Cleveland Clinic

Founded in 1921, Cleveland Clinic is a nonprofit, multispecialty academic medical center that integrates clinical and hospital care with research and education. Today, 2,700 physicians and scientists practice in 120 medical specialties and subspecialties, annually recording more than 3 million patient visits and more than 70,000 surgeries.

Cleveland Clinic's main campus, with 50 buildings on 180 acres in Cleveland, Ohio, includes a 1,300-bed hospital, outpatient clinic, a research institute, specialty institutes, and supporting labs and facilities. Cleveland Clinic also operates more than a dozen family health centers; nine regional hospitals, one affiliate hospital, a rehabilitation hospital for children, Cleveland Clinic Florida, the Lou Ruvo Center for Brain Health in Las Vegas, and Cleveland Clinic Canada. Cleveland Clinic Abu Dhabi (United Arab Emirates), a multispecialty care hospital and clinic, is scheduled to open in 2012.

The Lerner Research Institute is home to all laboratory-based, translational and clinical biomedical research at Cleveland Clinic. With 700,000 total square feet of research space, more than 1,200 scientists and support personnel collaborate with clinical researchers to unravel the mysteries of disease. It is one of the leading NIH-funded research institutes in the nation.

Now in its seventh year of existence, Cleveland Clinic Lerner College of Medicine of Case Western Reserve University offers all students full-tuition scholarships. The program graduated its first students as physician-scientists in 2009.

Cleveland Clinic is consistently ranked among the top hospitals in America by *U.S. News & World Report*, and our heart and heart surgery program has been ranked No. 1 since 1995.

**Cleveland Clinic Institutes**

In 2007, Cleveland Clinic restructured its practice, bundling all clinical specialties into integrated practice units called institutes. An institute combines all the specialties surrounding a specific organ or disease system under a single roof. Each institute has a single leader and focuses the energies of multiple professionals onto the patient. From access and communication to billing and point-of-care service, institutes are improving the patient experience at Cleveland Clinic.

The Ob/Gyn & Women's Health Institute is designed to meet the unique and changing medical needs of women from adolescence to mature adulthood. Our team offers coordinated and supportive care for the problems that affect women's lives, from breast cancer to infertility, incontinence, pelvic floor disorders and more.
The Ob/Gyn & Women’s Health Institute is committed to providing world-class care to women of all ages. The institute offers a full complement of subspecialty services that fall within the field of women’s health, from general gynecologic care and screenings for breast disorders, to complex oncologic surgery for breast and gynecologic malignancies. Services are available on the main campus, as well as in family health centers and hospitals throughout the region. In 2010, the Department of Obstetrics and Gynecology was the top-rated program in Ohio and ranked number four nationally by *U.S. News & World Report*.

The Center for Specialized Women’s Health in the Gault Women’s Health and Breast Pavilion offers leading-edge interdisciplinary women’s health services and serves as a national model to other hospitals. The Center for Specialized Women’s Health was made possible in part through the generous support of an Avon Foundation grant in 2002. Staff specialize in addressing problems that are of special concern to women including: menstrual disorders, non-hysterectomy alternatives, perimenopause and menopausal disorders, uterine fibroids, severe PMS/PMDD, menopause hormone therapies, postmenopausal osteoporosis, urinary incontinence, hormonally induced depressive disorders, polycystic ovarian syndrome and female sexual dysfunction. The Center currently boasts the highest number of North American Menopause Society (NAMS) credentialed menopause experts in the country. Services include saline infusion sonography, office hysteroscopy, colposcopy, outpatient endometrial ablations, IV reclast infusions and on-site bone densitometry, as well as access to leading-edge breast care in the adjoining Breast Center. Additionally, the Center for Specialized Women’s Health has a successful women’s health fellowship training program. The Center offers shared medical appointments and provides consultation to outside medical institutions interested in developing or expanding interdisciplinary women’s health service lines. Additionally, the Center for Specialized Women’s Health manages Speaking of Women’s Health, a national program that educates women to make informed decisions about health, well-being and personal safety for themselves and their families.

The staff in the Breast Center includes breast surgeons, medical breast specialists, and radiologists who focus on breast cancer screening and surgical treatment, advanced diagnostic breast imaging, and high-risk screening and prevention. Breast surgeons and medical breast specialists collaborate in the main campus Breast Center, Beachwood Breast Center, Strongsville Breast Center, and at Fairview Hospital, with screening mammography available at these locations in addition to all of our family health centers.

To offer patients state-of-the-art surgical options, our Breast Center staff includes a team of microvascular breast reconstructive surgeons who specialize in DIEP free-flap reconstruction – a type of reconstruction offered in only a select group of centers worldwide. Additionally, Cleveland Clinic’s breast MRI program has set
the standard for breast MRI in staging and high-risk screening. We offer dedicated fellowships in breast surgery, medical breast disease, breast imaging and women’s health.

Physicians in the **Section of Urogynecology and Pelvic Reconstructive Surgery/General Gynecology** have a wide variety of subspecialty interests, including urogynecology and vaginal reconstructive pelvic surgery, advanced operative endoscopy, genital fistulas and bowel disorders, women’s health, menopause and geriatric gynecology, pelvic pain, menstrual disorders and acupuncture for chronic pain. The professional staff aspires to remain at the forefront of advanced gynecologic surgery as national leaders in surgical innovations and experience. The section offers one of the first American board-approved Urogynecology/Reconstructive Pelvic Surgery fellowships in the country, and it represents one of the only urogynecology fellowship programs in the Midwest. Additionally, the section is a member of the Pelvic Floor Disorders Network, a network of doctors, nurses and researchers from across the United States who engage in collaborative research to improve the care and daily lives of women with pelvic organ prolapse and bladder and bowel control problems.

**The Female Pelvic Medicine and Reconstructive Surgery Center** provides a multidisciplinary approach to evaluation and treatment of patients with a variety of pelvic floor disorders. Cleveland Clinic’s Menstrual and Fibroid Treatment Center provides advanced care for women who are experiencing menstruation dysfunction and symptoms from uterine fibroids.

In the **Section of Gynecologic Oncology**, the staff employs a multidisciplinary approach to comprehensive management of gynecologic malignancies, incorporating surgery, radiation, chemotherapy and biologic therapy. We offer all innovative surgery, including robotics. We have a popular Gynecologic Oncology fellowship program. Our oncologists are members of the Gynecologic Oncology Group, the only national cooperative study group devoted exclusively to the investigation of gynecologic malignancies. Extensive clinical trials of the newest treatments and techniques are available. The section also encompasses the Familial Ovarian Cancer Registry and provides complete treatment of pre-invasive lower genital tract disease.

**The Section of Pediatric and Adolescent Gynecology** works in conjunction with the Department of General Pediatrics, managing the gynecological consultative and surgical care of pediatric and adolescent patients.

**Reproductive Endocrinology and Infertility Section** physicians provide comprehensive evaluation for infertile couples. Treatments encompass all assisted-reproductive technologies, including artificial insemination, ovulation induction, intra-cytoplasmic sperm injection, in vitro fertilization and reproductive surgery,
including microsurgery (sterilization reversal) and advanced endoscopic techniques for problems such as stage IV endometriosis. For maximum patient convenience, Cleveland Clinic’s Fertility Center has several locations throughout the area. In vitro fertilization retrievals and transfers are performed at the Fertility Center at Beachwood, while initial fertility consults and testing are available on the main campus, the Beachwood Fertility Center, the Fairview Fertility Center, Youngstown, and the Solon, Strongsville and Twinsburg family health centers.

Physicians and certified nurse-midwives in the Maternal-Fetal Medicine/Obstetrics Section provide three levels of obstetrical care: midwives offer a family-centered approach to low-risk prenatal care and delivery; general obstetricians provide care for low- and medium-risk pregnancies; and maternal/fetal medicine specialists provide diagnosis and treatment for more complicated high-risk pregnancies. Available services include genetic counseling, ultrasound, chorionic villus sampling and amniocentesis.

The Fetal Care Center, launched in 2005, is a multidisciplinary team of perinatologists, neonatologists and pediatric surgeons whose goal is to achieve the best possible outcome in pregnancies complicated by complex congenital anomalies. Through collaboration and communication, we provide accurate prenatal diagnosis using state-of-the-art techniques such as high-resolution ultrasound, fetal MRI and fetoscopy, then apply that information in developing a management plan for pregnancy, delivery and newborn care.

Ob/Gyn & Women’s Health Institute

TOMMASO FALCONE, MD
Chairman, Ob/Gyn & Women’s Health Institute
Specialty Interest(s): advanced laparoscopic surgery, infertility, in vitro fertilization, microsurgery for tubal ligation reversal, surgery for endometriosis, infertility surgery, reproductive endocrinology and robotic surgery
Location: Cleveland Clinic Main Campus
Office: 216.444.1758
Appt: 216.444.6601
JOSEPH P. CROWE, MD
Director, Department of Breast Services
Specialty Interest(s): breast disease
Location: Cleveland Clinic Main Campus
Office: 216.445.7904
Appt: 216.444.3024

JILL R. DIETZ, MD
Specialty Interest(s): minimally invasive breast surgery, oncoplastic surgery, high risk breast cancer and prevention
Location: Cleveland Clinic Main Campus, Beachwood
Office: 216.445.3612
Main Campus Appt: 216.444.3024
Beachwood Appt: 216.839.3200

PEDRO F. ESCOBAR, MD
Director, Robotic and Minimally Invasive Surgery
Specialty Interest(s): gynecologic oncology, breast surgical oncology, robotic surgery
Location: Cleveland Clinic Main Campus, Hillcrest Hospital
Office: 216.445.8486
Main Campus Appt: 216.444.6601
Beachwood Appt: 216.839.3200
Hillcrest Appt: 440.312.5560

ALICIA A. FANNING, MD
Specialty Interest(s): breast cancer, breast disease
Location: Cleveland Clinic Main Campus, Strongsville
Office: 216.444.3334
Main Campus Appt: 216.444.3024
Strongsville Appt: 440.878.2500
Department of Breast Services continued

**KATHERINE B. LEE, MD**

Specialty Interest(s): breast cancer, breast cancer risk assessment and prevention, medical education  
Location: Cleveland Clinic Main Campus, Beachwood  
Office: 216.445.3757  
Main Campus Appt: 216.444.3024

Services for Physicians

**Physician Directory**
View all Cleveland Clinic staff online at clevelandclinic.org/staff.

**Referring Physician Center**
For help with service-related issues, information about our clinical specialists and services, details about CME opportunities and more, email refdr@ccf.org, or call 216.448.0900 or 888.637.0568.

**Critical Care Transport Worldwide**
Cleveland Clinic’s critical care transport team serves critically ill and highly complex patients across the globe. The transport fleet comprises mobile ICU vehicles, helicopters and fixed-wing aircraft. The transport teams are staffed by physicians, critical care nurse practitioners, critical care nurses, paramedics and ancillary staff, and are customized to meet the needs of the patient. Critical care transport is available for children and adults.

To arrange a transfer for STEMI (ST elevated myocardial infarction), acute stroke, ICH (intracerebral hemorrhage), SAH (subarachnoid hemorrhage) or aortic syndromes, call 877.379.CODE (2633).

For all other critical care transfers, call 216.444.8302 or 800.553.5056.

**Track Your Patient’s Care Online**
Whether you are referring from near or far, DrConnect offers secure access to your patient’s treatment progress at Cleveland Clinic. To establish a DrConnect account, visit clevelandclinic.org/drconnect or email drconnect@ccf.org.

**Remote Consults**
Request a remote medical second opinion from Cleveland Clinic. MyConsult is particularly valuable for patients who wish to avoid the time and expense of travel. Visit clevelandclinic.org/myconsult, email eclelandclinic@ccf.org or call 800.223.2273, ext 43223.

**Outcomes Data Available**
The latest Outcomes book from the Cleveland Clinic Ob/Gyn & Women’s Health Institute is available. Our Outcomes books contain clinical outcomes data and information on volumes, innovations, research and publications. To view Outcomes books for many Cleveland Clinic institutes, visit clevelandclinic.org/quality.

**CME Opportunities: Live and Online**
Cleveland Clinic’s Center for Continuing Education’s website, ccfcmc.org, offers convenient, complimentary learning opportunities, from webcasts and podcasts to a host of medical publications and a schedule of live CME courses. Many live CME courses are hosted in Cleveland, an economical option for business travel. Physicians can manage their CME credits by using the myCME Web Portal, available 24/7.

Cleveland Clinic

9500 Euclid Avenue, Cleveland, OH 44195

The Ob/Gyn & Women’s Health Institute, one of 26 institutes at Cleveland Clinic, is designed to meet the unique and changing medical needs of women from adolescence to mature adulthood. The institute’s team is expert in coordinated and supportive treatment of the problems that impact women’s lives, from breast cancer to infertility, incontinence, pelvic floor disorders and more. Cleveland Clinic is a nonprofit, multispecialty academic medical center, consistently ranked among the top hospitals in America by U.S. News & World Report. Founded in 1921, it is dedicated to providing quality specialized care and includes an outpatient clinic, a hospital with more than 1,300 staffed beds, an education institute and a research institute.
