PROGRAM DESCRIPTION
The purpose of this activity is to address the clinical challenges faced by
oncology professionals in all practice settings regarding evolving treatment
advances in hematologic malignancies, breast cancer updates, managing
oncologic emergencies, and looking beyond traditional chemotherapies and
learn about new complimentary therapies which can assist in managing these
cancers. Presentations will also include a review of caring for the patient
receiving radiation therapy and survivorship efforts. The latest updates from
clinical research trials and ASH, ASCO GI, and ONS will be highlighted.

OBJECTIVES:
At the conclusion of this live activity participants will be able to:
1. Discuss the role of distress screening for oncology and how Art
   Therapy can impact outcomes
2. Understand Innovative Technologies in Radiation Oncology
   Identify and understand nutritional considerations for the cancer patient
3. Identify and understand nutritional considerations for the cancer patient
4. Understand the importance of survivorship and prevention for the cancer patient
5. Discuss the healthcare professionals role in being a facilitator for change
6. Recognize barriers to exercise and how PT, OT and ST can help the cancer patient overcome them
7. Understand the role of the navigator in cancer care
8. Discuss surgical options for breast the breast cancer patient.
9. Discuss importance on complementary Therapies in Oncology
   and how they support the cancer patient
