

## Conferences

Residents have didactics every Wednesday morning, from 8:00 a.m. – 12:00 p.m. The table below provides the topics covered. The conference curriculum is an 18 month cycle, so that those resident (especially first years, due to rotation commitments), can catch it on the next 18 month cycle. The 2nd cycle will include the newest updates on the topic.

Conference powerpoints/handouts are available on our MedHub Resident Tracking system.

Behavioral Science Medicine Subspecialty Topic	Evidence Based Medicine Perinatology
Case Conferences Office Skills	Family Medicine Topic Pharmacology
Computer Skills Orthopedics	Geriatrics Practice Management
Core Content Osteopathic Manipulation	Gynecology Research Seminar
Dermatology Patient Education	Journal Club Sports Medicine
EKG Pediatrics	

Following the 11:00 a.m. lecture, lunch is provided and there is always a meeting from 12:30 – 1:30 p.m. Every other week there is either a Resident/Faculty meeting or a Resident Forum meeting.

Other meetings include Morning Report. Morning Report is held on Monday and Friday mornings from 7:30 – 8:30 a.m. This conference is to discuss the patients on the in-service. All third years are required to attend all morning reports. Also in attendance are the junior who is on service for the month, the faculty on service and the resident who was on call the previous night.

Our residents also attend the City-Wide Grand Rounds, which occur 3 times per year. These rounds are held by Fairview, MetroHealth Medical Center and University Hospitals Family Medicine residency programs.

Also, once per year, our residency program holds an Annual Family Medicine Symposium, which provides updates on issues in Family Medicine. The symposium is organized by one of our faculty, Robert Kelly, MD.

Residents who wish to participate in a Global Health rotation are required to give a lecture about their experience.

Elizabeth Belson, MD, Guatemala
