

» Critical Care Transport

Cleveland Clinic's Critical Care Transport team is ready around the clock. No patient is too sick for transport. Our specially trained critical care staff is prepared for the highest acuity patients – ranging from neonates to adults. By initiating tertiary care during transfer, outcomes are often improved for many critically ill patients.

The team is available by ground or by air. All team members are experienced in critical care and/or emergency services and have received additional training in the transport environment – all aimed at providing safe and quality care to our patients. Together, our team transports more than 4,500 patients each year.

» Our Critical Care Team is highly skilled in taking care of patients in extreme conditions. We transport patients requiring cardiopulmonary bypass, mechanical hearts and intra-aortic balloon pumps.

Every life deserves world class care.

9500 Euclid Avenue, Cleveland, OH 44195

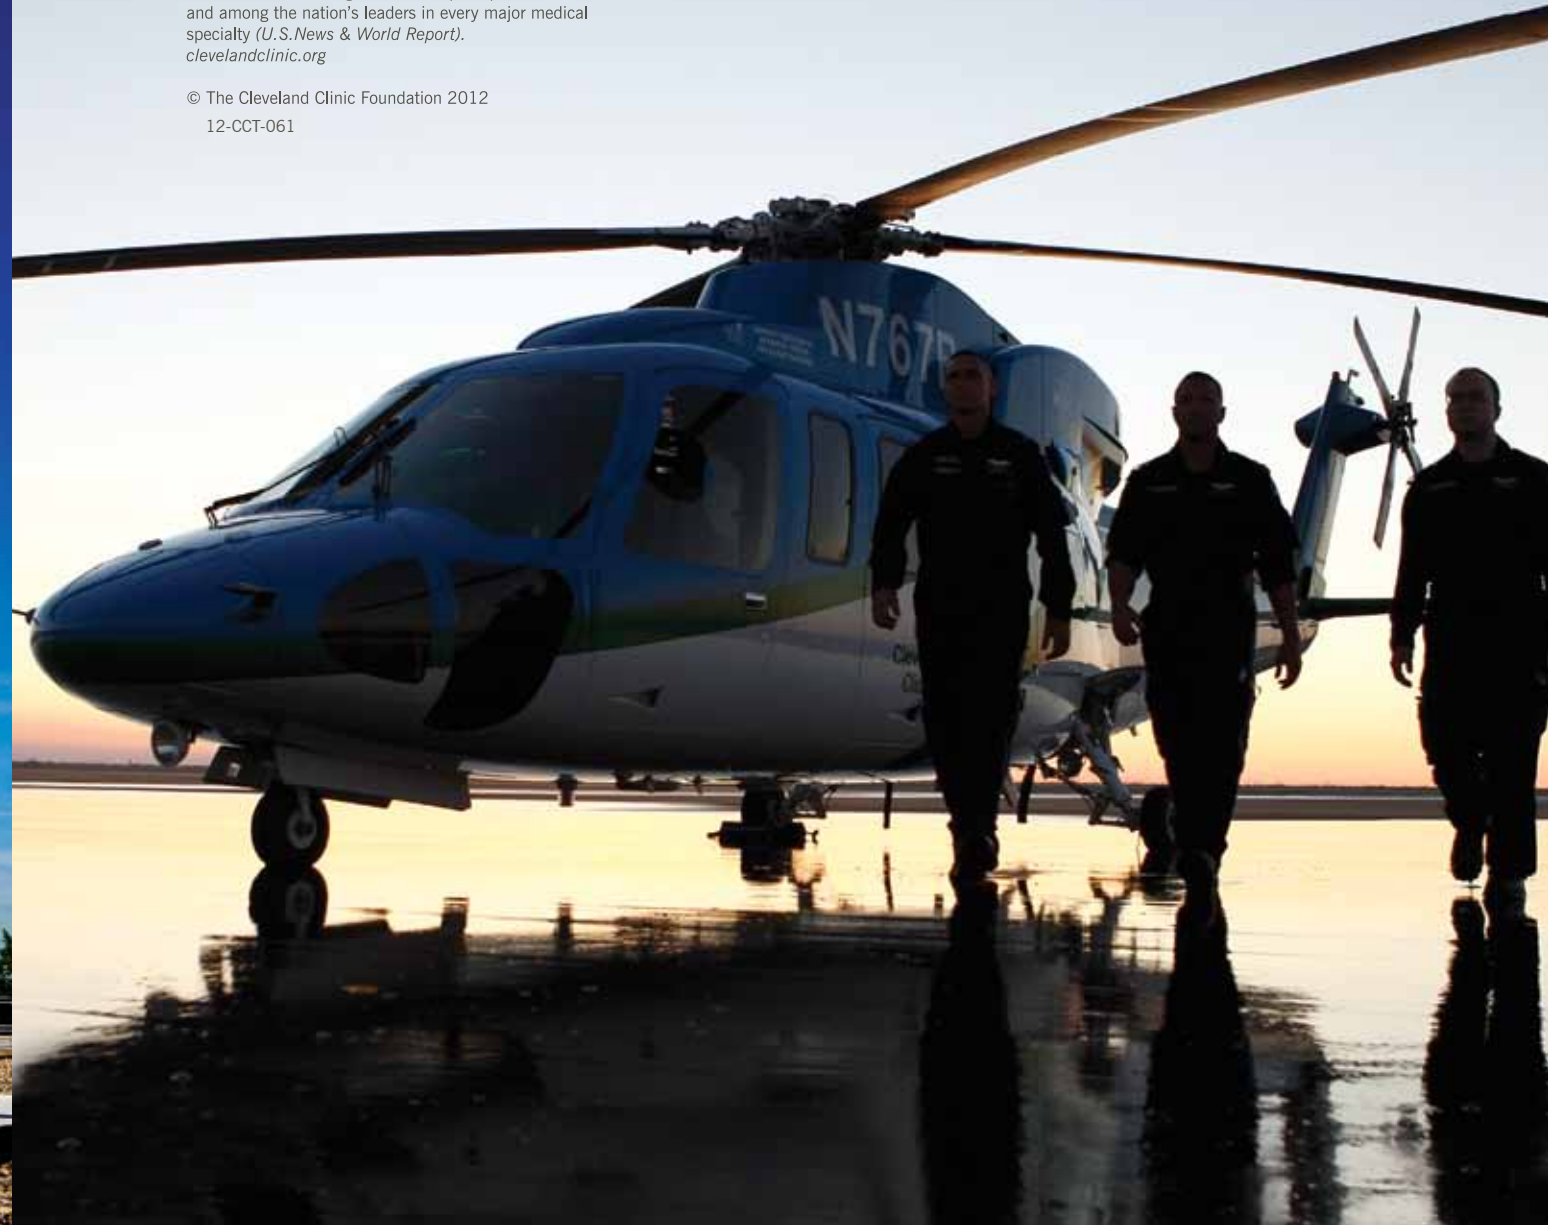

Cleveland Clinic is an integrated healthcare delivery system with a main campus, 18 family health centers, eight community hospitals and locations in Ohio, Florida, Nevada, Toronto and Abu Dhabi. It is a not-for-profit group practice where nearly 3,000 staff physicians and scientists in 120 medical specialties collaborate to give every patient the best outcome and experience. Cleveland Clinic is ranked among America's top hospitals overall, and among the nation's leaders in every major medical specialty (*U.S. News & World Report*). clevelandclinic.org

» No patient too sick,
no patient too far.

Bedside to Bedside Care

Our Critical Care Transport team works with referring healthcare providers to bring Cleveland Clinic care to the bedside, often improving outcomes for many serious and complex conditions.

Our team is made up of Cleveland Clinic physicians, nurse practitioners, critical care nurses and paramedics. We respond to urgent and routine transfer requests 24 hours a day, 365 days a year.

For more information, please visit clevelandclinic.org/cct.

» Ground Services

The expertise of Cleveland Clinic is available for local transfers, with dedicated Mobile Intensive Care Units.

» Helicopter Services

Our Critical Care Transport teams respond within a 250-mile radius of Cleveland using the Sikorsky S-76C+ aircraft. Each aircraft is staffed with two pilots and equipped with the most sophisticated avionics and procedural operations to ensure the highest safety standards in the industry.

» Fixed-Wing Aircraft Services

Cleveland Clinic Critical Care Transport teams have dedicated aircraft available to accommodate domestic or international transport.

» Did you know? Our teams have transported patients from more than 40 states and more than 20 countries.

» To Request a Transport

For acute transfers (acute stroke, STEMI, ICH, aortic syndromes and neonatal emergencies) call **877.379.CODE (2633)**

Routine transfers, call **866.547.1467**
