

CASE STUDY: A NATIONAL EMPLOYER SEES IMPROVED OUTCOMES AND SIGNIFICANT SAVINGS

THE CHALLENGE

A large national employer with a diverse, hourly workforce sought high-quality, cost-effective healthcare solutions. The organization manages a complex benefits ecosystem, high claims volumes, and wide variability in healthcare needs across regions. They sought a partner who could deliver clinical expertise, measurable outcomes, and predictable costs.

OUR SOLUTION

By adopting an integrated, data-driven approach to cardiac care, the employer improved access, reduced avoidable costs, and delivered a consistent experience for employees and their families. Cleveland Clinic Cardiac Center of Excellence treated over 200 employees, driving significant savings and higher-quality care.
