

**Education Institute Department/Center**

Center for Health Science Education

**Description of the Department/Center**

The Center for Health Sciences Education coordinates the education and training of health sciences students in the Cleveland Clinic Health System. This includes supporting faculty and students in 14 Cleveland Clinic sponsored health sciences programs and facilitating the onboarding of health science students from affiliated-based colleges and universities in Ohio and surrounding states.

**Learning Opportunity**

Developing clinical education outcomes, objectives and assessment methods for health science disciplines.

**Learning Outcomes**

At the conclusion of the internship experience, the intern should be able to:

1. Write core clinical competencies in cooperation with CCF discipline experts and key academic partners.
2. Develop student assessment tools to evaluate students' success in demonstrating clinical core competencies.
3. Establish effective business relationships to accomplish work goals.
4. Demonstrate the ability to work as an effective team member.
5. Apply knowledge and skills in an authentic business/education environment.
6. Gain new knowledge and develop new skills to successfully engage in unfamiliar tasks, activities, etc.
7. Integrate knowledge and skills learned in the classroom to solve problems.
8. Assess, critique and improve their work.
9. Adapt their behavior to different audiences they interact with.
10. Behave professionally in various environments by adhering to ethical standards and work commitments.
