Pharmacy Summer Internship Program

Introduction

Cleveland Clinic Department of Pharmacy serves as an educational site for doctor of pharmacy students. Students have the opportunity to participate in a variety of rotations and educational conferences designed to advance knowledge base and skill level in such areas as cost-effective drug selection, monitoring of therapy and response, pharmacokinetic principles, avoidance and minimization of adverse events, drug information, education, and verbal and written communication.

Purpose

The purpose of the summer internship program is to provide knowledge and practical experience necessary for functioning competently and effectively upon licensure.

Program Details

The program is a 12-week rotational experience including rotations such as central pharmacy, IV room, compounding, drug information, pediatric satellite, chemotherapy satellite, and clinical drug monitoring with an operational focus for first year interns. Requirements of the program include a summer project, two presentations, attendance at pharmacy intern meetings and clinical pharmacy conferences.

Eligibility

The candidate must have completed 3 years of college coursework including the first professional year in pharmacy school. (completed the P3 year of a P6 program or P1 year of a P4 program).

Questions

Questions about the internship program can be directed to either Rebecca A. Taylor at taylorr3@ccf.org.
