

USE OF PATIENT-SPECIFIC STETHOSCOPES

Use of Patient-Specific Stethoscopes

- » There should only be one stethoscope per patient in each room.
- » This is a disposable stethoscope for use by all caregivers.
- » This is the ONLY one needed for patient care.
- » The stethoscope is to be reused between caregivers.
 - Disinfect with a disinfecting wipe between uses.
- » Store in patient room in a manner to prevent contamination (i.e. out of patient zone)

If there is no stethoscope in the room, please request/obtain a single-patient stethoscope from supplies.
