plus an applicable spread. The lines of credit were obtained to provide additional liquidity for the System. As of December 31, 2020, the System had no amounts drawn on these lines of credit. In 2021, four of the lines of credit totaling \$425 million expired or were terminated. Additionally, one of the lines of credit was increased to \$150 million and extended to April 22, 2024, and the other line of credit was increased to \$150 million and extended to May 24, 2023. As of December 31, 2021, the System has two operating lines of credit totaling \$300 million with no amounts drawn and \$300 million in available capacity.

12. Long-Term Debt (continued)

During the term of agreements with the issuing authorities, the System is required to make specified deposits with trustees to fund principal and interest payments when due. Also, unexpended bond proceeds are held by the trustee and released to the System for approved requisition requests for capital projects. There were no unexpended bond proceeds at December 31, 2021 or 2020. The System has made deposits with the trustee, included in investments for current use, to fund current principal and interest payments of \$104.8 million and \$122.7 million at December 31, 2021 and 2020, respectively.

The System is subject to certain restrictive covenants, including provisions relating to certain debt ratios, days cash on hand, and other matters. The System was in compliance with these covenants at December 31, 2021 and 2020.

Combined current aggregate scheduled maturities of long-term debt, excluding finance leases and assuming the remarketing of the variable rate demand bonds, for the five years subsequent to December 31, 2021, are as follows (in thousands): 2022 – \$77,818, 2023 – \$78,914, 2024 – \$79,789, 2025 – \$82,238, and 2026 – \$85,047.

Total interest paid approximated \$157.7 million and \$160.6 million in 2021 and 2020, respectively. Capitalized interest cost approximated \$3.8 million and \$4.4 million in 2021 and 2020, respectively.

13. Derivative Instruments

The System has entered into various derivative financial instruments to manage interest rate risk and foreign currency exposures.

The System's objective with respect to interest rate risk is to manage the risk of rising interest rates on the System's variable rate debt. Consistent with its interest rate risk management objective, the System has entered into various interest rate swap agreements. During the term of these transactions, the System pays interest at a fixed rate and receives interest at a variable rate based on LIBOR or the Securities Industry and Financial Markets Association Index (SIFMA). The swap agreements are not designated as hedging instruments. Net interest paid or received under the swap agreements is included in derivative gains (losses) in the consolidated statements of operations and changes in net assets.

The System is exposed to fluctuations in various foreign currencies against its functional currency, the U.S. dollar (USD). The System uses foreign currency forward contracts to manage its exposure to fluctuations in the USD – British pound (GBP) exchange rate. Currency forward contracts involve fixing the USD – GBP exchange rate for delivery of a specified amount of foreign currency on a specified date. The currency forward contracts are typically cash settled in USD for their fair value at or close to their settlement date.

The System had foreign currency forward contracts, maturing at various dates through April 2021, with no contracts outstanding at December 31, 2021, and a total outstanding notional amount of \$68.1 million at December 31, 2020.

The System has used various derivative contracts in connection with certain prior obligations and investments. Although minimum credit ratings are required for counterparties, this does not eliminate the risk that a counterparty may fail to honor its obligations. Derivative contracts are subject to periodic "mark-to-market" valuations. A derivative contract may, at any time, have a positive or negative value to the System. In the event that the negative value reaches certain thresholds established in the derivative contracts, the System is required to post collateral, which could adversely affect its liquidity. At December 31, 2021 and 2020, the System posted \$63.2 million and \$102.4 million, respectively, of collateral with counterparties that is included in funds held by trustees in the consolidated balance sheets. In addition, if the System were to choose to terminate a derivative contract or if a derivative contract were terminated pursuant to an event of default or a termination event as described in the derivative contract, the System could be required to pay a termination payment to the counterparty.

Included in the tables above is a long-term leasehold interest in a building in London, England that expires in June 2139. The System is currently converting the building into an advanced healthcare facility with approximately 185 beds that is expected to open in early 2022. Rental expense is fixed at increasing annual rates until December 2027, after which rental expense will be adjusted annually by a variable index that is subject to minimum and maximum thresholds through the end of the lease term. Excluding this lease, the weighted average remaining lease term for the System's operating leases is 8.0 years and 8.1 years at December 31, 2021 and 2020, respectively.

15. Professional and General Liability Insurance

The System manages its professional and general liability insurance program through a captive insurance arrangement.

In the ordinary course of business, professional and general liability claims have been asserted against the System by various claimants. These claims are in various stages of processing or, in certain instances, are in litigation. In addition, there are known incidents, and there also may be unknown incidents, which may result in the assertion of additional claims. The System has accrued its best estimate of both asserted and unasserted claims based on actuarially determined amounts. These estimates are subject to the effects of trends in loss severity and frequency, and ultimate settlement of professional and general liability claims may vary significantly from the estimated amounts.

15. Professional and General Liability Insurance (continued)

The System's professional and general liability insurance reserves of \$294.6 million and \$270.8 million at December 31, 2021 and 2020, respectively, are recorded as current and noncurrent liabilities and include discounted estimates of the ultimate costs for both asserted claims and unasserted claims. Asserted claims for the System's reserves were discounted at 1.00% and 0.50% at December 31, 2021 and 2020, respectively. Unasserted claims were discounted at 1.25% and 0.50% at December 31, 2021 and 2020, respectively. Through the captive insurance subsidiary, the System has set aside investments of \$263.1 million (\$56.0 million included in investments for current use) and \$234.0 million (\$54.7 million included in investments for current use) at December 31, 2021 and 2020, respectively, of which \$46.1 million and \$46.7 million at December 31, 2021 and 2020, respectively, is restricted in accordance with reinsurance trust agreements related to coverage of the Florida operations and other reinsurance programs provided by the captive insurance subsidiary.

Activity in the professional and general liability insurance reserves is summarized as follows (in thousands):

	2021	2020
Balance at beginning of year	\$ 270,820	\$ 223,362
Incurred related to:		
Current period	84,020	72,446
Prior period	(13,436)	(1,338)
Total incurred	70,584	71,108
Paid related to:		
Current period	4,896	2,129
Prior period	29,273	41,547
Total paid	34,169	43,676
Total incurred less total paid	36,415	27,432
Increase in unasserted claims	7,399	26
(Decrease) increase in reinsurance recoverable	(20,000)	20,000
Balance at end of year	\$ 294,634	\$ 270,820

The foregoing reconciliation shows \$13.4 million and \$1.3 million of favorable development in 2021 and 2020, respectively, due to changes in actuarial estimates as a result of lower claim activity, closed claims, and expedited settlement of claims, which has reduced claim expenses and resulted in more favorable settlements. The System utilizes a combination of actual and industry statistics to estimate loss and loss adjustment expense reserves.

16. Pensions and Other Postretirement Benefits

The System maintains five defined benefit pension plans, including three tax-qualified funded plans and two unfunded plans. The CCHS Retirement Plan is a tax-qualified defined benefit pension plan that provides benefits to substantially all employees of the System, except those employed by Akron General, Mercy Hospital, Union Hospital or Indian River Hospital. All benefit accruals under the CCHS Retirement Plan ceased as of December 31, 2012. Martin Health System had a tax-qualified defined benefit plan covering substantially all of its employees who were hired before October 1, 2005, and met certain eligibility requirements. All benefit accruals under the Martin Health System defined benefit plan ceased as of January 1, 2013. On June 30, 2019, the Martin Health System defined benefit pension plan merged with the CCHS Retirement Plan, with the CCHS Retirement Plan being a single continuing pension plan. Akron General has a tax-qualified defined benefit plan covering substantially all of its employees who were hired before 2004 and meet certain eligibility requirements. All benefit accruals under the Akron General defined benefit plan ceased as of December 31, 2017. Indian River Hospital has a tax-qualified defined benefit plan covering substantially all of its employees who were hired before December 31, 2002 and meet certain eligibility requirements. All benefit accruals under the Indian River Hospital defined benefit plan ceased as of December 31, 2002. The benefits for the System's tax-qualified defined benefit pension plans are provided based on age, years of service, and compensation. The System's policy for its tax-qualified defined benefit pension plans is to fund at least the minimum amounts required by the Employee Retirement Income Security Act of 1974. The System maintains two unfunded, nonqualified defined benefit supplemental retirement plans, which cover certain professional staff and administrative employees.

The System sponsors two noncontributory, defined contribution plans, and eleven contributory, defined contribution plans covering System employees. The Cleveland Clinic Investment Pension Plan (IPP) is a noncontributory, defined contribution plan, which covers substantially all of the System's employees, except employees covered by the Cleveland Clinic Cash Balance Plan and those employed by Akron General, Mercy Hospital, Union Hospital, Martin Health System or Indian River Hospital. The System's contribution to the IPP for participants is based upon a percentage of employee compensation and years of service. The Cleveland Clinic Cash Balance Plan (CBP) is a noncontributory, defined contribution plan that covers certain professional and administrative employees not covered by the IPP. The System's contribution to the CBP is a percentage of employee compensation that is determined according to age. The System sponsors eleven tax-qualified contributory, defined contribution plans that cover substantially all employees, including two plans for Akron General, three plans for Union Hospital, two plans for Martin Health System, two plans for Indian River Hospital and a plan for Mercy Hospital. The plans generally permit employees to make pretax employee deferrals and to become entitled to certain employer matching contributions that are based on employee contributions.

16. Pensions and Other Postretirement Benefits (continued)

The System provides healthcare benefits upon retirement for substantially all of its employees who meet certain minimum age and years of service provisions at retirement, except those employed by Mercy Hospital, Union Hospital or Indian River Hospital. The System's healthcare plans generally provide for cost sharing, in the form of retiree contributions, deductibles, and coinsurance. The System's policy is to fund the annual cost of healthcare benefits from the general assets of the System. The estimated cost of these postretirement benefits is actuarially determined and accrued over the employees' service periods.

The mortality tables used to calculate the defined benefit obligation for the System's defined benefit and postretirement health benefit plans at December 31, 2021, are based on the Pri-2012 "Employees," "Healthy Retiree" and "Contingent Annuitant" tables, fully generational for employees reflecting an unadjusted MP-2021 projection scale from the 2012 base year. The mortality tables used to calculate the defined benefit obligation for the System's defined benefit and postretirement health benefit plans at December 31, 2020, are based on the Pri-2012 "Employees," "Healthy Retiree" and "Contingent Annuitant" tables, fully generational for employees reflecting an unadjusted MP-2020 projection scale from the 2012 base year. The System believes that the updated mortality rates are the best estimate of future experience.

The System expects to make contributions of \$10.2 million to the defined benefit pension plans in 2022. Pension benefit payments over the next ten years are estimated as follows: 2022 – \$173.8 million, 2023 – \$126.1 million, 2024 – \$127.2 million, 2025 – \$123.7 million, 2026 – \$124.0 million, and in the aggregate for the five years thereafter – \$578.1 million.

The System expects to make contributions of \$0.2 million to other postretirement benefit plans in 2022. Other postretirement benefit payments over the next ten years are estimated as follows: 2022 – \$0.2 million, 2023 – \$3.1 million, 2024 – \$2.8 million, 2025 – \$2.5 million, 2026 – \$2.1 million, and in the aggregate for the five years thereafter – \$8.4 million.

The System is required to recognize the funded status, which is the difference between the fair value of plan assets and the projected benefit obligations, of its pension and other postretirement benefit plans in the consolidated balance sheets, with a corresponding adjustment to net assets without donor restrictions. Amounts recorded in net assets without donor restrictions consist of actuarial gains and losses and prior service credits and costs. Actuarial gains and losses recorded in net assets outside of the corridor, which is 10% of the greater of the projected benefit obligation or the fair value of the plan assets, are recognized as a component of net periodic benefit cost immediately in the current period. Prior service credits and costs are amortized on a straight-line basis over the estimated life of the plan participants.

16. Pensions and Other Postretirement Benefits (continued)

The accumulated benefit obligation for all defined benefit pension plans was \$1.9 billion and \$2.0 billion at December 31, 2021 and 2020, respectively. At December 31, 2021, defined benefit pension plans that had projected benefit obligations in excess of the fair value of plan assets had total accumulated benefit obligations of \$190.9 million, projected benefit obligations of \$209.0 million and no plan assets. At December 31, 2021, defined benefit pension plans that had fair value of plan assets in excess of projected benefit obligations had total accumulated benefit obligations and projected benefit obligations of \$1.7 billion and fair value of plan assets of \$1.7 billion. At December 31, 2020, defined benefit pension plans that had projected benefit obligations in excess of the fair value of plan assets had total accumulated benefit obligations and projected benefit obligations of \$1.7 billion and fair value of plan assets of \$1.5 billion. At December 31, 2020, defined benefit pension plans that had fair value of plan assets in excess of projected benefit obligations had total accumulated benefit obligations and projected benefit obligations of \$290.1 million and fair value of plan assets of \$300.9 million.

Actuarial gains and losses related to changes in the benefit obligation of defined benefit pension plans were \$33.8 million of gains and \$157.4 million of losses in 2021 and 2020, respectively. Significant components of gains and losses impacting defined benefit pension plans include changes in the discount rate, demographic experience changes and updates to the mortality assumption. Actuarial losses related to changes in the benefit obligation of other postretirement benefit plans were \$2.9 million and \$9.0 million in 2021 and 2020, respectively. Significant components of gains and losses impacting other postretirement benefit plans include changes in the discount rate, updates to healthcare claim costs and updates to the mortality assumption.

The CCHS Retirement Plan paid \$82.0 million and \$76.4 million in lump-sum payments in accordance with plan terms in 2021 and 2020, respectively, which exceeded the sum of the service cost and interest cost components of net periodic benefit cost for each year. As a result, the System recorded a settlement charge of \$7.4 million and \$5.3 million for the years ended December 31, 2021 and 2020, respectively.

The System uses a direct cost approach to estimate its postretirement benefit obligation for healthcare services provided by the System (internally provided services). Healthcare services provided by non-System entities (externally provided services) are based on the System's historical cost experience.

The System's weighted average asset allocation of pension plan assets at December 31, 2021 and 2020, by asset category, is as follows:

	Percentage of Plan Assets		
	2021	2020	Target Allocation
Asset category			
Interest-bearing cash	4.6%	3.2%	1%–5%
Fixed income securities	73.8	69.5	60%–90%
Common and preferred stocks	6.1	8.6	3%–25%
Alternative investments	15.5	18.7	0%–19%
Total	100.0%	100.0%	

The System's investment strategy for its pension assets balances the liquidity needs of the pension plans with the long-term return goals necessary to satisfy future pension obligations. The target allocation ranges of the investment pool to various asset classes are designed to diversify the portfolio in a way that achieves an efficient trade-off between long-term return and risk, while providing adequate liquidity to meet near-term expenses and obligations.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

16. Pensions and Other Postretirement Benefits (continued)

The System's weighted average pension portfolio return assumption of 5.79% and 6.59% in 2021 and 2020, respectively, is based on the targeted assumed rate of return through its asset mix at the beginning of each year, which is designed to mitigate short-term return volatility and achieve an efficient trade-off between return and risk. Expected returns and risk for each asset class are formed using a global capital asset pricing model framework in which the expected return is the compensation earned from taking risk. Forward-looking adjustments are made to expected return, volatility, and correlation estimates as well. Additionally, constraints such as permissible asset classes, portfolio guidelines, and liquidity considerations are included in the model.

The System has been implementing a liability-driven investment strategy for its defined benefit pension plans over the last few years that has reduced the asset allocation for common and preferred stocks with a corresponding increase in fixed income securities. The investment strategy has been implemented in phases based on the increased funded status of the pension plans and the anticipation that such changes in investment strategy will result in lower volatility of future changes in funded status. Additional revisions in asset allocations and expected rate of return on plan assets may occur based on future changes in the funded status of the pension plans. It is anticipated that the duration of the fixed-income investment assets will match the liabilities of the pension plan over time.

Total plan assets in the System's defined benefit pension plans at December 31, 2021 and 2020 are comprised of the following (in thousands):

	<u>2021</u>	<u>2020</u>
Plan assets measured at fair value	\$ 1,129,594	\$ 910,467
Commingled funds measured at net asset value	320,154	573,951
Alternative investments measured at net asset value	265,199	341,507
Total fair value of plan assets at end of year	<u>\$ 1,714,947</u>	<u>\$ 1,825,925</u>

Fair value methodologies for Level 1 and Level 2 are consistent with the inputs described in Note 9.

Fixed income securities include debt obligations of the U.S. government and various agencies, U.S. corporations, and other fixed income instruments such as mortgage-backed and asset-backed securities. The composition of these securities represents an expected return and risk profile that is commensurate with broadly defined fixed income indexes such as the Barclays Capital U.S. Aggregate Index. Additionally, investments include mutual funds and commingled fixed-income funds that may also invest in opportunistic as well as non-U.S. and high-yield debt instruments. Commingled fixed-income funds are valued using net asset value as a practical expedient.

Common and preferred stocks include investments of publicly traded common stocks of primarily U.S. corporations, the majority of which represent actively traded and liquid securities that are traded on many of the world's major exchanges and include large-, mid-, and small-capitalization securities. The composition of these securities represents an expected return and risk profile that is commensurate with broadly defined equity indexes such as the Morgan Stanley Capital International U.S. Index and the Morgan Stanley Capital International All Country World ex-U.S. Index. Investments also include equity mutual funds and commingled equity funds whose underlying assets may include publicly traded equity securities. Commingled equity funds are valued using net asset value as a practical expedient.

Notes to Consolidated Financial Statements (continued)

16. Pensions and Other Postretirement Benefits (continued)

Alternative investments include hedge funds and private equity funds that are valued using net asset value as a practical expedient. Hedge funds are meant to provide returns between those expected from stocks and fixed income investments with commensurate levels of risk and lower correlation relative to traditional investments. Included in this category are investments that are well diversified across various strategies and may consist of absolute return funds, long/short funds, and other opportunistic/multi-strategy funds. The underlying investments in such funds may include publicly traded and privately held equity and debt instruments issued by U.S. and international corporations as well as various derivatives based on these securities. Hedge fund redemptions typically contain restrictions that allow for a portion of the withdrawal proceeds to be held back from distribution while the underlying investments are liquidated. Private equity investments generally consist of limited partnerships formed to invest in equity and debt investments in operating companies that are not publicly traded. Investment strategies in this category may include buyouts, distressed debt, and venture capital. Private equity funds are closed-end funds and have significant redemption restrictions that prohibit redemptions during the fund's life.

17. Income Taxes

The Clinic and most of its controlled affiliates are tax-exempt organizations as described in Section 501(c)(3) of the Internal Revenue Code. These organizations are subject to income tax on any income from unrelated business activities. The System also owns or controls certain domestic and international taxable affiliates.

The System files income tax returns in the U.S. federal jurisdiction and in various state and foreign jurisdictions. Generally, the System is no longer subject to U.S. federal, state, and local tax examinations by tax authorities for years before 2018 and non-U.S. income tax examinations for years before 2016.

At December 31, 2021 and 2020, the liability for uncertainty in income taxes was \$2.0 million and \$1.5 million, respectively. The System does not expect a significant increase or decrease in unrecognized tax benefits within the next 12 months. The System recognizes interest and penalties accrued related to the liability for unrecognized tax benefits in the consolidated statements of operations and changes in net assets.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

17. Income Taxes (continued)

The System has temporary differences of \$784.3 million and \$588.9 million at December 31, 2021 and 2020, respectively. The temporary differences primarily relate to net operating losses available for income tax purposes. The majority of these losses expire in varying amounts through 2037. A deferred tax asset of \$179.8 million and \$121.0 million has been recorded at December 31, 2021 and 2020, respectively. A valuation allowance of \$179.8 million and \$121.0 million has been recorded at December 31, 2021 and 2020, respectively, against the deferred tax assets due to the uncertainty regarding their use.

18. Commitments and Contingent Liabilities

At December 31, 2021, the System has commitments for construction and other related capital contracts of \$294.2 million and letters of credit of \$12.6 million. Guarantees of mortgage loans made by banks to certain staff members are \$19.7 million at December 31, 2021. In addition, the System has remaining commitments to invest approximately \$1,382 million in alternative investments at December 31, 2021. The largest commitment at December 31, 2021, to any one alternative strategy manager is \$58.0 million. These investments are generally expected to occur within the next five years. No amounts have been recorded in the consolidated balance sheets for these commitments and guarantees.

Pledge liabilities to various foundations and other entities at December 31, 2021, are as follows (in thousands): 2022 – \$5,700, 2023 – \$1,100, 2024 – \$5,200, 2025 – \$1,100, 2026 – \$5,200, and thereafter – \$3,700. The unamortized discount on pledge liabilities at December 31, 2021, was \$1.7 million. Pledge liabilities are recorded in other current liabilities and other noncurrent liabilities in the consolidated balance sheets.

19. Endowment

The System's endowment consists of 376 individual donor-restricted funds established for a variety of purposes. Endowment funds are classified and reported based on donor-imposed restrictions as net assets with donor restrictions.

19. Endowment (continued)

Interpretation of Relevant Law

In 2009, the Uniform Prudent Management of Institutional Funds Act (UPMIFA) was enacted to update and replace Ohio's previous law, the Uniform Management of Institutional Funds Act. The System has interpreted UPMIFA as requiring the preservation of the fair value of the original gift as of the gift date of the donor-restricted endowment funds, absent explicit donor stipulations to the contrary. As a result of this interpretation, the System classifies as net assets with donor restrictions (1) the original value of gifts donated to the permanent endowment, (2) the original value of subsequent gifts to the permanent endowment, and (3) accumulations to the permanent endowment made in accordance with the direction of the applicable donor gift instrument at the time the accumulation is added to the fund. The remaining portion of the donor-restricted endowment fund that is not classified in the permanent endowment is available for appropriation for expenditure by the System in a manner consistent with the standard for expenditure prescribed by UPMIFA. In accordance with UPMIFA, the System considers the following factors in making a determination to appropriate or accumulate donor-restricted endowment funds:

1. The duration and preservation of the fund
2. The purposes of the System and the donor-restricted endowment fund
3. General economic conditions
4. The possible effect of inflation and deflation
5. The expected total return from income and the appreciation of investments
6. Other resources of the System
7. The investment policies of the System

Funds With Deficiencies

From time to time, the fair value of assets associated with individual donor-restricted endowment funds may fall below the value of the original and subsequent donor gift amounts. The System had no deficiencies of this nature in donor-restricted endowment funds as of December 31, 2021 or 2020. The System maintains policies that permit spending from underwater endowment funds depending on the degree to which the fund is underwater, unless otherwise precluded by donor intent or relevant laws and regulations.

Cleveland Clinic Health System

Notes to Consolidated Financial Statements (continued)

19. Endowment (continued)

Return Objectives and Risk Parameters

The System has adopted investment and spending policies for endowment assets that attempt to provide a predictable stream of funding to programs supported by its endowment while seeking to maintain the purchasing power of the endowment assets. Endowment assets include those assets of donor-restricted funds that the organization must hold in perpetuity. Under this policy, the endowment assets are invested in a highly diversified portfolio of U.S. and non-U.S. publicly traded equities, alternative investments, and fixed income securities structured to achieve an optimal balance between return and risk. The System expects its endowment funds, over time, to meet or exceed the investment policy benchmark as represented by a policy asset allocation, although actual returns in any given year may vary.

Strategies Employed for Achieving Objectives

To satisfy its long-term rate-of-return objectives, the System relies on a total return strategy in which investment returns are achieved through both capital appreciation (realized and unrealized) and current yield (interest and dividends). The System targets a diversified asset allocation to achieve its long-term return objective within prudent risk constraints.

Spending Policy and How the Investment Objectives Relate to Spending Policy

The System has a policy of appropriating for distribution each year up to 5% of its endowment fund's average fair value over the prior three years through the calendar year-end preceding the fiscal year in which the distribution is planned. In establishing this policy, the System considered the long-term expected return on its endowment. Accordingly, over the long term, the System expects the current spending policy to allow its endowment to grow. This is consistent with the System's objective to maintain the purchasing power of the endowment assets held in perpetuity or for a specified term as well as to provide additional real growth through new gifts and investment return.

The consolidated financial statements report certain categories of expenses that are attributable to more than one function. Therefore, these expenses require allocation on a reasonable basis that is consistently applied. The expenses that are allocated include salaries, wages, and benefits, which include allocations on the basis of estimates of time and effort.

Notes to Consolidated Financial Statements (continued)

21. COVID-19

On March 11, 2020, the World Health Organization declared the novel coronavirus disease (COVID-19) outbreak a global pandemic. The governors of Ohio and Florida declared a state of emergency for their respective states related to the COVID-19 outbreak on March 9, 2020, and a national state of emergency in the U.S. was declared on March 13, 2020. The System has worked with public health partners at all levels to maintain the health and safety of patients, caregivers and visitors to prevent the spread of COVID-19. The System has also provided extensive education to patients on the precautions that have been implemented to keep patients and caregivers safe during their appointments and procedures. Throughout the pandemic, the System has remained focused on creating a safe environment for patients and caregivers to ensure the availability of care for early identification of diseases and helping patients in managing chronic diseases. The System has taken, and continues to take, actions to mitigate the effect of the pandemic on its financial condition and results of operations; however, the outcome and ultimate effect of the pandemic on the System's consolidated financial statements cannot be determined at this time.

The System has received support under the Coronavirus Aid, Relief, and Economic Security (CARES) Act and the American Rescue Plan Act (ARP). CARES Act support includes Provider Relief Funds (PRF) and the Employee Retention Credit (ERC), and ARP support includes ARP rural payments. The System accounted for the PRF payments, ERC and ARP payments as contributions that are recognized as revenue when any related conditions have been substantially met.

The PRF and ARP rural payments provide funding from the U.S. Department of Health and Human Services (HHS) to healthcare providers to support healthcare-related expenses or lost revenue attributable to COVID-19. Funds received from HHS represent payments to providers and do not need to be repaid as long as the System complies with certain terms and conditions imposed by HHS, including reporting and compliance requirements. The System received \$222.0 million and \$423.3 million of payments in 2021 and 2020, respectively. The System recognized \$222.0 million and \$359.2 million in other unrestricted revenues in 2021 and 2020, respectively, based on the terms and conditions of the payments. The remaining \$64.1 million is included in other current liabilities at December 31, 2021 and 2020.

The ERC was designed to encourage entities to keep employees on their payroll despite experiencing economic hardship due to the COVID-19 pandemic. The ERC allows eligible entities to take a credit against certain employment taxes equal to 50% of up to \$10,000 of qualified wages an eligible employer pays to employees between March 13, 2020 and December 31, 2020. The System recognized \$0.6 million and \$28.4 million of ERC in other unrestricted revenues in 2021 and 2020, respectively.

Notes to Consolidated Financial Statements (continued)

21. COVID-19 (continued)

The CARES Act also permits employers to defer the payment of the employer's portion of social security taxes incurred between March 27, 2020 and December 31, 2020, with half the deferred payments required to be paid by the end of 2021 and the other half to be paid by the end of 2022. The System has deferred payroll tax payments of \$88.7 million and \$172.8 million at December 31, 2021 and 2020, respectively, which are recorded in other current liabilities and other noncurrent liabilities.

Additionally, the System submitted claims to the Federal Emergency Management Agency (FEMA) to reimburse costs related to expanding capacity; build-out of a surge hospital; and the purchase of medical supplies, ventilators, and personal protective equipment. The System records FEMA grants as contributions when the expenses have been incurred and any related conditions have been substantially met. The System recognized \$6.7 million and \$67.2 million of FEMA grant revenue in other unrestricted revenues in 2021 and 2020, respectively.

22. Subsequent Events

The System evaluated events and transactions occurring subsequent to December 31, 2021 through March 11, 2022, the date the consolidated financial statements were issued. During this period, there were no subsequent events requiring recognition in the consolidated financial statements, and there were no nonrecognized subsequent events requiring disclosure.
