On-Site Services

In today's economy, every business is concerned about costs.

Cleveland Clinic's on-site services help reduce business expenses by providing consistent, high-quality medical care where your employees work each day.

Bringing Our Services to You

On-site clinics offer a more cost-efficient means of delivering access to nurses, physicians and other selected medical providers. Patient visits to the on-site clinic avoid medical claims that would otherwise occur due to visits to the physicians' office, urgent care, or emergency room. Our on-site programs bring experienced medical professionals to your workplace.

Advantages for Employers

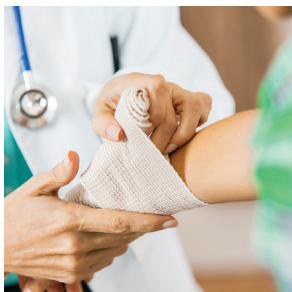

Cost Savings. On-site clinics provide care at a lower cost on site, and encourage employees to use primary care. This decreases the incidence of specialty care and ER visits.

Increased Productivity. Employees remain on-site with less wait time at appointments, and seek care sooner, resulting in decreased absenteeism.

Access to Coordinated Care. Employees receive routine screenings and manage chronic conditions, resulting in fewer hospitalizations.

Occupational Health. Work site injuries stabilized on-site.

Employee Engagement and Retention. In an era where many benefit costs are being shifted to employees, on-site clinics are a program that demonstrates an employer's commitment to their employees' health.
