

Updates to Epic orders for COVID-19 testing

Last updated: March 26, 2020

For the most up-to-date information, reference the [COVID-19 intranet site](#).

COVID-19 testing panels have been updated to combine all three tests for Influenza, RSV and COVID-19 into one order, enabling streamlined order placement with less clicks.

How it Works:

- All patients will be tested for Influenza and RSV.
- Additionally all patients will be tested for COVID-19, regardless of the results of the Influenza and RSV tests.

Additional updates include:

- The ambulatory order no longer prints. These orders are routed to a lab work queue used at the on-site testing locations.
- The inpatient and ED panel now includes an order for Droplet and Contact Precautions Plus Eyewear.

In accordance with recently released [COVID-19 testing guidance for Cleveland Clinic Ohio locations](#), all single influenza/RSV test orders remain removed from facility and department preference lists and order sets.

The image displays two screenshots of the Epic EHR interface for the 'AMB COVID 19-TESTING PANEL'. Both screenshots show a list of three checked items: 'CCF EMPLOYEE AMB COVID 19-TESTING PANEL', 'RAPID PCR ASSAY FOR FLU/RSV', and 'CAREGIVER COVID19'. The bottom screenshot includes a red banner stating 'Influenza RSV & Covid-19 testing will be performed.'
