Cleveland Clinic

Founded in 1921, Cleveland Clinic is a nonprofit, multispecialty academic medical center that integrates clinical and hospital care with research and education. Today, 1,800 physicians and scientists practice in 120 medical specialties and subspecialties, annually recording more than 3 million patient visits and more than 70,000 surgeries.

Cleveland Clinic’s main campus on 166 acres in Cleveland, Ohio, includes a 1,000-bed hospital, outpatient clinic, a research institute, specialty institutes, and supporting labs and facilities. Cleveland Clinic also operates more than a dozen family health centers; nine community hospitals, a children’s hospital for rehabilitation and one affiliate hospital in Ohio; a 150-bed hospital and clinic in Weston, Fla.; and health and wellness centers in West Palm Beach, Fla., and Toronto, Canada. Cleveland Clinic Abu Dhabi (United Arab Emirates), a multispecialty care hospital and clinic, is scheduled to open in late 2012.

The Lerner Research Institute is home to all laboratory-based, translational and clinical biomedical research at Cleveland Clinic. With 700,000 total square feet of research space, more than 1,200 scientists and support personnel collaborate with clinical researchers to unravel the mysteries of disease. It is one of the leading NIH-funded research institutes in the nation.

In 2004, Cleveland Clinic Lerner College of Medicine of Case Western Reserve University opened. The program graduated its first students as physician-scientists in 2009.

In 2008, Cleveland Clinic was redesignated as a Magnet status hospital, the most sought-after indicator of nursing excellence, by the American Nurses Credentialing Center. Hospitals that achieve Magnet status are recognized for providing the highest standard of nursing care and excellence.

Cleveland Clinic is consistently ranked among the top hospitals in America by U.S. News & World Report, and our heart and heart surgery program has been ranked No. 1 since 1995.

Cleveland Clinic Institutes

In 2007, Cleveland Clinic restructured its practice, bundling all clinical specialties into integrated practice units called institutes. An institute combines all the specialties surrounding a specific organ or disease system under a single roof. Each institute has a single leader and focuses the energies of multiple professionals onto the patient. From access and communication to billing and point-of-care service, institutes are improving the patient experience at Cleveland Clinic.
The Glickman Urological & Kidney Institute is a world leader in treating complex urologic and kidney conditions in adults and children. Our physicians have pioneered medical advances including partial nephrectomy, laparoscopic and robotic urologic surgery, and the bioartificial kidney, while serving tens of thousands of patients annually. Opened in 2008, the Glickman Tower is helping to improve patient experience by increasing capacity and consolidating services so patients can stay in one location for care.

Services for Physicians

Physician Directory
View all Cleveland Clinic staff online at clevelandclinic.org/staff.

Physician Liaison
Referring physicians have a direct and personal link to Cleveland Clinic with our Physician Liaison. For help with any interaction involving Cleveland Clinic, contact Physician Liaison Kate Kenny at clevelandclinic.org/ContactKate.

Critical Care Transport Worldwide
Cleveland Clinic’s critical care transport team serves critically ill and highly complex patients across the globe. The transport fleet comprises mobile ICU vehicles, helicopters and fixed-wing aircraft. The transport teams are staffed by physicians, critical care nurse practitioners, critical care nurses, paramedics and ancillary staff, and are customized to meet the needs of the patient. Critical care transport is available for children and adults.

To arrange a transfer for STEMI (ST elevated myocardial infarction), acute stroke, ICH (intracerebral hemorrhage), SAH (subarachnoid hemorrhage) or aortic syndromes, call 877.279.CODE (2633).

For all other critical care transfers, call 216.444.8302 or 800.553.5056.

Cleveland Clinic DrConnect
Improved Communication, Improved Care
Cleveland Clinic DrConnect is a complimentary service providing our referring physician colleagues secure, online access to the electronic medical record information related to a patient’s treatment progress. If you would like to receive your next patient report electronically, please log onto clevelandclinic.org/drconnect to establish your own DrConnect account.

Outcomes Data Available
The latest Outcomes book from the Cleveland Clinic Head & Neck Institute is available. Our Outcomes books contain clinical outcomes data and information on volumes, innovations, research and publications. To view Outcomes books for many Cleveland Clinic institutes, visit clevelandclinic.org/quality.

CME Opportunities: Live and Online
Cleveland Clinic’s Center for Continuing Education’s website, clevelandclinicmeded.com, offers convenient, complimentary learning opportunities, from webcasts and podcasts to a host of medical publications and a schedule of live CME courses. Many live CME courses are hosted in Cleveland, an economical option for business travel. Physicians can manage their CME credits by using the myCME Web Portal, available 24/7.

**Cleveland Clinic**

9500 Euclid Avenue, Cleveland, OH 44195

The Glickman Urological & Kidney Institute is one of 26 institutes at Cleveland Clinic that group multiple specialties together to provide collaborative, patient-centered care. The institute is a world leader in treating complex urologic and kidney conditions in adults and children. Our physicians have pioneered medical advances including partial nephrectomy, laparoscopic and robotic urologic surgery, and the bioartificial kidney, while serving tens of thousands of patients annually. Cleveland Clinic is a nonprofit, multispecialty academic medical center. Founded in 1921, it is dedicated to providing quality specialized care and includes an outpatient clinic, a hospital with more than 1,000 staffed beds, an education institute and a research institute.
