

## VISITATION GUIDELINES

We're using four new, statewide visitation levels — yellow, orange, red and purple — to protect our patients and caregivers and limit the spread of COVID-19. The visitation levels are based on data about how COVID-19 is spreading, including state and county public health information. If you're visiting a COVID-19 positive patient, you must wear provided personal protective equipment (PPE). Even when you can't visit in person, we encourage you to stay connected virtually.

These guidelines are being put in place for the safety of our patients, caregivers and community. Thank you for your understanding.

**PLEASE NOTE:** All visitors must wear a mask, have their temperature taken and sanitize their hands. Visitation guidelines are subject to change if safe physical distancing isn't possible.
