Glickman Urological and Kidney Institute presents

3rd Ambulatory Urology Symposium
The Changing Face of Urology

New This Year!
Opening Night Symposium

March 13–15, 2008

Symposium Director
J. Stephen Jones, M.D., F.A.C.S.
Vice Chairman, Glickman Urological and Kidney Institute

InterContinental Hotel & Bank of America Conference Center
Cleveland, Ohio
The purpose of this activity is to provide an update on the most current, state-of-the-art issues regarding ambulatory urology from both a practice and medical standpoint. The two-days of lectures will focus on everyday ambulatory urological issues, recognizing that the majority of most practicing urologists' workload is outside hospital-based care.

Objectives:
After completing participation in this activity, the participant will be able to:

1. Integrate the evolving relationship of ambulatory urology to traditional hospital-focused care.
2. Synthesize trends in urological practice from multiple viewpoints.
3. Illustrate a better understanding of non-operative approaches to a number of urological conditions.
4. Discuss emerging technologies for the care of malignant and benign urological conditions.

Target Audience
Practicing urologists and other professionals interested in issues relating to ambulatory urology.
