

Is this an Aerosol Generating Procedure?

Yes

- › Bronchoscopy
- › CPR
- › Open tracheal suctioning
- › Intubation (including tube exchange)
- › Extubation
- › Ambubag oxygen delivery
- › Noninvasive positive pressure ventilation (CPAP/BiPAP)
- › Sputum induction
- › Procedures using oscillating bone saws
- › Dental procedures involving ultrasonic scalers, high-speed dental hand pieces, air/water syringes, air polishing and air abrasion

Clean and disinfect surfaces and equipment after aerosol generating procedure is performed.

For CPAP/BiPAP: Perform cleaning and disinfection when ventilation is disconnected or interrupted.
