

NEW CORONAVIRUS DIAGNOSIS DESCRIPTIONS NOW AVAILABLE IN PROD

IMO recently released 15 new diagnoses descriptions providing clinicians the ability to more precisely document patient conditions resulting from exposure to the coronavirus.

The following diagnosis are now available in Production:

DIAGNOSIS	ICD-10 Codes	Status
Infection due to Wuhan coronavirus	B34.2	New
Infection due to 2019-nCoV	B34.2	New
Exposure to Wuhan coronavirus	Z20.828	New
Infection due to 2019 novel coronavirus	B34.2	New
Pneumonia due to Wuhan coronavirus	J12.89, B97.29	New
Pneumonia due to 2019-nCoV	J12.89, B97.29	New
Exposure to 2019 novel coronavirus	Z20.828	New
Exposure to 2019-nCoV	Z20.828	New
Pneumonia due to 2019 novel coronavirus	J12.89, B97.29	New
Real time reverse transcriptase PCR positive for Wuhan coronavirus RNA	B34.2	New
Real time reverse transcriptase PCR positive for 2019 novel coronavirus	B34.2	New
Suspected 2019-nCoV infection	R68.89	New
Suspected Wuhan coronavirus infection	R68.89	New
Real time reverse transcriptase PCR positive for 2019-nCoV	B34.2	New
Suspected 2019 novel coronavirus infection	R68.89	New
Coronavirus infection	B34.2	
Coronavirus infection, unspecified	B34.2	
Middle East respiratory syndrome (MERS) coronavirus infection	B97.29	
Middle East respiratory syndrome (MERS) coronavirus infection	B97.29	
SARS-associated coronavirus infection	B97.21
