

AVON HOSPITAL PHARMACY INTERNSHIP

[Avon, Ohio] | [Inpatient]

ABOUT OUR SITE *

We are a 126 bed (expanding to 212 beds in early 2029) hospital with Emergency, ICU, Ortho and Geriatric services on the west side of Cleveland, Ohio. We are the only Cleveland Clinic Hospital in Lorain County. We are growing rapidly having only opened in 2016 and already doubling in size.

INTERNSHIP AT A GLANCE *

Program structure: We try and hire Interns when they are first able to apply for a license. We will have you learn and fill all the technician roles during your first year to become familiar with hospital workflow. While this will continue through the rest of your internship here you will also be involved in various projects, completing med histories and completing patient education.

TIME COMMITMENT & STAFFING *

- We do not currently have a weekend requirement and will have between 20-40 hours available during the summer breaks and over winter holidays/spring break.

WHAT OUR INTERNS DO

- Pick pyxis restock medications and patient specific medications from our Carousel, compound IV products, deliver and restock pyxis machines, preform inventory and outdate tasks
- Complete med histories and pt education
- Opportunities for research and project/committee involvement may be available

WHAT MAKES OUR PROGRAM UNIQUE (Optional, but encouraged)

You are incorporated into our team from day 1. We will educate you on being a highly reliable, responsible part of the workforce and learn several different aspects of hospital pharmacy. Interns are encouraged to attend APPE and Resident presentations and become involved in hospital committees that excite them.

HOW TO APPLY

Positions are usually posted in March/April when available
