The Cleveland Clinic Model of Medicine

- Physician-led, multispecialty group practice
- Staff physicians are salaried, with no incentives for extra tests or procedures
- All physicians are on one-year contracts, renewable after annual performance reviews

Mission, Values

- Better care of the sick, investigation into their problems and education of those who serve (mission)
- “Patients First” (guiding principle)
- “To Act as a Unit” (motto)
- Quality, innovation, teamwork, service, compassion, integrity (values)
- To give every patient the best outcome and experience (goal)

Quality, Safety, Transparency

- Quality & Patient Safety Institute oversees data-driven quality and safety improvement
- Relentless focus on monitoring, recording and reporting quality and safety data
- Full disclosure of physician-industry relationships in online staff directory
- First academic medical center to include patient comments and ratings of physicians online

Vital Statistics (2014 year end)

- $3.6 M – spending on goods & services
- $9.6 M – household spending
- $3.6 M – visitor spending

Our financial strength helps us support the education of tomorrow’s health care professionals and research to discover advanced treatments.
Clinical Services at Cleveland Clinic Nevada

UROLOGY

We offer a full range of urological care for men and women. Our fellowship-trained physicians subspecialize in many areas of urology care: cancer, diseases of the prostate, bladder and kidneys; male and female sexual dysfunction; Peyronie's disease; advanced prosthetics; vasectomy; urinary incontinence and voiding dysfunction; pelvic floor reconstruction; kidney stones and infertility.

NEUROLOGY

Patients receive expert diagnosis and treatment at the Lou Ruvo Center for Brain Health, which offers a multidisciplinary patient-focused approach to diagnosis and treatment of Alzheimer’s, Huntington’s and Parkinson’s diseases; frontotemporal dementia; multiple sclerosis and multiple system atrophy. The center promotes collaboration across all care providers, offering patients a complete continuum of care and infusing education and research into all that it does. All neurologists are fellowship trained in subspecialized areas of treatment and research.

IMAGING SERVICES

With a 3-Tesla MRI and a state-of-the-art PET/CT scanner, Cleveland Clinic Nevada’s imaging services are second to none. Located at the Lou Ruvo Center for Brain Health, we offer same-day access and results are usually available within 24 hours. Our imaging is backed by the full resources of Cleveland Clinic’s Imaging Institute, which is staffed by board-certified, academically trained subspecialty radiologists who quickly return exam results to the ordering physician.

NEUROREHABILITATION

At the Lou Ruvo Center for Brain Health, our board-certified specialists use cutting-edge technology and customized exercises during one-on-one individualized treatment sessions. Our physical and occupational therapy programs are specifically tailored to the needs of those experiencing the effects of brain disorders. By incorporating patients’ interests and hobbies and offering socially enriching experiences, we work to increase our patients’ mobility and agility while decreasing fatigue and falls. Our goal is to leverage research, provide expert care to patients and their caregivers, and empower patients to live independently as long as possible.

NEUROPSYCHOLOGY

Our neuropsychologists’ highly specialized clinical training focuses on evaluating the relationship between the brain and behavior. Assessing exactly what has gone wrong with memory can be a very useful tool for both patients and their physicians, and can have a direct impact on treatment planning.

INFUSION

Some of the most effective drug therapies for neurodegenerative diseases and MS are administered by intravenous infusion. Utilized for both treatment and research and equipped with the latest technology, our infusion suite creates a comfortable environment for patients and families living with similar diseases.

PATIENT AND FAMILY CAREGIVER SERVICES

A diagnosis of a degenerative brain disorder is life-changing for both the patient and the family. Patient and Family Caregiver Services at the Lou Ruvo Center for Brain Health provide no-cost social services and education so that all affected can maximize quality of life in the face of new challenges.

Secure Online Services (at clevelandclinic.org)

Cleveland Clinic Nevada offers a variety of secure online services for patients and physicians, which are transforming the practice of medicine:

- **MyChart** connects patients to personalized health information.
- **MyConsult** offers online medical second opinions for over 1,000 diagnoses.
- Additional physician-based services include eResearch and eRadiology.
- **DrConnect** gives community physicians real-time information about their patients’ treatment progress while at Cleveland Clinic.
- **MyPractice** Community is an affordable EHR system for physicians in private practice.

Medical Education

From 2010-2014, the Lou Ruvo Center for Brain Health Education Program delivered more than 17,000 hours of education to elementary school students through medical professionals in Las Vegas. By exposing students to the focused expertise of our world-class medical personnel, our large research organization and our robust social services program, we distill and distribute Lou Ruvo Center for Brain Health knowledge and skills throughout our community and on to the next generation of providers. Since 2014, we have offered a fellowship in behavioral neurology and neuropsychiatry accredited by the United College for Neurologic Subspecialties.

Clinical Trials and Research

The Lou Ruvo Center for Brain Health’s clinical trial program is among the largest in the country for Alzheimer’s disease. We conduct more than 30 trials in Parkinson’s disease, multiple sclerosis, Alzheimer’s disease, memory decline and normal cognition. Additionally, we offer investigator-led studies, including a study of repeated head trauma in active and retired professional fighters. We offer opportunities to participate in research regardless of where individuals receive neurological care.
