

West 25th Street Exit Ramp from I-90 East to Close Beginning April 13

CLEVELAND (*Friday, April 3, 2015*) – As part of a safety improvement project to help improve the flow of traffic for westside commuters, the West 25th Street exit ramp from I-90 east will soon close temporarily.

Weather permitting, overnight Friday, April 10 crews will **close multiple lanes on I-90 east (inbound) near West 25th Street from 7:30 p.m. to noon Saturday, April 11** in order to shift traffic in the vicinity. Upon reopening on Saturday, motorists should be alert for lanes shifted toward the median. **The West 25th Street exit ramp from I-90 east will also be closed until about mid-May.**

Work times are coordinated to allow event traffic to enter Downtown Cleveland uninterrupted. Traffic exiting Downtown will not be impacted. The night of Saturday, April 11 will be used as a “back-up” should inclement weather hinder operations the night of April 10.

During the West 25th Street ramp closure, motorists who wish to access locations along West 25th Street north of I-90 – including the West Side Market and other Ohio City destinations – should use West 41st Street to Lorain Avenue.

Motorists who wish to access locations along West 25th Street south of I-90 – including MetroHealth Medical Center and the Clark-Fulton & Brooklyn Centre Neighborhoods – should use West 44th Street to Clark Avenue. Motorists bound for Scranton Avenue should use the same detour.

Occasional off-peak, daytime lane closures are anticipated as the project moves forward.
